The New Arctic Birgitta Evengård, Joan Nymand Larsen, Øyvind Paasche, 2015-06-11 In the late 18th century explorers and scientists started venturing into the Arctic in a heroic and sometimes deadly effort to understand and unveil the secrets of the unforgiving and mysterious polar region of the high north Despite that the Arctic was already populated mattered less for the first wave of polar researchers and explorations who nevertheless brought back valuable knowledge Today the focus in Arctic science and discourse has changed to one which includes the peoples and societies and their interaction with the world beyond The image of a static Arctic heralded first by explorers prevailed for a long time but today the eyes of the World see the Arctic very differently Few if any other places on Earth are currently experiencing the kind of dramatic change witnessed in the Arctic According to model forecasts these changes are likely to have profound implications on biophysical and human systems and will accelerate in the decades to come The New Arctic highlights how and in what parts the natural and political system is being transformed We re talking about a region where demography culture and political and economic systems are increasingly diverse although many common interests and aspects remain and with the new Arctic now firmly placed in a global context Settlements range from small predominantly indigenous communities to large industrial cities and

all have a link to the surrounding environment be it glaciers or vegetation or the ocean itself The New Arctic contributes to our further understanding of the changing Arctic It offers a range of perspectives which reflect the deep insight of a variety of scientific scholars across many disciplines bringing a wide range of expertise The book speaks to a broad audience including policy makers students and scientific colleagues

Environmental Changes Céline Granjou, 2016-02-20 This book addresses environmental changes and how they reconfigure society's relationship to the future It argues that Man does not build his future alone instead environmental changes are also proof of the future making capacity of non human beings The author elaborates on the notion of the futures of Nature by drawing on theoretical contributions by recent ground breaking literature in the field of environmental humanities The book also builds on a sociological investigation into the practices implemented by environmental scientists experts and managers confronted with environmental changes Thinking of nature in terms of its futures requires us to overcome the rooted philosophical tradition that associates nature with permanence and society with creative change This is a daunting task which can only be successful if we look beyond the long lasting influence of the human centered categories of innovation development and civilization that social sciences have themselves contributed to coining We need to consider the active capacities of change and transformation of living beings and matter itself This book is of academic interest but is also for managers in different fields and areas affected by environmental changes Featuring a focus on the notion of future and the aim to locate an approach for the future in sociology Elaborates on the notion of more than human futures drawing on S Whatmore's words Offers grounded and detailed insights into three case study examples

Ice and Snow in the Cold War Julia Herzberg, Christian Kehrt, Franziska Torma, 2018-10-19 The history of the Cold War has focused overwhelmingly on statecraft and military power an approach that has naturally placed Moscow and Washington center stage Meanwhile regions such as Alaska the polar landscapes and the cold areas of the Soviet periphery have received little attention However such environments were of no small importance during the Cold War in addition to their symbolic significance they also had direct implications for everything from military strategy to natural resource management Through histories of these extremely cold environments this volume makes a novel intervention in Cold War historiography one whose global and transnational approach undermines the simple opposition of East and West

Times of History, Times of Nature Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change

Design for Regenerative Cities and Landscapes Rob

Roggema,2022-05-06 This book discusses the way to design and plan for regenerative cities and landscapes Where sustainability aims to safeguard the resources for future generations and the resilience concept focuses on dealing with shocks to keep the system functioning regeneration aims to give back more than it takes from the system This principle is often used in analytical and assessment literature but not yet elaborated in a spatial planning and design context which this book does It offers insights from a range of perspectives spatial scales such as the country level neighbourhood public space streets and the building levels scientific fields and continents amongst which Africa Oceania and Europe **Anticipatory Environmental (Hi)Stories from Antiquity to the Anthropocene** Christopher Schliephake,Evi Zemanek,2023-02-06 Anticipatory Environmental Hi Stories from Antiquity to the Anthropocene studies the interplay of environmental perception and the way societies throughout history have imagined the future state of nature and the environments in which coming generations would live What sorts of knowledge were and are involved in outlining future environments What kinds of texts and narrative strategies were and are developed and modified over time How did and do scenarios and narratives of the past shape hi stories of the future This book answers these questions from a diachronic as well as a cross cultural perspective By looking at a diverse range of historical evidence that transcends stereotypical utopian and dystopian visions and allows for nuanced insights beyond the dichotomous reservoir of pastoral motifs and apocalyptic narratives the contributors illustrate the multifaceted character of environmental anticipation across the ages **Avatar and Nature Spirituality** Bron Taylor,2013-09-30 Avatar and Nature Spirituality explores the cultural and religious significance of James Cameron s film Avatar 2010 one of the most commercially successful motion pictures of all time Its success was due in no small measure to the beauty of the Pandora landscape and the dramatic heart wrenching plight of its nature venerating inhabitants To some audience members the film was inspirational leading them to express affinity with the film s message of ecological interdependence and animistic spirituality Some were moved to support the efforts of indigenous peoples who were metaphorically and sympathetically depicted in the film to protect their cultures and environments To others the film was politically ethically or spiritually dangerous Indeed the global reception to the film was intense contested and often confusing To illuminate the film and its reception this book draws on an interdisciplinary team of scholars experts in indigenous traditions religious studies anthropology literature and film and post colonial studies Readers will learn about the cultural and religious trends that gave rise to the film and the reasons these trends are feared resisted and criticized enabling them to wrestle with their own views not only about the film but about the controversy surrounding it Like the film itself Avatar and Nature Spirituality provides an opportunity for considering afresh the ongoing struggle to determine how we should live on our home planet and what sorts of political economic and spiritual values and practices would best guide us **After the Death of Nature** Kenneth Worthy,Elizabeth Allison,Whitney Bauman,2018-11-09 Carolyn Merchant s foundational 1980 book The Death of Nature Women Ecology and the Scientific Revolution established her as a pioneering researcher of human

