*God's Warriors* Nilay Saiya,2025-06-16 Religious violence remains an urgent problem for countries around the world Despite this scholars and analysts continue to struggle to understand the intersection of religion and violence and devise effective counterextremism policies *God's Warriors* offers a novel explanation for religious violence in the modern world challenging a common assumption that such violence stems primarily from embattled oppressed and marginalized religious minority groups who seek to assert their rights vis vis majorities Instead argues Nilay Saiya religious violence most commonly arises from dominant and privileged religious majorities When historically and culturally dominant faith traditions receive special treatment from the state in the form of social and legal privileges and rhetorical support from politicians extremists from these majoritarian communities are emboldened to target minorities The more states favor dominant religious communities and discriminate against minority ones the more majoritarian violence they produce This paradox of privilege results from a global crisis of political secularism afflicting much of the world today Drawing on examples from the world s major religious traditions Christianity Islam Hinduism Buddhism and Judaism Saiya s theory reshapes our understanding of the sources of religious violence in our era and carries important policy implications for decisionmakers

*Aztec Mythology* Matthew Fillard, The Aztec Empire one of the most powerful and complex civilizations of Mesoamerica was not only remarkable for its military conquests and grand architecture but also for its deeply spiritual and mythological worldview At the heart of Aztec society was a profound belief in the gods and the sacredness of ritual which governed everything from daily life to the empire s grandest ceremonies Aztec mythology rich with gods cosmic battles and creation stories shaped the culture and practices of this ancient civilization Understanding Aztec mythology is essential to understanding the values actions and worldview of the Aztec people as it provided the framework within which they interpreted their world and their place within it Aztec myths are not just stories of gods and heroes they are a reflection of the Aztec s relationship with the cosmos nature and each other These myths explained the origins of the world the cycles of life and the creation of humanity often with gods battling forces of chaos and death to establish order and balance The gods were not distant abstract figures they were seen as active forces in the world deeply involved in the lives of the people To the Aztecs the gods gave life and demanded nourishment in return This divine reciprocity was central to the practice of sacrifice both human and material which played a crucial role in maintaining the balance of the cosmos and ensuring the favor of the gods
