The Ending Of Time Where Philosophy And Physics Meet:

The Ending of Time Jiddu Krishnamurti,2014-10-28 The provocative and penetrating philosophical classic of science and spirituality a discourse between the revered spiritual leader Krishnamurti and renowned physicist Dr David Bohm exploring the origin of human conflict and what we can do about the barriers that stand in the way of insight and consciousness now revised and updated with a new introduction and added dialogues The Ending of Time is a series of important and enlightening dialogues in which Jiddu Krishnamurti and Dr David Bohm men from vastly different backgrounds in philosophy and physics respectively debate profound existential questions that illuminate the fundamental nature of existence probing topics such as insight illusion awakening transcendence renewal morality the temporal and the spiritual Along the way Krishnamurti and Bohm explore a person s relationship to society and offer new insights on human thought death awakening self realization and the problem of the fragmented mind The Ending of Time also refers to the wrong turn humanity has taken a state that they argue can be corrected Though they insist that mankind can change fundamentally they warn that transformation requires going from one s narrow and particular interests toward the general and ultimately moving still deeper into that purity of compassion love and intelligence that originates beyond thought time and even emptiness This updated edition edited and revised in clear and engaging language includes a new introduction and a conversation previously published separately which examines The Future of Humanity Suffering Time: Philosophical, Kabbalistic, and Hasidic Reflections on Temporality Elliot R. Wolfson, 2021-05-25 No one theory of time is pursued in these essays but a major theme that threads them together is Wolfson's signature idea of the timeswerve as a linear circularity or a circular linearity expressions that are meant to avoid the conventional split between the two temporal modalities of the line and the circle The conception of time elicited by Wolfson from a host of philosophical and mystical sources both Jewish and non Jewish buttresses the contention that it is precisely structural invariability that engenders interpretive variation This hermeneutical axiom is justified in turn by the presumption regarding the cadence of time as the constant return of what has always been what is yet to be The telling of time wells forth from the time of telling One cannot speak of the being of time consequently except from the standpoint of the time of being nor of the time of being except from the standpoint of the being Sculptum Est Prosa (Volume 2) Ivan Kireevskii,2018-11-07 This volume explores the range and uses of of time quotations echoes and allusions drawn from thousands of intertextual instances that Kireevskii has recognized in his work The principal interest of the echoes examined here lies in the revaluation of the poet and the theoretical issues his varied use of them suggests Through echoing Kireevskii embodies and explicates his assertions of continuity in human development his vision of interchange between the mind and nature As a poet he is a person who constantly experiences sees hears suspects hopes and dreams extraordinary things is struck by his own thoughts as if from outside or from above and below as if by his type of events and lightning bolts is perhaps a storm himself pregnant with new lightning and is a fatal person in whose

vicinity things are always rumbling growling gaping and acting in uncanny ways Listen very carefully because Kireevskii writes in a very symbolic form and unless you are very alert in reading his words you may miss all the implications The reason why he is so symbolic is that he is so full of new insights and he has so much he desires to share and to give As with a hermit's writings you can always hear something of the echo of the desert something of the whisper and the timid sideways glance of solitude a concealed philosophy where every opinion is also a hiding place every word is also a mask Panpsychism Hyman M. Schipper, 2021-09-24 From a scientific and philosophical point of view there is arguably no phenomenon as intractable as the origin and nature of consciousness This volume provides a comprehensive account of the Kabbalistic understanding of consciousness adduced from ancient Jewish mystical texts and the writings of key sixteenth twentieth century Kabbalistic and Chassidic luminaries Consciousness Prem Saran Satsangi, Stuart Hameroff, Vishal Sahni, Pami Dua, 2016-01-01 This unique volume brings together eastern and western perspectives on consciousness with essays from philosophers and scientists which emphasize different aspects of the integration The overarching aim of this book is to provide direction toward integrating Eastern philosophical and religious practice with philosophies and science of Western culture an aim that could be pivotal in understanding consciousness and its place in nature A unifying approach is adopted to the study of consciousness integrating the wisdom of the sages of the east and the scientists of the west and the stupendous east west integration that has been achieved is indeed a milestone The book will appeal to the rapidly growing mass of scientists and students in this upcoming field both in the east and west as well as the general inquisitive reader Courses in consciousness studies are being promoted in leading Universities all over the world It will also interest the followers and adherents of Eastern Philosophy of Saints and Radhasoami Faith numbering in a few millions around the globe