nature relations Her subsequent groundbreaking writing in a dozen books and over one hundred peer reviewed articles have only fortified her position as one of the most influential scholars of the environment This book examines and builds upon her decades long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action Seventeen scholars and activists assess praise criticize and extend Merchant s work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future Their contributions offer personal observations of Merchant s influence on the teaching research and careers of other environmentalists

Nature, Temporality and Environmental Management Lesley Head,Katarina Saltzman,Gunhild Setten,Marie Stenseke,2016-08-05 How are different concepts of nature and time embedded into human practices of landscape and environmental management And how can temporalities that entwine past present and future help us deal with challenges on the ground In a time of uncertainty and climate change how much can we hold onto ideals of nature rooted in a pristine and stable past The Scandinavian and Australian perspectives in this book throw fresh light on these questions and explore new possibilities and challenges in uncertain and changing landscapes of the future This book presents examples from farmers gardens and Indigenous communities among others and shows that many people and communities are already actively engaging with environmental change and uncertainty The book is structured around four themes environmental futures mobile natures indigenous and colonial legacies heritage and management Part I includes important contributions towards contemporary environmental management debates yet the chapters in this section also show how the legacy of older landscapes forms part of the active production of future ones Part II examines the challenges of living with mobile natures as it is acknowledged that environments natures and people do not stand still An important dimension of the heritage and contemporary politics of Australia Sweden and Norway is the presence of indigenous peoples As is clear in part III the legacies of the colonial past both haunt and energise contemporary land management decisions Finally part IV demonstrates how the history and heritage of landscapes including human activities in those landscapes are entwined with contemporary environmental management The rich empirical content of the chapters exposes the diversity of meanings practices and ways of being in nature that can be derived from cultural environmental research in different disciplines The everyday engagements between people nature and temporalities provide important creative resources with which to meet future challenges

Cultures of Prediction in Atmospheric and Climate Science Matthias Heymann,Gabriele Gramelsberger,Martin Mahony,2017-06-26 In recent decades science has experienced a revolutionary shift The development and extensive application of computer modelling and simulation has transformed the knowledge making practices of scientific fields as diverse as astro physics genetics robotics and demography This epistemic transformation has brought with it a simultaneous heightening of political relevance and a renewal of international policy agendas raising crucial questions

about the nature and application of simulation knowledges throughout public policy Through a diverse range of case studies spanning over a century of theoretical and practical developments in the atmospheric and environmental sciences this book argues that computer modelling and simulation have substantially changed scientific and cultural practices and shaped the emergence of novel cultures of prediction Making an innovative interdisciplinary contribution to understanding the impact of computer modelling on research practice institutional configurations and broader cultures this volume will be essential reading for anyone interested in the past present and future of climate change and the environmental sciences The

symbiotic city Marian Stuiver,2023-08-14 Urgency asks us to transform our cities and re embed them into soil water and living organisms to safeguard our planet s resources and restore biodiversity This book introduces the symbiotic city a future urban landscape that creates beneficial relationships between humans and nature The symbiotic city is a narrative of hope that re creates biodiversity and promotes social equity inclusion and environmental justice The chapters introduce cities that are already evolving to becoming more symbiotic The cities and metropolitan areas described in this book show initiatives that invite the voices of nature to re enter the urban realm The cases advocate diverse values of nature such as nature based solutions personal and communal values of nature and the intrinsic rights of nature They give the reader insights in epistemological governance and action oriented solutions to work towards the symbiotic city The book provides strategic and practical guidelines for urbanites from any background We welcome our readers to actively join the exciting journey toward future cities and metropolitan areas where all voices are heard human and non human **For Nature/With Nature: New**

