differences are highlighted and the influence of national and regional initiatives related to pedagogical strategies teacher education and cultural expectations are considered to offer an insightful examination of how best practices might be shared across borders This book will benefit researchers academics and postgraduate scholars with an interest in international and comparative education mathematics and educational policy Those with a specialization in primary mathematics education including pedagogy and teacher preparation will also benefit from this book

Leadership and Intercultural Dynamics

Anthony H. Normore, John Collard, 2009-01-01 The work will explore issues related to educational leadership in various settings in the 21st century It will argue that the context for leadership within many nation states and international scenarios involves interaction between multiple and diverse social cultures A further proposition is that the dominant leadership theory and discourse in the past reflects forms of western hegemony and mono cultural assumptions drawn largely from the Anglo American worldview It will argue that such frameworks have limited validity in multicultural societies such as Australia Britain Canada Europe and the USA and with indigenous communities within such nations These societies contain significant populations which do not share the core values which inform established leadership practice and institutional paradigms in such nations The consequence can often be insensitivity towards non mainstream cultures inappropriate structures failed interventions and alienation of individuals from major institutions and traditions Another proposition is that as more developing nations increase in affluence and view education as a key economic strategy they become increasingly exposed to western discourses about leadership and management Whilst acknowledging that western traditions have much to offer there is a danger that this can involve forms of cultural imperialism whereby local traditions are ignored or subjugated There is a need for developing nations to recognise and value the traditions and practices from their own cultures and assess the extent to which they are compatible with borrowings from other nations Such processes require a sophisticated degree of reflective analysis to determine potential compatibilities and conflicts This is an alternative to unmediated cultural borrowing cloning and hybridization Western leadership scholars who work in such contexts have some responsibility to address this interaction instead of blithely offering practices and recipes from their metropolitan world views The final proposition is that there is a need to develop models and practices for intercultural dynamics which are responsive to intercultural complexity When these are thoroughly developed there will be clear implications for education The unique features of this book include It introduces a new theoretical perspective on leadership and intercultural issues which builds upon the previous work of cross cultural theorists from previous decades in educational leadership discourse It will explore the three primary contexts for leadership and intercultural interaction with indigenous communities in nation states with multicultural communities in nation states and with international education and development programs The book will draw upon a variety of authors from across the globe from Australia Britain Canada China Fiji Hong Kong Mexico Sweden and the United States The book will provide opportunities for the development of comparative and wide ranging perspectives within specific fields For instance students

will be able to compare issues related to indigenous education in New Zealand Canada and Fiji Multicultural perspectives can be informed by experiences from Britain Canada and the US One of the strong chapters in the book is on A First Nation leadership program in the US International programs can be compared from contexts as diverse as Bellarus China and Pacific Islands As such the book will supplement and challenge the mono cultural texts which tend to dominate leadership preparation programs in both developed and developing nations The intended audience for this book includes academics and students in the fields of education health public administration and community development in both the developed and developing world It will also appeal to practitioners in national state and local sites who operate in intercultural contexts
