out of Japan's triple disaster now known as 3.11. The book provides a broad and nuanced picture of the varied literary responses to this ongoing tragedy focusing on serious fiction (*junbungaku*), the one area of Japanese cultural production that has consistently addressed the disaster and its aftermath. Examining short stories and novels by both new and established writers, author Rachel DiNitto effectively captures this literary tide and names it after the nuclear accident that turned a natural disaster into an environmental and political catastrophe. The book takes a spatial approach to a new literary landscape, tracing Fukushima fiction thematically from depictions of the local experience of victims on the ground through the regional and national conceptualizations of the disaster to considerations of the disaster as history and last to the global concerns common to nuclear incidents worldwide. Throughout, DiNitto shows how fiction writers played an important role in turning the disaster into a narrative of trauma that speaks to a broad readership within and outside Japan. Although the book examines fiction about all three of the disasters (earthquake, tsunami, and nuclear meltdowns), DiNitto contends that Fukushima fiction reaches its critical potential as a literature of nuclear resistance. She articulates the stakes involved, arguing that serious fiction provides the critical voice necessary to combat the government and nuclear industry's attempts to move the disaster off the headlines as the 2020 Olympics approach and Japan restarts its idle nuclear power plants. Rigorous and sophisticated yet highly readable and relevant for a broad audience, *Fukushima Fiction* is a critical intervention of humanities scholarship into the growing field of Fukushima studies. The work pushes readers to understand the disaster as a global crisis and to see the importance of literature as a critical medium in a media-saturated world. By engaging with other disasters from 9/11 to Chernobyl to Hurricane Katrina, DiNitto brings Japan's local and national tragedy to the attention of a global audience, evocatively conveying fiction's power to imagine the unimaginable and the unforeseen.

Writing Pregnancy in

Low-Fertility Japan Amanda C. Seaman, 2016-12-31. *Writing Pregnancy in Low Fertility Japan* is a wide-ranging account of how women writers have made sense and nonsense of pregnancy in postwar Japan. While earlier authors such as Yosano Akiko had addressed the pain and emotional complexities of childbearing in their poetry and prose, the topic quickly moved into the literary shadows when motherhood became enshrined as a duty to state and sovereign in the 1930s and 40s. This reproductive imperative endured after World War II, spurred by a need to create a new generation of citizens and consumers for a new peacetime nation. It was only in the 1960s, in the context of a flowering of feminist thought and activism, that more critical and nuanced appraisals of pregnancy and motherhood began to appear. In her fascinating study, Amanda C. Seaman analyzes the literary manifestations of this new critical approach, introducing readers to a body of work notable for the wide range of genres employed by its authors, including horror and fantasy, short stories, novels, memoir, and manga, the many political, personal, and social concerns informing it, and the diverse creative approaches contained therein. This pregnancy literature, Seaman argues, serves as an important yet rarely considered forum for exploring and debating not only the particular experiences of the pregnant mother-to-be but the broader concerns of Japanese women about their bodies, their

families their life choices and the meaning of motherhood for individuals and for Japanese society It will be of interest to scholars of modern Japanese literature and women s history as well as those concerned with gender studies feminism and popular culture in Japan and beyond