Sustainable Design Scenarios Claudio Gambardella,2024-05-03 This volume contributes to the construction of a multi voice mosaic on the theme of Nature and the relationship between Man understood as designer and Nature by emphasizing the innovative and sustainable proposals coming from the discipline of design in its many facets and interdisciplinary contributions Since it isn t discussed the creative and economic effort that designers institutions and companies have been leading for years to improve human living conditions preference will be given to scientific contributions unpublished or not yet fully known case studies projects of strategies products systems and services theoretical contributions communication that are an expression of a new approach to Nature seen as our ally and object of an ethics of care The focus is the design both in its role as innovation driver and interpreter of social evolution that must be considered within the human nature relationship The topics identify some of the most relevant fields of development in which Design Driven Innovation can be developed in the respect of perspective of a new relationship with nature **The Impact of Covid-19 on the Future of**

Research Handbook on Flood Risk Management Jessica Lamond,David Proverbs,Namrata Bhattacharya

Mis,2024-04-12 Pushing the boundaries of flood risk management research this comprehensive Research Handbook presents pragmatic insights into all areas relating to flood risk Through its use of dynamic and people centred paradigms it explores urban flood management within localities properties neighbourhoods and cities **Green Development** Bill

Adams,2019-12-05 The concept of sustainability lies at the core of the challenge of environment and development and the way governments business and environmental groups respond to it Green Development provides a clear and coherent analysis of sustainable development in both theory and practice Green Development explores the origins and evolution of mainstream thinking about sustainable development and offers a critique of the ideas behind them It draws a link between theory and practice by discussing the nature of the environmental degradation and the impacts of development It argues that ultimately green development has to be about political economy about the distribution of power and not about environmental quality Its focus is strongly on the developing world The fourth edition retains the broad structure of previous editions but has been updated to reflect advances in ideas and changes in international policy Greater attention has been given to the political ecology of development market based and neoliberal environmentalism and degrowth This fully revised edition discusses the origins of thinking about sustainability and sustainable development and its evolution to the present day the ideas that dominate mainstream sustainable development including natural capital the green economy market environmentalism and ecological modernisation critiques of mainstream ideas and of neoliberal framings of sustainability and alternative ideas about sustainability that challenge business as usual thinking such as arguments about limits to growth and calls for degrowth the dilemmas of sustainability in the context of forests desertification food and farming biodiversity conservation and dam construction the challenge of policy choices about sustainability particularly between reformist and radical responses to the contemporary global dilemmas Green Development offers clear insights into the challenges of environmental sustainability and social and economic development It is unique in offering a synthesis of theoretical ideas on sustainability and in its coverage of the extensive literature on environment and development around the world The book has proved its value to generations of students as an authoritative thought provoking and readable guide to the field of sustainable development

Ecosocialism Salvatore Engel-Di Mauro,2024-11-30 This book offers an extensive critical overview of eco socialism one of the most generative and significant aspects of contemporary debates within socialism Marxism has played a foundational role in the development of ecosocialism since its inception and has also led to critical reflections on the 20th century Marxism and ecological interpretation of Marxist writings Despite the relevance of ecosocialism to the pressing debates on the ecological crisis and the growing literature on ecosocialism there has not been a comprehensive account on ecosocialism and its variations This volume seeks to fill this important gap and to pave the way for a more systematic development of this emerging paradigm The book not only engages with a critique of other non socialist ecological schools of thought in defence of ecosocialism but also provides a critical overview of debates within ecosocialism

and of ecosocialism itself The latter includes an appraisal of ecosocialism in Bolivarian Venezuela and the implications of current efforts in the People's Republic of China to build an ecological civilisation Furthermore the book contains a crucial discussion about the relation between eco-socialism and indigenous studies and movements Adaptation in the Anthropocene Pramova, E.,Lavorel, S.,Locatelli, B.,Colloff, M.J.,Bruley, E.,2020-03-24 Key messagesEcosystems provide people with services that enable adaptation to climate change which we refer to here as adaptation services But adaptation services do not flow automatically some input from people is needed We identified five types of mechanisms that support the production of adaptation services These mechanisms are related to i multifunctional and traditional ecosystem management ii proactive management of transformed ecosystems iii use of novel adaptation services iv collective ecosystem management and v appreciating using and valuing adaptation services Understanding these mechanisms can lead to an improved flow of adaptation services and more options for livelihoods and well being under climate change This InfoBrief summarizes the findings of a paper published in the Philosophical Transactions of the Royal Society Series B Lavorel et al 2020

Transformed States Martin Halliwell,2024-11-15 Honourable Mention British Association of American Studies Book Award Transformed States offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from Oryx and Crake to Annihilation and from Gattaca to Avatar By assessing the complex relationship between federal politics and the biomedical industry Transformed States develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books Therapeutic Revolutions 2013 and Voices of Mental Health 2017 Transformed States is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to the global emergency of COVID 19
