

Visualization Think about how each net can be folded to form a cube. What is the color of the face that will be opposite the red face?

24. There are eleven different nets for a cube. Four of them are shown above.
 a. Draw as many of the other seven as you can. (Hint: Two nets are the same if you can rotate or flip one to match the other.) See margin p. 514.
 b. **Writing** If you were going to make 100 cubes for a mobile, which of the eleven nets would you use? Explain why. See left.
25. There are eight different nets for a pyramid with a square base. Draw as many of them as you can. See margin.

Visualization A plane region that revolves completely about a line sweeps out a solid of revolution. Use the sample to help you describe the solid of revolution you get by revolving each region about line ℓ .

Sample: Revolve the rectangular region about the line ℓ and you get a cylinder as a solid of revolution.

cylinder attached to a cone

26. cone
 27. sphere
 28. cylinder attached to a cone
29. There are five regular polyhedrons. They are called *regular* because all their faces are congruent regular polygons, and the same number of faces meet at each vertex. They are also called *Platonic Solids* after the Greek philosopher Plato (427–347 B.C.).

- a. Match each net below with a Platonic Solid.

- 29b. regular triangular pyramid, cube
 b. The first two Platonic solids have more familiar names. What are they?
 c. Verify that Euler's Formula is true for the first three Platonic solids. See below.
 30. A cube has a net with area 216 in.^2 . How long is an edge of the cube? 6 in.
 29c. $4 + 4 = 8 + 2$, $6 + 8 = 12 + 2$, $8 + 6 = 12 + 2$

Lesson 10-1 Space Figures and Nets 515

Lesson Quiz 10-1

Is the pattern a net for a cube? If so, name two letters that will be on opposite faces.

no

yes; A and C, B and D, E and F

3. Draw a net for the figure.

Sample:

Use Euler's Formula to solve.

4. A polyhedron with 12 vertices and 30 edges has how many faces? 20
 5. A polyhedron with 2 octagonal faces and 8 rectangular faces has how many vertices? 16

Alternative Assessment

Have each student bring a real-world polyhedron to class and draw a net for the solid. Have them use Euler's Formula to calculate the number of edges and vertices and then verify their results by actually counting the number of faces, edges, and vertices.

Bowen, Andreas Fett, Michael G. Hinchey, 1998-09-16 1 In a number of recent presentations most notably at FME 96 one of the foremost scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany **Canadian Mathematical Bulletin**, 1968 Geometry
