Early human communities Emergence of agricultural societies Civilizations of Mesopotamia Egypt the Indus Valley and Greece The great empires of Persia China India and Rome The emergence of major religions **The Face of the Earth** J. Donald Hughes, 2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs **A World History of War Crimes** Michael S. Bryant, 2015-12-17 A World History of War Crimes provides a truly global history of war crimes and the involvement of the legal systems faced with these acts Documenting the long historical arc traced by human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic order to the gradual use in the modern age of the criminal trial as a means of enforcing universal norms this book provides a comprehensive one volume account of war and the laws that have governed conflict since the dawn of world civilizations Throughout his narrative Michael Bryant locates the origin and evolution of the law of war in the interplay between different cultures While showing that no single philosophical idea underlay the law of war in world history this volume also proves that war in global civilization has rarely been an anarchic free for all Rather from its beginnings warfare has been subject to certain constraints defined by the unique needs and cosmological understandings of the cultures that produce them Only in late modernity has law assumed its current international humanitarian form The criminalization of war crimes in international courts today is only the most recent development of the ancient theme of constraining when and how war may be fought World History Steven Wallech, Touraj Daryaei, Craig Hendricks, Anne Lynne Negus, Peter P. Wan, Gordon Morris Bakken, 2013-01-22 World History A Concise Thematic Analysis presents the highly anticipated second edition of the most affordable and accessible survey of world history designed for use at the college level An engaging narrative that contextualizes history and does not drown students in a sea of facts Offers a comparative analysis of the great civilizations of Eurasia Africa and the Americas Addresses themes of population dynamics food production challenges disease history warfare and other major issues for civilizations Features new interior design and organization to enhance user experience Instructor's test bank available online at www.wiley.com/go/wallech *The World* Felipe Fernandez-Armesto, 2010-10-26 For today's busy student we've created a new line of highly portable books at affordable prices Each title in the Books a la Carte Plus program features the exact same content from our traditional textbook in a convenient notebook ready loose leaf version allowing students to take only what

they need to class As an added bonus each Books a la Carte Plus edition is accompanied by an access code to all of the resources found in one of our best selling multimedia products Best of all Our Books a la Carte Plus titles cost less than a used textbook The World interweaves two stories of our interactions with nature and with each other The environment centered story is about humans distancing themselves from the rest of nature and searching for a relationship that strikes a balance between constructive and destructive exploitation The culture centered story is of how human cultures have become mutually influential and yet mutually differentiating Both stories have been going on for thousands of years We do not know whether they will end in triumph or disaster There is no prospect of covering all of world history in one book Rather the fabric of this book is woven from selected strands Readers will see these at every turn twisted together into yarn stretched into stories Human focused historical ecology the environmental theme will drive readers back again and again to the same concepts sustenance shelter disease energy technology art The last is a vital category for historians not only because it is part of our interface with the rest of the world but also because it forms a record of how we see reality and of how the way we see it changes In the global story of human interactions the cultural theme we return constantly to the ways people make contact with each another migration trade war imperialism pilgrimage gift exchange diplomacy travel and to their social frameworks the economic and political arenas the human groups and groupings the states and civilizations the sexes and generations the classes and clusters of identity

The Failure of Leadership in Africa's Development Ike Okonta,2020-02-13 The Failure of Leadership in Africa s Development examines the dominant scholarly theories about the cause of Africa s underdevelopment and argues that none of the traditionally invoked causes an alleged black racial inferiority the colonial and neo colonial expropriation of Africa purported natural defects in Africa s geography is plausible as the explanation of the main cause of the continent s underdevelopment Rather the book argues that the chief cause of the continent s lag is the

failure of leadership of Africa's ruling classes This failure of leadership the book shows is most evident in the historically traceable indifference of a long succession of Africa's ruling classes to the scientific and technological advances that were emerging from Europe and Asia during the most critical periods of Africa's history It was this indifference the book argues that set the stage for the subsequent conquest expropriation and technological stagnation of Africa The book recommends a blueprint for the continent's future development
