## **The Discovery Of Slowness:**

**The Discovery of Slowness** Sten Nadolny, 1997-06-01 In *The Discovery of Slowness* German novelist Sten Nadolny recounts the life of the nineteenth century British explorer Sir John Franklin 1786 1847 The reader follows Franklin's development from awkward schoolboy and ridiculed teenager to expedition leader governor of Tasmania and icon of adventure Everyone with whom he came into contact sensed that he was a rare man one who was out of his time and who moved to a different grander beat That beat eventually led Franklin to sail once more on his final fateful voyage into the Arctic in search of the Northwest Passage *The Discovery of Slowness* is both a riveting account of a remarkable and varied life and a profound and thought provoking meditation on time *The discovery of slowness* Sten Nadolny, 1987 **THE DISCOVERY OF SLOWNESS: A NOVEL. TRANS. BY RALPH FREEDMAN.** Sten Nadolny, 1987 **On Slowness** Lutz Koepnick, 2014-10-07 Speed is an obvious facet of contemporary society whereas slowness has often been dismissed as conservative and antimodern Challenging a long tradition of thought Lutz Koepnick instead proposes to understand slowness as a strategy of the contemporary a decidedly modern practice that gazes firmly at and into the present's velocity As he engages with late twentieth and early twenty first century art photography video film and literature Koepnick explores slowness as a critical medium to intensify our temporal and spatial experiences *Slowness* helps us register the multiple layers of time history and motion that constitute our present It offers a timely and untimely mode of aesthetic perception and representation that emphasizes the openness of the future and undermines any conception of the present as a mere replay of the past Discussing the photography and art of Janet Cardiff Olafur Eliasson Hiroshi Sugimoto and Michael Wesely the films of Peter Weir and Tom Tykwer the video installations of Douglas Gordon Willie Doherty and Bill Viola and the fiction of Don DeLillo Koepnick shows how slowness can carve out spaces within processes of acceleration that allow us to reflect on alternate temporalities and durations **Understanding Media and Society in the Age of Digitalisation** Dennis Nguyen, Ivonne Dekker, Sergül Nguyen, 2020-06-27 This book provides a selection of international perspectives in the interdisciplinary field of media and communications research with emphasis placed on methodological approaches and new research domains It includes critical reflections on how to conduct research on digital media culture especially concerning the potentials and limitations for mixed methods research and online research strategies as well as a series of hands on case studies These range from digital fan cultures through environmental communication news media digital politics during conflicts and crises to digital media psychology and the emerging field of medical humanities Diverse in its examples and angles the book provides a rich snippet of how media research practices are determined by practical factors and research interests *Optics of Semiconductors and Their Nanostructures* Heinz Kalt, Michael Hetterich, 2013-04-09 In recent years the field of semiconductor optics has been pushed to several extremes The size of semiconductor structures has shrunk to dimensions of a few nanometers the semiconductor light interaction is studied on timescales as fast as a few femtoseconds

and transport properties on a length scale far below the wavelength of light have been revealed These advances were driven by rapid improvements in both semiconductor and optical technologies and were further facilitated by progress in the theoretical description of optical excitations in semiconductors This book written by leading experts in the field provides an up to date introduction to the optics of semiconductors and their nanostructures so as to help the reader understand these exciting new developments It also discusses recently established applications such as blue light emitters as well as the quest for future applications in areas such as spintronics quantum information processing and third generation solar cells

*RISINGTIDEFALLINGSTAR* Philip Hoare, 2018-04-02 Every day is an anxiety in my ways of getting to the water I've become so attuned to it so scared of it so in love with it that sometimes I can only think by the sea It is the only place I feel at home Many of us visit the sea Admire it Even profess to love it But very few of us live it Philip Hoare does He swims in the sea every day either off the coast of his native Southampton or his adopted Cape Cod He watches its daily and seasonal changes He collects and communes with the wrack both dead and never living that it throws up on the shingle He thinks with at through the sea All of which should prepare readers *RISINGTIDEFALLINGSTAR* is no ordinary book It mounts no straight ahead argument It hews to no single genre Instead like the sea itself it moves flows absorbs transforms In its pages we find passages of beautiful nature and travel writing lyrical memoir seams of American and English history and much more We find Thoreau and Melville Bowie and Byron John Waters and Virginia Woolf all linked through a certain refusal to be contained to be strictly defined an openness to discovery and change Running throughout is an air of elegy a reminder that the sea is an ending a repository of lost ships lost people lost ways of being It is where we came from for Hoare it is where he is going Every swim is a little death Hoare writes but it is also a reminder that you are alive Few books have ever made that knife's edge so palpable Read *RISINGTIDEFALLINGSTAR* Let it settle into the seabed of your soul You'll never forget it

