Origins Science in U.S. K-12 Public Schools; Is it Education or Indoctrination? Mark Biedebach, 2020-12-23 A Biophysicist and Constitutional Lawyer Address a Profound Question Is it OK for our public schools to teach only Atheistic answers to ultimate religious questions Where do we come from and what is the nature of life These are the two biggies implicitly addressed by U S K 12 origins science education The answers form the foundation for the third How should life be lived ethically and morally The answers to the third will be significantly affected by how we answer the first two The authors show that there are two evidence based alternatives to the first two We either come from unguided material causes without purpose or we come from material and intelligent causes for a purpose The materialistic alternative provides the foundation for non theistic religious answers to questions of ethics and morality while the teleological alternative supports theistic answers The problem is that modern origins science uses a concealed materialistic orthodoxy that permits only Atheistic narratives about the origin of the Universe of life and the diversity of life Thus when these materialistic atheistic explanations are taught by our K 12 public schools the impressionable kids are only given an atheistic narrative rather than an objective education about the evidence for and against both views Calvert the lawyer who switched from stock fraud to Constitutional law 20 years ago explains how the law actually favors the objective rather than the materialistic method for origins science education Atheism is just as religious as theism for First Amendment purposes Accordingly just as the schools cannot push a theistic prayer during the invocation at a high school graduation neither can it adopt or implement an atheistic orthodoxy when teaching origins science He also explains that objectivity is also required as the scientific method for the testing of historical narratives require consideration of all evidence based alternatives At the end the Authors provide a set of ten suggestions for the development of objective standards and curricula for teaching origins science

Reconciling Genesis & Science Fred Snowden, 2019-10-10 Evolutionists Creationists and Intelligent Design theorists have been arguing the questions of the origin of the universe for decades To the surprise of many the argument is not simply scientific Philosophy and point of view often skew the facts In recent years the battle has escalated isolating the groups so the productive communication and genuine debate has become impossible In this book we look for answers from philosophy time life anthropology the experts Columbus Galileo and the Soul Can they help us get to the truth

Psychodrama Since Moreno Dr Paul Holmes, Paul Holmes, Marcia Karp, Michael Watson, 2005-07-25

Internationally recognised practitioners of the psychodramatic method discuss the theory and practice of psychodrama since Moreno's death. Key concepts of group psychotherapy are explained and their development illustrated. **Being Scioto Hopewell: Ritual Drama and Personhood in Cross-Cultural Perspective** Christopher Carr, 2022-01-05. This book in two volumes breathes fresh air empirically, methodologically and theoretically into understanding the rich ceremonial lives, the philosophical, religious knowledge and the impressive material feats and labor organization that distinguish Hopewell Indians of central Ohio and neighboring regions during the first centuries CE. The first volume defines cross-culturally for the first time the ritual drama as a genre of social performance. It reconstructs and compares parts of 14 such dramas that Hopewellian and other Woodland period peoples performed in their ceremonial centers to help the soul-like essences of their deceased make the journey to an afterlife. The second volume builds and critiques ten formal cross-cultural models of personhood and the self and infers the nature of Scioto Hopewell people's ontology. Two facets of their ontology are found to have been instrumental in their creating the intercommunity alliances and cooperation and gathering the labor required to construct their huge multicomunity ceremonial centers: a relational collective concept of the self defined by the ethical quality of the relationships one has with other beings and a concept of multiple soul-like essences that compose a human being and can be harnessed strategically to create familial-like ethical bonds of cooperation among individuals and communities. The archaeological reconstructions of Hopewellian ritual dramas and concepts of personhood and the self and of Hopewell people's strategic uses of these are informed by three large surveys of historic Woodland and Plains Indians narratives, ideas and rites about journeys to afterlives, the creatures who inhabit the cosmos and the nature and functions of soul-like essences coupled with rich contextual archaeological and bioarchaeological taphonomic analyses. The bioarchaeological taphonomic method of *l'anthropologie de terrain* new to North American archaeology is introduced and applied. In all the research in this book vitalizes a vision of an anthropology committed to native logic and motivation and skeptical of the imposition of Western world views and categories onto native peoples. ***Studies in Contemporary Jewry*** Jonathan Frankel, 1998-02-05. Was the Holocaust a natural product of a long German history of Anti-Semitism? Or were the Nazi policies simply a wild mutation of history not necessarily connected to the past? Or does the truth lie somewhere in between? This latest volume in the acclaimed *Studies in Contemporary Jewry* series edited by internationally known scholars at the Hebrew University in Jerusalem presents essays on the origins of the Holocaust. The works in this volume are diverse in scope and opinion ranging from general philosophical discourses to detailed analyses of specific events and often reflecting the divergent ideologies and methods of the contributors. But each adds to the whole and the result is a fascinating panorama that is sure to be indispensable to all students and scholars of the subject. ***Modernity, a World of Confusion: Reality and Choice*** Jack Stanfield, 2013-02-05. Do things bring happiness? Do you believe only what you see? What is truth? What can you reliably know? Is death nothingness? Does God exist? This book examines such questions from which two distinct world

views arise and are surveyed The book examines reality how our choices determine our character and final destination knowledge and limitations of science surveys relativity quantum physics life evolution and mans uniqueness and looks at realitys material and immaterial aspects Genesis is reviewed and shown to have scientific meaning The book ends by proposing two very different paths that one can choose to follow
