three universal tax issues namely valuation timing and the taxation of unrealized gains As a common principle interest income and capital gains are treated more similarly in corporate taxation than in individual taxation Moreover the taxation of financial instruments is currently in a turn around phase in several countries not least because of the implementation of the IFRS rules in accounting and the related fair value principle The obligation to use fair values in accounting apparently motivates tax legislators to strive to use the same principles in taxation as well The comparative method plays a major role in this study by examining the tax legislations and the tax practices of different countries An in depth analysis of the similarities and differences of tax laws and practices in the United States the United Kingdom Germany Finland and Sweden is provided This is of particular interest as the underlying components single and often specified financial derivatives are basically identical While this study does not deal with individual tax treaties or bilateral transactions the OECD Model is scrutinized in order to highlight the underlying principles of the given recommendations especially with respect to interest income and capital gains Due to the increasing importance of IFRS rules in accounting the study is not limited to tax law but also looks at issues from the perspective of finance accounting and economics

Understanding Energy Security in Central and Eastern Europe Wojciech Ostrowski, Eamonn Butler, 2018-04-09 The purpose of this book is to move beyond the approach which views energy as a purely geopolitical tool of the Russian state and assumes a one size fits all approach to energy security in Central and Eastern Europe CEE It argues that in order to fully understand Russian involvement in the regional energy complex the CEE Russian energy relationship should be analysed in the context of the political and economic transitions that Russia and the CEE states underwent The chapters on individual countries in the book demonstrate that although Russia has and will continue to play a substantial role in the CEE energy sector the scope of its possible influence has been overstated
