The Einstein Theory of Relativity Antoon Hendrik Lorentz, 2016-08-04 Hendrik Antoon Lorentz 18 July 1853 4 February 1928 was a Dutch physicist who shared the 1902 Nobel Prize in Physics with Pieter Zeeman for the discovery and theoretical explanation of the Zeeman effect He also derived the transformation equations which formed the basis of the special relativity theory of Albert Einstein The Einstein Theory of Relativity Hendrik Antoon Lorentz, 2017-10-14 Whether it is true or not that not more than twelve persons in all the world are able to understand Einstein's Theory it is nevertheless a fact that there is a constant demand for information about this much debated topic of relativity The books published on the subject are so technical that only a person trained in pure physics and higher mathematics is able to fully understand them In order to make a popular explanation of this far reaching theory available the present book is published Theory of Relativity H. A. Lorentz, 2018-08-06 The Einstein Theory of Relativity By H A Lorentz It is comprehensible that a person could not have arrived at such a far reaching change of view by continuing to follow the old beaten paths but only by introducing some sort of new idea Indeed Einstein arrived at his theory through a train of thought of great originality Let me try to restate it in concise terms We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work.
