Preventing Violence Against Women And Girls:

, *Preventing Violence against Women and Girls* Ellis, Jane, Thiara, Ravi K., 2014-10-22 The need for children and young people to learn about violence against women and girls VAWG has been voiced since the late 1980s This is the first ever book on educational work to prevent VAWG providing the most comprehensive contribution to our knowledge and understanding in this area By bringing together international examples of research and practice the book offers insight into the underpinning theoretical debates and key lessons for practice addressing the complexities and challenges of developing implementing and evaluating educational work to prevent VAWG This multidisciplinary book will be of interest to educationalists VAWG and child welfare practitioners policy makers researchers and students **Preventing Violence Against Women and Children** Institute of Medicine, Board on Global Health, Forum on Global Violence Prevention, 2011-10-12 Violence against women and children is a serious public health concern with costs at multiple levels of society Although violence is a threat to everyone women and children are particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection In some societies certain types of violence are deemed socially or legally acceptable thereby contributing further to the risk to women and children In the past decade research has documented the growing magnitude of such violence but gaps in the data still remain Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes The issue is compounded by the fact that for women and children the perpetrators are often people they know and because some countries lack laws or regulations protecting victims Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against children top 80 percent These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence Intervention strategies include preventing violence before it starts as well as preventing recurrence preventing adverse effects such as trauma or the consequences of trauma and preventing the spread of violence to the next generation or social level Successful strategies consider the context of the violence such as family school community national or regional settings in order to determine the best programs Prevention of Violence Against Women and Girls Tamsin Bradley, Janet Gruber, 2021-09-16 Prevention of Violence Against Women and Girls argues that women and girls are vulnerable across all areas of society and that therefore a commitment to end violence against women and girls needs to be embedded into all development programmes regardless of sectorial focus This book presents an innovative framework for sensitisation and action across development programmes based on emerging best practices and lessons learnt and illustrated through a number of country contexts and a range of programmes Overall it argues that SDG 5 can only be achieved with a systematic model for mainstreaming an end to violence against women and girls no matter what the priorities of the particular

development programme might be Demonstrating how the approach can be applied across contexts the authors explore cases from the energy sector health and humanitarian intervention and from countries as varied as South Sudan Myanmar Rwanda Nepal and Kenya Drawing on nearly three decades of experience working on gender health and violence against women programmes as both practitioners and academics the authors present key lessons which can be used by students researchers and practitioners alike
