the origins of needs and yearnings that have always been those of humankind everywhere and always In this search Dubos expresses the same concerns and uses the same words when speaking of the past the present or the future the reason being that the biological and psychological characteristics of humankind have remained essentially the same for at least fifty millennia We are human to the extent that we live according to certain principles which have a human quality This quality has emerged and continues to emerge from the choices that we make throughout our individual lives and that humankind has made from the beginning of its existence To be human is to be able and willing to choose among the options that are offered to the human species by the natural order of things This book examines human species not only on the basis of the biological and psychological attributes it shares with animal species but more by identifying its choices throughout pre history and history
