**Quick Hits for Teaching with Technology** Robin K. Morgan, Kimberly T. Olivares, 2012-02-29 A wealth of good ideas for using technology in education from increasing student engagement to managing hybrid and distance learning Teachers College Record How should I use technology in my courses What impact does technology have on student learning Is distance learning effective Should I give online tests and if so how can I be sure of the integrity of the students work These are some of the questions that instructors raise as technology becomes an integral part of the educational experience In Quick Hits for Teaching with Technology award winning instructors representing a wide range of academic disciplines describe their strategies for employing technology to achieve learning objectives They include tips on using just in time teaching wikis clickers YouTube blogging and GIS to name just a few An accompanying interactive website enhances the value of this innovative tool [Air University Review](#) ,1963 **Technical Book Review Index** ,1969 **Air University Quarterly Review** ,1963 *Camus' Answer* Robert Trundle, 2001-01-01 This work investigates whether Camus idea of living without conceptual absolutes is an attainable goal **Reader in Gender Archaeology** Kelley Hays-Gilpin, David S. Whitley, 1998 This Reader in Gender Archaeology presents nineteen current controversial and highly influential articles which confront and illuminate issues of gender in prehistory The question of gender difference and whether it is natural or culturally constructed is a compelling one The articles here which draw on evidence from a wide range of geographic areas demonstrate how all archaeological investigation can benefit from an awareness of issues of gender They also show how the long term nature of archaeological research can inform the gender debate across the disciplines The volume organizes this complex area into seven sections on key themes in gender archaeology archaeological method and theory human origins division of labour the social construction of gender iconography and ideology power and social hierarchies and new forms of archaeological narrative includes section introductions which outline the history of research on each topic and present the key points of each article presents a balance of material which rewrites women into prehistory and articles which show how the concept of gender informs our understanding and interpretation of the past [Einstein and Oppenheimer](#) Silvan S. Schweber, 2008 Albert Einstein and J Robert Oppenheimer two iconic scientists of the twentieth century belonged to different generations with the boundary marked by the advent of quantum mechanics By exploring how these men differed in their worldview in their work and in their day this book provides powerful insights into the lives of two critical figures and into the scientific culture of their times In Einstein s and Oppenheimer s philosophical and ethical positions their views of nuclear weapons their ethnic and cultural commitments their opinions on the unification of physics even the role of Buddhist detachment in their thinking the book traces the broader issues that have shaped science and the world Einstein is invariably seen as a lone and singular genius while Oppenheimer is generally viewed in a particular scientific political and historical context Silvan Schweber considers the circumstances behind this perception in Einstein s coherent and consistent self image

and its relation to his singular vision of the world and in Oppenheimer's contrasting lack of certainty and related non belief in a unitary ultimate theory Of greater importance perhaps is the role that timing and chance seem to have played in the two scientists contrasting characters and accomplishments with Einstein's having the advantage of maturing at a propitious time for theoretical physics when the Newtonian framework was showing weaknesses Bringing to light little examined aspects of these lives Schweber expands our understanding of two great figures of twentieth century physics but also our sense of what such greatness means in personal scientific and cultural terms      *The Optical Journal and Review of Optometry* ,1922
