Fuzzy Cognitive Maps Michael Glykas, 2010-07-07 This important edited volume is the first such book ever published on fuzzy cognitive maps FCMs Professor Michael Glykas has done an exceptional job in bringing together and editing its seventeen chapters The volume appears nearly a quarter century after my original article Fuzzy Cognitive Maps appeared in the International Journal of Man Machine Studies in 1986 The volume accordingly reflects many years of research effort in the development of FCM theory and applications and portends many more decades of FCM research and applications to come FCMs are fuzzy feedback models of causality They combine aspects of fuzzy logic neural networks semantic networks expert systems and nonlinear dynamical systems That rich structure endows FCMs with their own complexity and lets them apply to a wide range of problems in engineering and in the soft and hard sciences Their partial edge connections allow a user to directly represent causality as a matter of degree and to learn new edge strengths from training data Their directed graph structure allows forward or what if inferencing FCM cycles or feedback paths allow for complex nonlinear dynamics Control of FCM nonlinear dynamics can in many cases let the user encode and decode concept patterns as fixed point attractors or limit cycles or perhaps as more exotic dynamical equilibria These global equilibrium patterns are often hidden in the nonlinear dynamics The user will not likely see these global patterns by simply inspecting the local causal edges or nodes of large FCMs Library of Congress Catalog Library of Congress, 1965 A cumulative list of works represented by Library of Congress printed cards

After the Map William Rankin, 2016-07-01 For most of the twentieth century maps were indispensable They were how governments understood managed and defended their territory and during the two world wars they were produced by the hundreds of millions Cartographers and journalists predicted the dawning of a map minded age where increasingly state of the art maps would become everyday tools By the century s end however there had been decisive shift in mapping practices as the dominant methods of land surveying and print publication were increasingly displaced by electronic navigation systems In After the Map William Rankin argues that although this shift did not render traditional maps obsolete it did radically change our experience of geographic knowledge from the God s eye view of the map to the embedded subjectivity of GPS Likewise older concerns with geographic truth and objectivity have been upstaged by a new emphasis on simplicity reliability and convenience After the Map shows how this change in geographic perspective is ultimately a transformation of the nature of territory both social and political Integrating Art and Creativity into Business Practice Schiuma, Giovanni, Lerro, Antonio, 2016-12-28 Adaptability and sustainability are key factors in the success of any business in modern society Developing unique and innovative processes in organizational environments provides room for new business opportunities Integrating Art and Creativity into Business Practice is a key reference source for the latest scholarly research on the tools techniques and methods pivotal to the management of arts and creativity based assets in contemporary organizations Highlighting relevant perspectives across a myriad of topics such as organizational culture value

creation and crowdsourcing this book is ideally designed for managers professionals academics practitioners and graduate students interested in emerging processes for entrepreneurship and business performance

Fuzzy Cognitive Maps for Applied Sciences and Engineering Elpiniki I. Papageorgiou, 2013-12-02 Fuzzy Cognitive Maps FCM constitute cognitive models in the form of fuzzy directed graphs consisting of two basic elements the nodes which basically correspond to concepts bearing different states of activation depending on the knowledge they represent and the edges denoting the causal effects that each source node exercises on the receiving concept expressed through weights Weights take values in the interval $[-1, 1]$ which denotes the positive negative or neutral causal relationship between two concepts An FCM can be typically obtained through linguistic terms inherent to fuzzy systems but with a structure similar to the neural networks which facilitates data processing and has capabilities for training and adaptation During the last 10 years an exponential growth of published papers in FCMs was followed showing great impact potential Different FCM structures and learning schemes have been developed while numerous studies report their use in many contexts with highly successful modeling results The aim of this book is to fill the existing gap in the literature concerning fundamentals models extensions and learning algorithms for FCMs in knowledge engineering It comprehensively covers the state of the art FCM modeling and learning methods with algorithms codes and software tools and provides a set of applications that demonstrate their various usages in applied sciences and engineering

Tracing the Itinerant Path Caitilin J. Griffiths, 2016-10-31 Women have long been active supporters and promoters of Buddhist rituals and functions but their importance in the operations of Buddhist schools has often been minimized Chin ichib 1344 a nun who taught male and female disciples and lived in her own temple is therefore considered an anomaly In Tracing the Itinerant Path Caitilin Griffiths meticulous research and translations of primary sources indicate that Chin ichib is in fact an example of her time a learned female who was active in the teaching and spread of Buddhism and not an exception Chin ichib and her disciples were jish members of a Pure Land Buddhist movement of which the famous charismatic holy man Ippen 1239-1289 was a founder Jish distinguished by their practice of continuous nembutsu chanting gained the support of a wide and diverse populace throughout Japan from the late thirteenth century Male and female disciples rarely cloistered themselves behind monastic walls preferring to conduct ceremonies and religious duties among the members of their communities They offered memorial and other services to local lay believers and joined itinerant missions traveling across provinces to reach as many people as possible Female members were entrusted to run local practice halls that included male participants Griffiths study introduces female jish who were keenly involved not as wives daughters or mothers but as partners and leaders in the movement Filling the lacunae that exists in our understanding of women's participation in Japanese religious history Griffiths highlights the significant roles female jish held and offers a more nuanced understanding

of Japanese Buddhist history Students of Buddhism scholars of Japanese history and those interested in women s studies will find this volume a significant and compelling contribution

Green, Closed Loop, Circular Bio-Economy Charisios Achillas,Dionysis Bochtis,2021-03-04 In recent years bioeconomy strategies have been implemented and adapted internationally In the bioeconomy materials are to a certain extent circular by nature However biomaterials may also be used in a rather linear way Lately a transition towards a circular economy a more restorative and regenerative economic model is being promoted worldwide A circular economy offers an alternative model aiming at doing more and better with less It is based on the idea that circulating matter and energy will diminish the need for new input Its concept lies in maintaining the value of products materials and resources for as long as possible and at the same time minimizing or even eliminating the amount of waste produced Focused on closing the loops a circular economy is a practical solution for promoting entrepreneurial sustainability economic growth environmental resilience and a better quality of life for all The most efficient way to close resource loops is to find value in the waste Different modes of resource circulation may be applied e g raw materials by products human resources logistics services waste energy or water To that end this Special Issue seeks to contribute to the circular bioeconomy agenda through enhanced scientific and multidisciplinary knowledge to boost the performance efficiency of circular business models and support decision making within the specific field The Special Issue includes innovative technical developments reviews and case studies all of which are relevant to green closed loop circular bioeconomy
