*Equipment Inventories for Owners and Facility Managers* R. A. Keady,2013-04-16 How to use industry standards to create complete consistent and accurate equipment inventories The National Institute of Science and Technology estimates

that the loss of information between the construction of buildings and their operation and maintenance costs facility owners 15.8 billion every year. This phenomenal loss is caused by inconsistent standards for capturing information about facilities and their equipment. In *Equipment Inventories for Owners and Facility Managers*, Robert Keady draws on his twenty years of experience in facility management and his intimate knowledge of CSI classification systems and standards to tackle this problem head-on. Using standards already in use in the AEC industry, he provides the road map for capturing everything owners and facility managers need to know to operate and maintain any facility. This comprehensive step-by-step guide explains the different types of equipment inventories and why they are important. It identifies and describes the types of information that should be captured in an equipment inventory. It describes and compares the different industry standards: CSI OmniClass and UniFormat, COBie and SPiE that can be used for equipment inventories. It provides best practices for identifying and tagging equipment. It walks through the equipment inventory process with real-world examples and best practices. It provides the tools for conducting the equipment inventory tables of all the possible information and data that need to be collected and fifty maps of workflows that can be used to capture that data immediately.

**Public Roads**, 2003 *Managing Facilities for Results* Cheryl Bryan, 2007-03-19 Carving out new service areas within existing space forgoing massive additions or expensive new buildings offers a cost-effective solution for budget-conscious libraries. Building from the proven Results Series model, this volume dovetails with the basics outlined in *The New Planning for Results: A Streamlined Approach*. This new hands-on workbook in the Results Series guides library directors, staff, and boards through the process to prioritize new services that need space. Make plans and identify an appropriate location. Present the case to funding authorities. Conduct a gap analysis. Find resources to reallocate and see what new items are needed. Identify building professionals to assist with alterations. It is supplemented with 23 workforms to support the information and collection process. Three toolkits provide technical assistance on calculating square footage, assessing the message, and complying with the Americans with Disabilities Act (ADA) requirements. With examples ranging from small to large, small public libraries, the process is equally valuable for school, special, and academic librarians who are faced with similar space repurposing challenges. Any library can embrace these practical, proven techniques for addressing community needs by creating a blueprint that prioritizes services and creates the space for them within their existing facility.

**Handbook of Structural Engineering** W.F. Chen, E.M. Lui, 2005-02-28 Continuing the best-selling tradition of the *Handbook of Structural Engineering*, this second edition is a comprehensive reference to the broad spectrum of structural engineering, encapsulating the theoretical, practical, and computational aspects of the field. The contributors cover traditional and innovative approaches to analysis, design, and rehabilitation. New topics include fundamental theories of structural dynamics, advanced analysis, wind and earthquake-resistant design, design of prestressed structures, high-performance steel-concrete and fiber-reinforced polymers, semi-rigid frame structures, structural bracing, and structural design for fire safety.
