The Gate Part 1 Of The Hinterlands Series:

Roman and Medieval Exeter and their Hinterlands Stephen Rippon, Neil Holbrook, 2021-03-23 This first volume presenting research carried out through the Exeter A Place in Time project provides a synthesis of the development of Exeter within its local regional national and international hinterlands Exeter began life in c AD 55 as one of the most important legionary bases within early Roman Britain and for two brief periods in the early and late 60s AD Exeter was a critical centre of Roman power within the new province When the legion moved to Wales the fortress was converted into the civitas capital for the Dumnonii Its development as a town was however relatively slow reflecting the gradual pace at which the region as a whole adapted to being part of the Roman world The only evidence we have for occupation within Exeter between the 5th and 8th centuries is for a church in what was later to become the Cathedral Close In the late 9th century however Exeter became a defended burh and this was followed by the revival of urban life Exeter's wealth was in part derived from its central role in the south west's tin industry and by the late 10th century Exeter was the fifth most productive mint in England Exeter's importance continued to grow as it became an episcopal and royal centre and excavations within Exeter have revealed important material culture assemblages that reflect its role as an international port **Social Science**

Enemies Within the Gates? William J. Chase, 2001-01-01 This compelling work of documentary history tells a story of idealism betrayed a story of how the Comintern Communist International an organization established by Lenin in 1919 to direct and assist revolutionary movements throughout the world participated in and was ultimately destroyed by the Stalinist repression in the late 1930s Presenting and drawing on recently declassified archival documents William J Chase analyses the Comintern's roles as agent instrument and victim of terror In both principle and practice the Comintern was an international organization with a staff that consisted primarily of Communist emigres who had fled dictatorial regimes in Europe and Asia It was however headquartered in Moscow and controlled by Soviet leaders This book examines the rise of suspicions and xenophobia among Soviet and Comintern leaders and cadres for whom many foreigners were no longer the heroes of the class struggle but rather possible enemy agents Some Comintern members internalised and acted on Stalin's theories about the infiltration of foreign spies into Soviet society supplying the Soviet police with information that led to the exile or execution of emigres Thousands of other emigres also became victims of the purges Together the text and documents of this book convey graphically the essential roles played by the Comintern providing a unique perspective on the era of Stalinist repression and terror

Institutional Challenges to Intermodal Transport and Logistics Jason Monios, 2016-05-23 While the operational realities of intermodal transport are relatively well known the institutional challenges are less well understood This book provides an overview of intermodal transport and logistics including the policy background emerging industry trends and academic approaches Establishing the three key features of intermodal transport geography as intermodal terminals inland logistics and hinterland corridors Jason Monios takes an institutional approach to understanding the difficulties of successful intermodal transport and logistics Key areas of investigation include the policy and planning background the roles of public and private stakeholders and the identification of emerging strategy conflicts Substantial empirical content situates the

theoretical and practical issues in real world examples via three detailed case study chapters covering the USA UK and Europe making the book useful to students as well as practitioners desiring an understanding of how intermodal transport and logistics work in practice The identified challenges to intermodal transport and logistics are used to demonstrate how competing port and inland strategies can inhibit the necessary processes of integration required to underpin successful intermodal transport The book concludes with a look at the future of institutional adaptation that may enhance the capacity of freight actors to engage with intermodal transport developments

Archaeology and the World of Jesus (Archaeology and the New Testament) David deSilva, 2025-11-11 A fundamental principle of biblical interpretation is the importance of context historical literary and canonical But an often neglected source of context for understanding Scripture is the field of archaeology The physical and cultural world we inhabit affects us deeply and that was no less true for the original writers and readers of Scripture Archaeology provides insights into important questions like What did these

believers see day to day What messages did they receive from their environment What social practices influenced them In the second of three planned volumes New Testament scholar David deSilva uses archaeological findings to explore places that provide important windows into Jesus s religious political and cultural environment This visually compelling and beautifully designed book contains over 250 full color photographs of sites and artifacts The author focuses on the fruits of archaeology pertaining to sites associated with Jesus s travels and ministry and their connections with specific Gospel texts This book helps readers visualize the early first century environment of Jesus his opponents and his followers This volume will be an important supplemental textbook for courses on the New Testament and for anyone who wants to better understand the lived context of Jesus and his audiences
