The Event Literature And Theory:

The Event Ilai Rowner, 2015 What is an event From a philosophical perspective events are irregular occurrences moments of change and interruption categorized by human perception language and thought While philosophers have pored over the subject of events extensively in recent years The Event Literature and Theory seeks to ground it What is literature s approach to the event How does literature produce and give testimony to events Ilai Rowner s study not only revisits some of the most important thinkers of our time including Maurice Blanchot Gilles Deleuze Jacques Derrida and Martin Heidegger it also develops a critical approach to literature that questions the meaning of the literary event through examinations of literary works by Marcel Proust Louis Ferdinand Celine and T S Eliot Rowner offers a new method of thinking about the particular characteristics of the event within literary works and defines the creative value of literature as the aspiration toward the un happening within the happening In this study the experience of literature as an act of both writing and reading becomes the struggle to capture the excessive movement of the event while also revealing the creative energy within that work of literature

The Event of Literature Terry Eagleton, 2012-05-29 In this characteristically concise witty and lucid book Terry Eagleton turns his attention to the questions we should ask about literature but rarely do What is literature Can we even speak of literature at all What do different literary theories tell us about what texts mean and do In throwing new light on these and other questions he has raised in previous best sellers Eagleton offers a new theory of what we mean by literature He also shows what it is that a great many different literary theories have in common In a highly unusual combination of critical theory and analytic philosophy the author sees all literary work from novels to poems as a strategy to contain a reality that seeks to thwart that containment and in doing so throws up new problems that the work tries to resolve The event of literature Eagleton argues consists in this continual transformative encounter unique and endlessly repeatable Freewheeling through centuries of critical ideas he sheds light on the place of literature in our culture and in doing so reaffirms the value and validity of literary thought today

Deleuze's Literary Theory Catarina Pombo Nabais, 2020-08-10 Literature holds a privileged place in Deleuze s works Not only is it the art that most clearly reveals his aesthetics but it also serves as the laboratory of his thought the space where he experiments with concepts that become part of his ongoing philosophical project In this brilliant analyses of Deleuze s texts on Proust Sacher Masoch Kafka Carmelo Bene Melville and Beckett Pombo Nabais traces the development of Deleuze s aesthetics across three distinct periods of his thought the transcendental empiricism of Difference and Repetition and The Logic of Sense the philosophy of Nature of Anti Oedipus and A Thousand Plateaus and the philosophy of Spirit of The Fold What Is Philosophy and Essays Critical and Clinical More than a simple account of Deleuze s literary theory and aesthetics this book offers a provocative and original reading of Deleuze s entire philosophy highlighting the question of modality the actual the virtual the possible the impossible and the impossible the problematic relationship between the event and the assemblage and the unifying theme of the vitalism of

Aquilina, 2014-09-16 The Event of Style in Literature brings discussions about the question of style up to date by schematising the principal issues relating to the topic through a critical overview of the canon of style studies It reads the work of Jacques Derrida Maurice Blanchot and Hans Georg Gadamer as groundbreaking and eventful interventions Affect Theory and Literary Critical Practice Stephen Ahern, 2018-12-31 Affect Theory and Literary Critical Practice develops new approaches to reading literature that are informed by the insights of scholars working in affect studies across many disciplines with essays that consider works of fiction drama poetry and memoir ranging from the medieval to the postmodern While building readings of representative texts contributors reflect on the value of affect theory to literary critical practice asking what explanatory power is affect theory affording me here as a critic what can the insights of the theory help me do with a text Contributors work to incorporate lines of theory not always read together accounting for the affective intensities that circulate through texts and readers and tracing the operations of affectively charged social scripts Drawing variously on queer feminist and critical race theory and informed by ecocritical and new materialist sensibilities essays in the volume share a critical practice founded in an ethics of relation and contribute to an emerging postcritical moment Stressful Life Event Theory and Research Bernard L. international politics Running through all these attempts is a persistent yet unquestioned quest by theorists to develop strategies to eliminate or reduce the antinomies contradictions paradoxes dilemmas and inconsistencies dogging their approaches A serious critical assessment of the logic behind these strategies is however lacking This new work addresses this issue by seeking to reformulate IR theory in an original way Arfi begins by providing a thorough critique of leading contemporary IR theories including pragmatism critical scientific realism rationalism neo liberal institutionalism and social constructivism and then moves on to strengthen and go beyond the valuable contributions of each approach by employing the logic of deconstruction pioneered by Derrida to explicate the consequences of taking into account the dilemmas and inconsistencies of these theories The book demonstrates that the logic of deconstruction is resourceful and rigorous in its questioning of the presuppositions of prevailing IR approaches and argues that relying on deconstruction leads to richer and more powerfully insightful pluralist IR theories and is an invaluable resource for taking IR theory beyond currently paralyzing wars of paradigms Questioning universally accepted presuppositions in existing theories this book provides an innovative and exciting contribution to the field and will be of great interest to scholars of international relations theory critical theory and international relations

