Lasker, 2016-05-23 Equal Time Equal Value is the first systematic investigation of Time Banking in the United States Drawing upon detailed case studies and making use of a mix of qualitative and quantitative data this book

explores the most popular type of what has been called community currencies in which localized systems based on time or dollar equivalents act as the medium of exchange. As such it offers rich insights into the challenge presented by Time Banking to both the traditional social service and economic models through the creation of an environment of reciprocity in which everyone's work has equal value. Locating Time Banking within the context of community currencies more generally and investigating the particular characteristics that are central to the production of positive outcomes. Equal Time Equal Value examines the organizational characteristics of Time Banks as well as the motivations of members, types and patterns of exchanges and the effects on members of Time Bank participation in the USA. A timely and detailed exploration of exchange systems at a time of rising unemployment and declining confidence in global economic structures, this book will appeal to sociologists, cultural geographers and anthropologists with interests in social movements, the sociology of work, health promotion and policy, inequality and questions of the creation of community and sustainability.

Business Models and People Management in the Indian IT Industry Ashish Malik, Chris Rowley, 2015-03-24. The global impact of so-called offshoring, including of information technology (IT) and related services, continues to be a topic of great interest to academics, practitioners and policy makers. The Indian IT industry has sustained high levels of growth in revenues and employment since the late 1980s. Even following the global financial crisis and meltdown in 2008, the industry has reported growth, albeit at a lower rate. Furthermore, the high rates of technological change and increased competition have forced businesses and managers to be innovative and create new business models. This book examines how managers and entrepreneurs in the Indian IT industry have explored and exploited human capital opportunities at various stages of the industry's evolution to create innovative human resources (HR) practices and new business models. Based on extensive academic research and deep reflective practitioner accounts, this collection presents expert content, views and a coherent picture of the challenges and changes in the Indian IT industry and analyses how the industry has remained competitive in a constantly changing environment. This book will appeal to researchers, students and practitioners, particularly in the fields of human resources and strategic management.
