The Flight of Icarus Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of

teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools Apportionment in Private Law Kit Barker, Ross

Grantham, 2018-12-13 This collection of essays investigates the way in which modern private law apportions responsibility between multiple parties who are or may be responsible for the same legal event It examines both doctrines and principles that share responsibility between plaintiffs and defendants on the one hand and between multiple defendants on the other The doctrines examined include those originating doctrines which operate to create shared liabilities in the first place such as vicarious and accessorial liability and more centrally those doctrines that operate to distribute the liabilities and responsibilities so created These include the doctrine of contributory comparative negligence joint and several solidary liability contribution reimbursement and proportionate liability as well as defences and principles of equitable allowance that permit both losses and gains to be shared between parties to civil proceedings The work also considers the principles which apportion liability between multiple defendants and insurers in cases in which the cause or timing of a particular loss is hard to determine The contributions to this volume offer important perspectives on the law in the UK USA Canada Australia and New Zealand as well as a number of civilian jurisdictions They explicate the main rules and trends and offer critical insights on the growth and distribution of shared responsibilities from a number of different perspectives historical comparative empirical doctrinal and philosophical **Joint Public Procurement and Innovation** Gabriella Margherita

Racca, Christopher Yukins, 2020-02-12 Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy To achieve that potential both the promises and the perils of innovation must be investigated including the risks and opportunities of joint procurement across borders in the European Union and the United States This in depth research investigates innovation in public procurement from three different perspectives First leading academics and practitioners assess the purchase of innovation with a particular focus on urban public contracting in smart cities involving meta infrastructures public private partnership arrangements and smart contracts A second line of inquiry looks for ways to encourage innovative suppliers Here the collected authors draw on emerging lessons from the US and Europe to explore both the costs and the benefits of spurring innovation through procurement A third perspective looks to

various innovations in the procurement process itself with a focus on the effects of joint and cross border procurement in the EU and US landscapes The chapters review new technologies and platforms the increasingly automated means of selecting suppliers and the related efficiencies that big data can bring to public procurement Expanding on research in the editors prior volume Integrity and Efficiency in Sustainable Public Contracts Balancing Corruption Concerns in Public Procurement Internationally Bruylant 2014 this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic institutional and practical perspectives and to point the way to future research on the contractual models that are emerging from new procurement technologies