The Electromagnetic Brain Shelli Renée Joye, 2020-10-27 An exploration of cutting edge theories on the electromagnetic basis of consciousness Details in nontechnical terms 12 credible theories each published by prominent professionals with extensive scientific credentials that describe how electromagnetic fields may be the basis for consciousness Examines practical applications of electromagnetic consciousness theory including the use of contemporary brain stimulation devices to modify and enhance consciousness Explores the work of William K hler Susan Pockett Johnjoe McFadden Rupert Sheldrake Ervin Laszlo William Tiller Harold Saxton Burr Sir Roger Penrose Stuart Hameroff Mari Jibu Kunio Yasue Karl Pribram Alfred North Whitehead and James Clerk Maxwell as well as the author's own theories In this scientific exploration of the origin of consciousness Shelli Ren e Joye Ph D explores 12 credible theories each published by prominent professionals with extensive scientific credentials that describe how electricity in the form of electromagnetic fields is the living consciousness that runs through the brain Each of these theories supports the idea that the electromagnetic field itself is the basis of consciousness and that this source of consciousness peers out into the space time universe through our human sensory systems flowing with awareness throughout the bloodstream and nervous system Following her exploration of electromagnetic consciousness theories Joye then examines practical applications describing how electric fields might be manipulated and controlled to modify and enhance the operation of consciousness in the human brain She explores the use of contemporary brain stimulation devices that offer benefits such as decreased addiction cravings and anxiety reduced depression and chronic pain enhanced mathematical abilities accelerated learning and greater insight during mindfulness meditation Revealing the cutting edge of consciousness studies Joye shows that consciousness is not an isolated function of the individual brain but is connected to the larger electromagnetic field that not only encompasses the entire physical universe but also is deeply involved in the creation of matter and the material world Is It Time to Let Meritocracy Go? Nadira Talib, 2020-06-03 Despite meritocratic claims of equal opportunity official statistics released by the Ministry of Education Singapore reveal that a large segment of the Malay population has sustained the lowest academic achievement from 1987 to 2011 This statistical representation raises the possibility of a politically induced systemic

inequality as a point of investigation To investigate this seeming contradiction between the rhetoric and practice of equal educational opportunity Nadira Talib analyses education policies by drawing on a synthesis of philosophical perspectives and critical discourse analysis as a way of making explicit how the historical constitution of the learner is linked to the legitimisation of inequitable education policies that favour corporatist practices By making explicit how the underlying assumption of the policy logic that increasing expenditure on talents must necessarily involve the increasing welfare of everybody is both unsubstantiated and arbitrary the book presents a moral political problem in demonstrating how education policies are unfounded and unsupported through the idea of meritocracy Aesthetics without Objects and Subjects Nicola Perullo, 2025-02-06 Is there a connection between the environmental climate and political crises facing us today and Western dualism By critically examining the subject object dualism that has supported Western philosophy and aesthetics since the 17th century Nicola Perullo presents a relational and co operative account of aesthetic experience and human existence Exploring science ontology and aesthetics through the perspectives of quantum physics relational interpretation and non dualistic philosophies Perullo draws on Western theories in anthropology and cultural traditions such as Buddhism and Daoism We see how the ontology supported by dualism renders the world to consist of static solid and discrete things making them vulnerable to be controlled dominated and possessed In Perullo's ground breaking analysis an alternative way of perceiving is offered the haptic modality which is guided by cooperation communication and correspondence Such a mode of perception and experience is ecological precluding the possibility of domination hierarchy and exploitation This challenge to the ramifications of the subject object model the very cornerstone of Western thought is an exciting invitation to rethink the purpose of philosophizing and its impact on life Change Within, Change the World Jane Rigney Battenberg DCH MA,2018-09-18 Humanity and life on planet Earth are quickly approaching the make or break point and the generations who have long worked for change as well as today s courageous young people are frustrated by what passes for leadership Yet they are all too aware that the time for action is now Change Within Change the World offers the skills for manifesting a life saving world saving agenda by changing within and changing the world simultaneously Author Jane Battenberg shares inspirations and fresh ideas to support these skills and endeavors providing a brilliant comprehensive road map for bringing hope and stability to our chaotic world And after first learning about how we have arrived at this tipping point in our world you are invited not just to work but to play as you look within for the power the passion and the wisdom to transform yourself and the world both inside and out Psychotherapy in India Geetha Desai, Vinay Kumar, Pratap Sharan, Salman Upgrading Physics Education to Meet the Needs of Society Maurício Pietrocola, 2019-02-19 Akhtar,2024-01-12 Nations around the globe consider physics education an important tool of economic and social development and currently advocate the use of innovative strategies to prepare students for knowledge and skills acquisition Particularly in the last decade a series of revisions were made to physics curricula in an attempt to cope with the changing needs and expectations

