The Expected Outcome Model Of Two Player Games Bruce Abramson:

The Expected-Outcome Model of Two-Player Games Bruce Abramson, 2014-07-10 The Expected Outcome Model of Two Player Games deals with the expected outcome model of two player games in which the relative merit of game tree nodes rather than board positions is considered The ambiguity of static evaluation and the problems it generates in the search system are examined and the development of a domain independent static evaluator is described Comprised of eight chapters this book begins with an overview of the rationale for the mathematical study of games followed by a discussion on some previous artificial intelligence AI research efforts on game trees The next section opens with the definition of a node's expected outcome value as the expected value of the leaves beneath it The expected outcome model is outlined paying particular attention to the expected outcome value of a game tree node This model was implemented on some small versions of tic tac toe and Othello The book also presents results that offer strong support for both the validity of the expected outcome model and the rationality of its underlying assumptions This monograph is intended for specialists in AI and computer science AI for Games, Third Edition Ian Millington, 2019-03-18 AI is an integral part of every video game This book helps professionals keep up with the constantly evolving technological advances in the fast growing game industry and equips students with up to date information they need to jumpstart their careers This revised and updated Third Edition includes new techniques algorithms data structures and representations needed to create powerful AI in games Key Features A comprehensive professional tutorial and reference to implement true AI in games Includes new exercises so readers can test their comprehension and understanding of the concepts and practices presented Revised and updated to cover new techniques and advances in AI Walks the reader through the entire game AI development process *Advanced Topics in Artificial Intelligence* Norman Foo, 2007-12-07 The 12th Australian Joint Conference on Artificial Intelligence AI QQ held in Sydney Australia 6-10 December 1999 is the latest in a series of annual regional meetings at which advances in artificial intelligence are reported This series now attracts many international papers and indeed the constitution of the program committee reflects this geographical diversity Besides the usual tutorials and workshops this year the conference included a companion symposium at which papers on industrial applications were presented The symposium papers have been published in a separate volume edited by Eric Tsui Ar99 is organized by the University of New South Wales and sponsored by the Australian Computer Society the Commonwealth Scientific and Industrial Research Organisation CSIRO Computer Sciences Corporation the KRRU group at Griffith University the Australian Artificial Intelligence Institute and Neuron Works Ltd Ar99 received over 120 conference paper submissions of which about a third were from outside Australia From these 39 were accepted for regular presentation and a further 15 for poster display These proceedings contain the full regular papers and extended summaries of the poster papers All papers were refereed mostly by two or three reviewers selected by members of the program committee and a list of these reviewers appears later The technical program comprised two days of

workshops and tutorials followed by three days of conference and symposium plenary and paper sessions **Parallelism and Programming in Classifier Systems** Stephanie Forrest,1991 By Stephanie Forrest *Advanced Topics in Artificial Intelligence* ,1999 IJCAI ,2001 Proceedings of the ...