Downtime Mark Goble, 2025-06-17 Slow motion has become perhaps the least special effect in film and media a stylistic technique for showing violence dream sequences and flashbacks or other experiences outside ordinary time We see so much slow motion on our screens today that we can look past its history and forget how rare it was before the 1960s when films such as *The Wild Bunch* *Bonnie and Clyde* and 2001 *A Space Odyssey* helped it explode in popularity at a moment of cultural change and social upheaval This ambitious book tells the story of slow motion tracing a broader fascination with the uneven speeds of modern life and our ability to comprehend them *Downtime* explores the history and aesthetics of slow motion from its origins in early film to its prominence today Mark Goble argues that the effect's sudden

visibility after 1968 registers experience of modernity as a period of perpetual acceleration that somehow makes even the smallest intervals of time feel endless Ranging across literature art and cinema including novels by William Faulkner Don DeLillo and W G Sebald as well as Robert Smithson's Spiral Jetty and Julie Dash's Daughters of the Dust he describes how writers and filmmakers depict the velocities and durations of contemporary life Goble reveals the twentieth century and its aftermath as figured in slow motion rushing past and deliriously delayed everything going fast and slow at once Downtime is about time and its technologies in an accelerated world that can advance only in slow motion *Angels of Grace* Anselm Gruen, Anselm Grün, 1998-11-14 From the Angel of Love to the Angel of Confidence this book enables one to embody and experience fifty spiritual qualities *The Multivillage-Metropolis Baton Rouge* Olaf Kühne, Corinna Jenal, 2020-12-23 The capital of Louisiana Baton Rouge has been the scene of fundamental changes in recent decades In the context of the tripole of petrochemistry Louisiana State University LSU and public administration especially of the state of Louisiana which has been fully developed since the end of the 1920s general processes such as the transition from modern to post modern spatial development mix with specific local and regional characteristics and logics also in dealing with spaces such as the eccentric location of the downtown area the limited influence of spatial planning The result is a social spatial formation of a multivillage metropolis The investigation of this multivillage metropolis follows a neopragmatic approach that triangulates different theories methods data and researcher perspectives Videos per App Laden Sie die Springer Nature More Media kostenlos herunter Abbildungen im Buch per App mit Handy oder Tablet scannen um Videos zu streamen **Worldviews, Science and Us** Carlos Gershenson, Diederik Aerts, Bruce Edmonds, 2007 Nell introduzione si legge Many chapters in this volume are derived from presentations given at the Philosophy and Complexity session of the Complexity Science and Society Conference held in Liverpool UK between September 11th and 14th 2005 **Critical Complexity** Rika Preiser, 2016-01-15 This book is a collection of all the single authored essays by Paul Cilliers published between 1990 2011 Being one of few authors who approached the study of complexity from a philosophical perspective the main themes in these papers explore Qualitative characterization of complexity and the normative implications of studying complex adaptive systems the philosophical and conceptual similarity to post structural approaches how any engagement with complexity leads to a critical engagement with how we do science and design interventions critical and normative implications for how to engage with complex socio political concerns in the world What makes this book unique is that it consolidates a body of work that is distributed over a wide range of academic journals Although his book Complexity and Postmodernism Routledge 1998 remains a cornerstone in the field of complexity studies Cilliers journal essays really explore the application of the theoretical concepts in more depth His ground breaking ideas conceptualized in these essays have served as a continual source of novelty and inspiration in the process of applying complexity thinking to other fields of study **The Medical Times and Gazette** ,1877 **The Ethics of Mobilities** Tore Sager, 2016-03-23 With this book the international academic discourse on

mobility is taken a step further through the intertwined perspectives of different social sciences engineering and the humanities The Ethics of Mobilities departs from the recent interest in social surveillance raised by the use of technology for the surveillance and control of mobility as well as for transport It widens this theme to encompass a broad scale of issues ranging from freedom and escape to social exclusion and control thus raising important questions of ethics identity and religion questions that are dealt with by a diverse yet structured range of chapters arranged around the themes of ethics and religion and freedom and control Through their variety and diversity of perspectives the chapters of this book offer a substantial interdisciplinary contribution to the socially and environmentally relevant discussion about what a technically and economically accelerating mobility does to life and how it might be transformed to sustain a more life enhancing future Ethics of Mobilities will excite not only international interest but will also appeal to scholars across a wide range of disciplines in fields as diverse as theology and engineering

