Improving Water, Sanitation, and Hygiene in Schools Kevin Tayler, Asako Maruyama, 2020-04-01 Good water sanitation and hygiene WASH services protect health and the environment Such services are particularly important in schools to instill lifelong proper hygiene habits in children and provide them access to the requisite facilities Many schools in Mongolia face significant challenges in improving WASH due to physical and demographic conditions The country s harsh winters require sustainable WASH facilities that can withstand extended periods of below freezing temperatures This publication provides essential information

for national and local administrators engineers field practitioners and policy makers to plan implement and manage improved WASH in schools particularly in small and isolated rural settlements It covers WASH standards and norms design and technology options operation and maintenance hygiene education approaches and cost estimation **Eco-efficient Masonry Bricks and Blocks** Fernando Pacheco-Torgal, Paulo B. Lourenco, Joao Labrincha, Prinya Chindaprasirt, S Kumar, 2014-11-27 Masonry walls constitute the interface between the building s interior and the outdoor environment Masonry walls are traditionally composed of fired clay bricks solid or perforated or blocks concrete or earth based but in the past and even in the present they were often associated as needing an extra special thermal and acoustical insulation layer However over more recent years investigations on thermal and acoustical features has led to the development of new improved bricks and blocks that no longer need these insulation layers Traditional masonry units fired clay bricks concrete or earth based blocks that don t offer improved performance in terms of thermal and acoustical insulation are a symbol of a low technology past that are far removed from the demands of sustainable construction This book provides an up to date state of the art review on the eco efficiency of masonry units particular emphasis is placed on the design properties performance durability and LCA of these materials Since masonry units are also an excellent way to reuse bulk industrial waste the book will be important in the context of the Revised Waste Framework Directive 2008 98 EC which states that the minimum reuse and recycling targets for construction and demolition waste CDW should be at least 70% by 2020 On the 9th of March 2011 the European Union approved the Regulation EU 305 2011 known as the Construction Products Regulation CPR and it will be enforced after the 1st of July 2013 The future commercialization of construction materials in Europe makes their environmental assessment mandatory meaning that more information related to the environmental performance of building materials is much needed Provides an authoritative guide to the eco efficiency of masonry units Examines the reuse of waste materials Covers a range of materials including clay cement earth and pumice Brick and Block Masonry Claudio Modena, F. da Porto, M.R. Valluzzi, 2016-11-03 Brick and Block Masonry Trends Innovations and Challenges contains the lectures and regular papers presented at the 16th International Brick and Block Masonry Conference Padova Italy 26 30 June 2016 In an ever changing world in which innovations are rapidly implemented but soon surpassed the challenge for masonry the oldest and most traditional building material is that it can address the increasingly pressing requirements of quality of living safety and sustainability This abstracts volume and full paper USB device focusing on challenges innovations trends and ideas related to masonry in both research and building practice will proof to be a valuable source of information for researchers and practitioners masonry industries and building management authorities construction professionals and educators Research and Applications in Structural Engineering, Mechanics and Computation Alphose Zingoni, 2013-08-15 Research and Applications in Structural Engineering Mechanics and Computation contains the Proceedings of the Fifth International Conference on Structural Engineering Mechanics and Computation SEMC 2013 Cape Town South Africa 2 4