Event Theory for a Sociology of Practice Frank

Hillebrandt, 2025-05-22 The sociological theory of practices developed in this book from the concept of the event compels us to question how practices not only chain into forms of practice The approach also allows us to see how these practices give rise to practice formations that manifest as enduring zones of intensity within society This very problem is at the center of the considerations pursued here and is unfolded through an analysis of pop music as a formation of practice As an exemplary case study the author chooses the Love and Peace Festival on Fehmarn from the year 1970 In doing so the book brings to life a period of pop music that has much more to do with our present than it may seem at first glance *Between Form and*

Event: Machiavelli's Theory of Political Freedom M. Vatter, 2013-04-17 Before Machiavelli political freedom was approached as a problem of the best distribution of the functions of ruler and ruled Machiavelli changed the terms of freedom requiring that its discourse address the demand for no rule or non domination Political freedom would then develop only through a strategy of antagonism to every form of legitimate domination This leads to the emergence of modern political life any institution that wishes to rule legitimately must simultaneously be inscribed with its immanent critique and imminent subversion For Machiavelli the possibility of instituting the political form is conditioned by the possibility of changing it in an event of political revolution This book shows Machiavelli as a philosopher of the modern condition For him politics exists in the absence of those absolute moral standards that are called upon to legitimate the domination of man over man If this understanding lies open to relativism and historicism it does so in order to render effective the project of reinventing the sense of human freedom Machiavelli's legacy to modernity is the recognition of an irreconcilable tension between the demands of freedom and the imperatives of morality *Situation Theory and Its Applications: Volume 3* Robin Cooper, Peter

Aczel, Kuniaki Mukai, John Perry, 1990 Situation theory is the result of an interdisciplinary effort to create a full fledged theory of information Created by scholars and scientists from cognitive science computer science and AI linguistics logic philosophy and mathematics it aims to provide a common set of tools for the analysis of phenomena from all these fields Unlike Shannon Weaver type theories of information which are purely quantitative theories situation theory aims at providing tools for the analysis of the specific content of a situation signal message data base statement or other information carrying situation The question addressed is not how much information is carried but what information is carried **Event Communication**

Barbara Mazza, 2024-02-02 Focuses attention on communication studies as applied to Event Management through the whole event management process It pays particular attention to the latest technological innovations with the event industry including virtual events and digital technologies Ten Lectures on Event Structure in a Network Theory of Language

Nikolas Gisborne, 2020-08-31 In *Ten Lectures on Event Structure in a Network Theory of Language* Nikolas Gisborne explores verb meaning He discusses theories of events and how a network model of language in the mind should be theorized what the lexicon is how to probe word meaning evidence for structure in word meaning polysemy the lexical semantics of

causation a type hierarchy of events and event types cross linguistically He also looks at the relationship between different classes of events or event types and aktionsarten transitivity alternations and argument linking Gisborne argues that the social and cognitive embedding of language requires a view of linguistic structure as a network where even the analysis of verb meaning can require an understanding of the role of speaker and hearer Game Theory Michael Maschler, Shmuel Zamir, Eilon Solan, 2020-06-25 This new edition is unparalleled in breadth of coverage thoroughness of technical explanations and number of worked examples **Modern European Criticism and Theory** Julian Wolfreys, 2006-04-21 Modern European Criticism and Theory offers the reader a comprehensive critical overview of the widespread and profound contest of ideas within European theory The book focuses primarily on the thought of major voices in poetics philosophy linguistics and psychoanalysis as well as in literary and cultural studies from the Enlightenment to the present day Examining how conceptions of subjectivity identity and gender have been questioned the more than 50 essays written by acknowledged experts in their fields critically assess the ways in which we think see and act in the world as well as the ways in which we represent such thought psychologically politically and culturally A further reading list accompanies each chapter *Subject of the Event* Sebastian Huber, 2017-11-30 What does falling in love have in common with the fall of the Berlin Wall Or the fall of the Twin Towers In the light of postmodernism s programmatic critique of a humanist notion of the subject and an emphatic understanding of events Subject of the Event shows that selected American novels after 2000 offer an alternative to the death of the subject As the first book to comprehensively engage with Alain Badiou s writings outside of a philosophical context Subject of the Event analyzes five critically acclaimed novels of the new millennium Cormac McCarthy s *The Road* 2006 Jess Walter s *The Zero* 2006 Mark Z Danielewski s *Only Revolutions* 2006 Paul Beatty s *Slumberland* 2008 and Thomas Pynchon s *Against the Day* 2006 and argues that they create different subjects of the event that are empowered with reagency The subject of the event and its empowerment what this book calls reagency implies that subjects only evolve out of their confrontation with the revolutionary impetus that events propel Unlike a humanist capability of having agency reagency is defined as a repetitive subjective praxis that is contingent upon events which is given a concrete literary form in the novels under investigation Sebastian Huber explores how the American penchant for events new beginnings clean slates apocalypse is being critically dealt with in the novels at hand while still offering an emphatic idea of singular disruptions that open up ways for subjects to affirm and become empowered by the new propositions of these happenings