*Events and Sustainability* Andrew Smith, Judith Mair, 2022-09-05 This book examines the links between events and sustainability with a particular focus on how festivals and events contribute to making places more inclusive resilient and sustainable Previous sustainability research in events often focused on reducing the negative environmental impacts with a corresponding lack of consideration of socio economic dimensions More recently research has begun to consider events in relation to a range of economic and social issues highlighting the growing importance of examining events through a critical lens This book adopts a critical and broader approach to event sustainability arguing that scholars should examine how events might contribute to sustainable development rather than merely exploring how individual events could be made more sustainable Accordingly the contributors to this edited book address how events might change attitudes and behaviours by promoting sustainable lifestyles communities and technologies Following a detailed introduction the book features 16 chapters written by scholars from across the world The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism

**Modern Theory of Anisotropic Elasticity and Applications** Julian J. Wu, Thomas Chi-tsai Ting, David M. Barnett, 1991-01-01 A selection of 26 original papers some of them substantially revised after the workshop discuss anisotropic elasticity and its applications in solid mechanics and applied mathematics Considering elastostatics elastodynamics and constitutive relations they discuss such topics as Green's function

**Worldviews, Science And Us: Philosophy And Complexity** Carlos Gershenson, Diederik Aerts, Bruce Edmonds, 2007-02-27 Scientific technological and cultural changes have always had an impact upon philosophy They can force a change in the way we perceive the world reveal new kinds of phenomena to be understood and provide new ways of understanding phenomena Complexity science immersed in a culture of information is having a diverse but particularly significant impact upon philosophy Previous ideas do not necessarily sit comfortably with the new paradigm resulting in new ideas or new interpretations of old ideas In this unprecedented interdisciplinary volume researchers from different backgrounds join efforts to update thinking upon

philosophical questions with developments in the scientific study of complex systems The contributions focus on a wide range of topics but share the common goal of increasing our understanding and improving our descriptions of our complex world This revolutionary debate includes contributions from leading experts as well as young researchers proposing fresh ideas

*The Spectral Arctic* Shane McCorristine, 2018-05-01 Visitors to the Arctic enter places that have been traditionally imagined as otherworldly This strangeness fascinated audiences in nineteenth century Britain when the idea of the heroic explorer voyaging through unmapped zones reached its zenith The Spectral Arctic re thinks our understanding of Arctic exploration by paying attention to the importance of dreams and ghosts in the quest for the Northwest Passage The narratives of Arctic exploration that we are all familiar with today are just the tip of the iceberg they disguise a great mass of mysterious and dimly lit stories beneath the surface In contrast to oft told tales of heroism and disaster this book reveals the hidden stories of dreaming and haunted explorers of frozen mummies of rescue balloons visits to Inuit shamans and of the entranced female clairvoyants who travelled to the Arctic in search of John Franklin s lost expedition Through new readings of archival documents exploration narratives and fictional texts these spectral stories reflect the complex ways that men and women actually thought about the far North in the past This revisionist historical account allows us to make sense of current cultural and political concerns in the Canadian Arctic about the location of Franklin s ships

*Sloganization in Language Education Discourse* Barbara Schmenk, Stephan Breidbach, Lutz Küster, 2018-11-01 This volume focuses self critically on sloganization as an emergent phenomenon in language education discourse Motivated by an increasing uneasiness with a number of widespread concepts in current language education research that have become sloganized this volume comprises a collection of chapters by international scholars that scrutinize the discourse of language education identify popular slogans and reconstruct the sloganization processes It promotes critical self reflection of scholars and professionals in the field of language education a field that has widely been dominated by the need to develop innovative approaches and practices at the expense of self critical work that attempts to situate the field and its approaches within wider historical cultural and conceptual contexts
