

**CHAPTER 3****Standard Operating Procedures – Fixed Wing****GENERAL OPERATING RULES – FIXED WING**

All aircraft operations will be conducted in accordance with all applicable FARs, local and national laws, manufacturers' aircraft manuals and limitations and this Manual. Aircraft will be operated in an airworthy condition at all times. Aviation personnel are expected to utilize sound, conservative judgment in their approach to their duties. Safe transportation is the primary objective of the Department.

**FLIGHT CREW CHECK-IN AND POST FLIGHT PERIOD**

Flight crewmembers shall check-in for domestic flights (North America) no less than one hour and 15 minutes prior to the scheduled departure time. Flight crewmembers shall check-in for international flights (other than North America) no less than two hours prior to scheduled departure time. When the Chief Pilot or Trip Captain determines the conditions warrant additional time prior to departure, an earlier check-in time may be designated.

The post-flight period is assumed to be 30 minutes for domestic flights and one hour for international flights.

**FLIGHT PLANNING**

The Trip Captain is responsible for flight planning and related information ( i.e. catering, ground transportation, servicing requirements, reservations etc.). The Trip Captain may assign this duty to the other pilot but retains the responsibility for the task. There must be no confusion as to which pilot is to do this function.

The pilot accomplishing the flight planning shall make the maximum use of available information and specialized equipment (computer flight planning and commercial weather services) provided by the Department.

The Trip Captain will fly the first leg as PIC (Captain) when departing a Department base. Subsequent legs shall be alternated in accordance with operational qualifications and by mutual agreement between the pilots.

**REQUIRED PUBLICATIONS**

Current copies of this manual, Aircraft Maintenance Log (AML), Deferred Maintenance Log (DML), Minimum Equipment List (MEL) and Federal Aviation Regulations (FAR) must be carried on board each Company aircraft.

The Department maintains subscriptions to FAA and Jeppesen for each aircraft and base. Each Company aircraft will carry a current set of aeronautical charts, instrument approach procedure charts for the area of operation and applicable supplemental information.

The charts, FAA-approved aircraft flight manual (AFM), and any applicable supplements and operating handbooks for each aircraft and for installed optional equipment will be provided through a subscription or revision service, as applicable. Each Department aircraft will carry on board a current set of these manuals, handbooks, and supplements during all flight operations. A current copy of the IATA Hazardous Material Manual "Dangerous Goods Regulations" will be maintained at each base of operation.

Additional or supplemental publications may be obtained as needed. The Chief Pilot must approve all airport-related subscriptions and major purchases of publications.

Contract aircraft suppliers shall provide all required documents, manuals, approach and navigation charts and maps, certificates, licenses, logs and other written information for the aircraft being supplied. All contractor-supplied material must be complete and current.

**WEATHER**

Prior to each flight, the PIC will obtain aviation weather reports and forecasts and analyze the following data to determine the effect on the proposed operations:

- Latest NOTAM for the point of departure, route of flight, the destination and the alternate destination.
- Surface weather observations for pertinent stations.
