Gary Miller, 2002 This book investigates the precise nature of nonfinite structures and explores the ways in which they
change Gary Miller examines a broad range of structures including traditional infinitives gerunds and participles across
different Indo European and some non Indo European languages now and in the past As structures which are nonfinite in
some languages are not so in others the question arises whether the concept nonfinite has any meaning or explanatory power
In seeking an answer to this conundrum the author shows that infinitives with subject person agreement such as in West
Greenlandic Modern Greek Portuguese Welsh and Hungarian share properties with prototypical nonfinite formations
Professor Miller examines languages with morphologically marked tense on infinitives including Ancient Greek and Latin and
Modern Turkish He demonstrates that nonfinite structures that can be assigned non structural inherent or semantic case
differ systematically from those with either structural or no case The book concludes with a substantial history of infinitives
gerunds and participles in Old and Middle English which reveals why and how nonfinite structures change and vary over
time Gary Miller's innovative theoretical reasoning and the wide range of evidence on which it is brought to bear make this
book a considerable contribution to the understanding of grammatical change and its formal expression as well as to the

located in Cambridge London Oxford Tokyo and San Marino California offers both individual manuscript descriptions and a
record of the annotations The new and detailed codicological descriptions include information on provenance and ownership
a full list of the contents and a description of the physical make up and the presentation of each manuscript The first
