

Acclaim for

THE EMPEROR OF ALL MALADIES

"Magisterial. . . . Siddhartha Mukherjee's work is a small miracle of insight, scope, pace, structure and lucidity. . . . Reading *The Emperor of All Maladies* is a sharpening, clarifying and moving experience. . . . Some readers, I fear, will shun a scholarly book about cancer. But to those willing to engage it, let me say this amounted to one of the best reading experiences of my life."

—Karen Long, *THE CLEVELAND PLAIN DEALER*

"Magisterial. . . . [Mukherjee] excavates the deep history of the 'war' on cancer, weaving haunting tales of his own clinical experience with sharp sketches of the sometimes heroic, sometimes misguided scientists who have preceded him in the fight."

—*NEW YORK TIMES BOOK REVIEW*

"It's hard to think of many books for a general audience that have rendered any area of modern science and technology with such intelligence, accessibility, and compassion. *The Emperor of All Maladies* is an extraordinary achievement."

—*THE NEW YORKER*

"Stirring. . . . With a Dickensian command of character and an instinct for the drama of discovery, [Mukherjee] makes science not merely intelligible but thrilling. . . . A compulsively readable, surprisingly uplifting and vivid tale."

—*O, THE OPRAH MAGAZINE*

"What makes Mukherjee's narrative so remarkable is that he imbues decades of painstaking laboratory investigation with the suspense of a mystery novel and urgency of a thriller. . . . masterful analogies in this volume should earn Mukherjee a rightful place alongside Carl Sagan, Stephen Jay Gould, and Stephen Hawking in the pantheon of our epoch's great explicators."

—*BOSTON GLOBE*

"Riveting and powerful. . . . Mukherjee's extraordinary book might stimulate a wider discussion of how to wisely allocate our precious health care resources."

—*SAN FRANCISCO CHRONICLE*

"Now and then a writer comes along who helps us fathom both the intricacies of a scientific specialty and its human meaning. Lewis Thomas, Sherwin Nuland, and Oliver Sacks come to mind. Add to their company Siddhartha Mukherjee."

—*ELLE MAGAZINE*

Coming to Our Senses Viki McCabe, 2014-02-03 In *Coming to Our Senses* cognitive scientist Viki McCabe argues that prevailing theories of perception cognition and information cannot explain how we know the world around us Using scientific studies and true stories McCabe shows that the ecological disasters political paralysis and economic failures we now face originate in our tendency to privilege cognitive processes and products over the information we access with our perceptual systems As a result we typically default to making decisions using inaccurate information such as mechanistic theories that reduce the world to extractable exploitable parts But the world does not function as an assembly of parts it functions as a coalition of complex systems from cells to cities that organize and sustain themselves and cannot be partitioned and retain their purpose McCabe also argues that we cannot describe such systems using theories and words Instead each system reveals itself in fractal like geometric configurations that emerge from and reflect the structural organization that brings it into existence and determines its functions a veritable physics of information Thus we comprehend phenomena as disparate as neural networks river deltas and economies by perceiving the branching geometry that organizes them into distribution systems McCabe's key point is that form not only follows function it doubles as information If we put our theories aside and focus on the information the world displays our perceptions can block hostile mental takeovers reconnect us to reality and bring us

back to our senses