of society Educational transformation is a major challenge due to educational systems resistance to change Updated curriculum content pedagogical facilities for example computers in a school new teaching and learning strategies and the prejudice against girls in physics classes are all issues that have to be addressed Educational research provides a way to build schemas and resources to promote changes in physics education This volume presents physics teaching and learning research connected with the main educational scenarios Star Wars and Philosophy Strikes Back Jason T. Eberl, Kevin S. Decker, 2023-01-05 Should droids be free Should clone troopers What political and ethical ideas ground resistance and rebellion What's wrong with the way women are portrayed in Star Wars Does Han Solo have a philosophical worldview Was Galen Erso responsible for the destruction of Alderaan Should you eat Baby Yoda This is the Way In Star Wars and Philosophy Strikes Back the Way wends through entirely new adventures in the Star Wars galaxy far far away not only the films of the Skywalker saga but also Rebels The Bad Batch Rogue One Solo and The Mandalorian Like the creators of these films and television series the authors in this book harness the magical mix of humor action empathy characterization adventure and fan service that constitutes Star Wars In addition to thorny metaphysical questions about the nature of time and free will this volume highlights the staggering cultural impact of George Lucas s universe The newest Star Wars narratives tackle ethnicity on alien worlds and how love and sex with a droid like L3 37 would work It works The connections between the Separatist Freedom Movement and the struggle for social justice in the USA in the 21st century are brought to light And philosophical second looks at Rian Johnson's The Last Jedi prove there is much more to this controversial entry in the Skywalker saga Thirty six philosophers both sages and scoundrels among them examine the full range of deep questions throughout the Star Wars chronology from The Phantom Menace to The Rise of Skywalker and beyond They have spoken

Comparative Modernism and Poetics of Time Özen Nergis Dolcerocca, 2023-10-05 This book explores the conceptualization of time in early twentieth century literature and thought based on a transnational and translational model of literary history focusing on Turkish French and German literary traditions Each from different cultural backgrounds these modernists provide a radical critique of modern time regimes which calibrate time in singular temporal narratives The book traces the philosophical strand of this critical chronometry from Henri Bergson s theory of time through Walter Benjamin s ambivalence towards decay of tradition and finally to A H Tanp nar and Robert Walser's modernist fiction Negotiating regionally marked concepts and topoi of temporality it discusses networks of cultural circulations and maps a revised intersection of Turkish and Western European literary histories It is an essential read for scholars and students of comparative and world literature modernist studies and cultural history

The School of Doubt Orazio
Cappello,2019-03-14 The School of Doubt conducts a close philological and philosophical reading of Cicero's Academica a fragmentary work on sense perception and Academic history written in the wake of Caesar's victory in the civil wars 45 BCE Focusing in turn on the author's letters discussing the process of composition the historiographical treatment of the Platonic

tradition and the critical exploration of philosophical doubt this volume presents Cicero as an original and sophisticated historian of philosophy and a radical figure in Western skeptical thought Widely misconstrued as a technical treatise and a mere chronicle of the Greek debates on which it draws the Academica here emerges as a key work in the evolution of Ciceronian philosophy and of ancient skepticism and one that responds directly to the disintegration of Republican Rome A Universal and Critical Dictionary of the English Language Joseph Emerson Worcester, 1849 The Open court, 1898
