

PSY 244 CHILD OBSERVATION ASSIGNMENT

For this assignment, you will have an opportunity to observe a child in a naturalistic setting. You will conduct your first observation early in the semester, before you have encountered many of the theories or findings from developmental research. You will conduct your second observation later in the semester and will be asked to apply information learned in the course to what you observe.

Child Observation (Time 1 and Time 2)

Observe an infant, toddler, preschooler, or elementary school age child (i.e., birth to 10 years) in one of his or her naturalistic settings. You may observe the child in his or her home, a daycare center or family daycare, preschool program, or school program. The child who you observe cannot be a child with whom you have lived or are living. Please schedule your visit by calling in advance and be sure to keep the appointment. Also make sure you obtain written consent from the parent, teacher and/or caregiver at the home or center/daycare/school before you conduct the observation (see Consent Form below). You will need to hand in the signed consent form with your assignment. For this assignment, it is NOT permissible to observe a child in a naturalistic setting like a park or shopping mall because you will not know for sure how long the child will stay in that setting and there might not be an adult from whom you can gain permission.

Remember that you are there to observe, not to interact with the child. Although you need not ignore the child, you should attempt to limit your engagement so that you can focus on your observation. If a child approaches you and wants to interact with you, you might politely inform the child that you are working and that you cannot talk or play right now.

Please respect the confidentiality of the child(ren) and adult(s) you observe by referring to them by first initials only (e.g., "J") or by a pseudonym in your written paper.

Plan to spend one hour observing the child. Take detailed notes, keeping in mind the requirements of the written part of this assignment (see below), and save them. These notes will help you write the paper following the observation and you will need to hand in your notes with your assignment.

Paper Assignment (Time 1)

Prepare a 3-page double-spaced paper (not including your observation notes) that demonstrates your ability to be a critical observer of children's behavior. Paper should be typed in 12 point font with 1 inch margins. Be sure to include the following in your paper:

1. A description of significant elements of the child and the setting in which the observation took place. Although you do not need to address all of the following, some examples of things to include would be: What is the age and sex of the child that you observed? Where and with whom did the observation take place? Was anyone else present during the observation? How many children were present? How old did they seem to be? How many were boys and how many are

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth and they develop and learn at a rapid pace in their early years This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning Despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well Transforming the Workforce for Children Birth Through Age 8 explores the science of child development particularly looking at implications for the professionals who work with children This report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for

effective professional learning Young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children

Infant Assessment M. Virginia Wyly, 2018-02-12 Infancy is one of the most fascinating periods in the human life cycle In two short years infants become thinking speaking social beings As this book explains over the past three decades researchers and clinicians have developed an array of assessment methods for measuring infant development and diagnosing infants with developmental delays The field of infant assessment has broadened from a major focus on cognitive development to an emphasis on parent infant interaction play assessment and newer strategies that involve naturalistic observations Because of the need to look at the whole infant assessment often involves multiple disciplines The interdisciplinary approach measures the infant domains of motor skills cognitive abilities and language acquisition and evaluates the infant s psychosocial environment The chapters in this volume provide a solid overview of the current trends in infant assessment measures and procedures The book can be used in undergraduate and graduate infant development courses and for advanced courses in infant assessment
