Preparatory Exam Papers September 2014 Mpumalanga:

The African National Congress and the Regeneration of Political Power Susan Booysen, 2011-11-11 The African National Congress is light years beyond the liberation movement of old It remains a juggernaut but its control and dominance are no longer watertight The ANC lives the contradictions of weaknesses cracks and factions while retaining its colossal status As a party movement it draws on its liberation credentials and extracts immense power from its deep anchorage in South Africa's people It is immersed in electoral politics that marks the state of its overwhelming power cyclically As government the ANC is the object of protest but not protest designed to bring the ruling party to its knees The ANC is in command of the state yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted Its incredulous and thus far trusting supporters condemn but only rarely punish deployees who do not pass through the eye of the needle The ANC and the Regeneration of Political Power unpacks these contradictions It focuses on four faces of the ANC's political power the organisation the people political parties and elections and policy and government and explores how the ANC has acted since 1994 to continuously regenerate its power By 2011/12 the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties This book presents insights into how South African politics in many ways synonymous with the politics of the ANC is likely to unfold in years and possibly decades to come

Perspectives on the State Borders in Globalized Africa Yuichi Sasaoka, Aimé Raoul Sumo Tayo, Sayoko Uesu, 2022-02-25 Assessing the different kinds of borders between African nations the contributors present a borderland and trans region approach to understanding the challenges and opportunities facing the peoples of the African continent Africa faces rampant violence terrorism deterioration of water energy food provision influxes of refugees and immigrants and religious hatred under the trends of globalization Solutions for these issues require new perspectives that are not attempted by conventional state building approaches Statehood is limited in many places on the African continent because many states are combined by loose political ties African states borders tend to be regarded as porous and fragile However as the contributors to this volume argue those porous borders can contribute to cultural and socio economic network construction beyond states and the creation of active borderlands by increasing people's mobility contact and trade A must read for scholars of African studies that will also be of great value to academics and students with a broader interest in nationhood globalization and borders

The South African Response to COVID-19 Pieter Fourie, Guy Lamb, 2023-03-28 This book analyses the first two years of South Africa's response to the COVID 19 epidemic from its emergence in early 2020 Drawing on the perspectives of a range of public health experts economists and other social scientists and development practitioners this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness This book provides a systemic analysis of not only the epidemiological progression of COVID 19 in South Africa but also the socio political factors that will be key in determining the future of the country as a whole including health system challenges socio

economic disparities and inequalities and variable often contradictory and tardy policy responses Overall this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights economic recovery against viral vector control and science against ideology with lessons not just for South Africa but also for elsewhere on the African continent and beyond This book will be perfect for researchers and practitioners across Public Health Health Policy and Global Health as well as those with an interest in South African politics and development more generally The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Positive Youth Development, Mental Health, and Psychological Well-Being in Diverse Youth Nora Wiium, Laura Ferrer-Wreder, Jennifer E. Lansford, Lene Arnett Jensen, 2023-06-15 In this Research Topic our aim is to examine how personal resources related to competencies skills and self perception as well as environmental contextual and relational features of the social contexts of diverse youth directly or indirectly are important to mental health and psychological well being As previous research on young people has mainly focused on youth's weaknesses rather than their strengths our use of Positive Youth Development PYD in working with culturally diverse youth and their well being in this Research Topic is novel We invite contributions from researchers that were initially presented their papers in a meeting that was held by research partners of the Cross National Project on Positive Youth Development CN PYD and who represent an international and multidisciplinary panel of experts on PYD The CN PYD was initiated in 2014 at the University of Bergen and has an ongoing data collection that involves approximately 10 000 minority and majority youth and emerging adults ages 16 to 29 living in Africa Asia Australia Europe New Zealand and South America CN PYD uses a strengths based approach to the conceptualization of youth as resources and agentic which is in opposition to the view of the developmental period of adolescence as being a period inherently fraught with problems and risks The goal of the cross national project is to assess personal strengths and contextual resources considering how these resources come together to facilitate youth thriving and to document how young people make positive and valued contributions to themselves and others We also advance research on the complex interplay between personal and contextual resources and their connections with risk behaviors and problems in essence taking a perspective of the whole child both in terms of strengths and problems
