The Great Degeneration How Institutions Decay And Economies Die:

The Great Degeneration Niall Ferguson, 2013-06-13 From the bestselling author of *The Ascent of Money* and *The Square and the Tower* a searching and provocative examination of the widespread institutional rot that threatens our collective future What causes rich countries to lose their way Symptoms of decline are all around us today slowing growth crushing debts increasing inequality aging populations antisocial behavior But what exactly has gone wrong The answer Niall Ferguson argues in *The Great Degeneration* is that our institutions the intricate frameworks within which a society can flourish or fail are degenerating With characteristic verve and historical insight Ferguson analyzes the causes of this stagnation and its profound consequences for the future of the West *The Great Degeneration* is an incisive indictment of an era of negligence and complacency and to arrest the breakdown of our civilization Ferguson warns will take heroic leadership and radical reform

Germany and 'The West' Riccardo Bavaj, Martina Steber, 2017-06 The West is a central idea in German public discourse yet historians know surprisingly little about the evolution of the concept Contrary to common assumptions this volume argues that the German concept of the West was not born in the twentieth century but can be traced from a much earlier time In the nineteenth century the West became associated with notions of progress liberty civilization and modernity It signified the future through the opposition to antonyms such as Russia and the East and was deployed as a tool for forging German identities Examining the shifting meanings political uses and transnational circulations of the idea of the West sheds new light on German intellectual history from the post Napoleonic era to the Cold War

THE CULTURE WAR Hanne Nabintu Herland, 2017-09-21 *The Culture War* How the West lost its greatness and was weakened from within outlines how the West lost its values causing its current decline It is a forceful attack on the extreme liberal anti religious ideology which since the 1960 s has permeated the Western culture and weakened its very core The West is now characterized by strict elitist media censorship hedonism a culture of drug abuse abortion ethnic clashes and racial divide a destructive feminism and the dramatic breakdown of the family An ultra rich elite pushes our nations into a new authoritarian globalist structure with no respect for Western historical values Yet even in the darkest hour there is hope This manifesto outlines the remedy for the current malaise and describes the greatness of our traditional and religious values that once made our civilization prosper It shows how we can restore these values to bring back justice mercy faith honesty fidelity kindness and respect for one another Virtues that will motivate individuals to love one another the core of what will make us great again

The SAGE Handbook of Globalization Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their

expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming *Encyclopaedia of Global Studies* with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century **The end of populism**

Marcel H. Van Herpen, 2021-03-09 The populist wave which has submerged Europe and the United States in recent years seems unstoppable But is it The end of populism offers answers and proposes concrete solutions to confront the rise of illiberal democracy Drawing on extensive original sources this book refutes the populist claim that democracy is a demand side phenomenon and demonstrates that it is rather a supply side phenomenon Marcel H Van Herpen argues that one can have too much democracy and shows how methods of direct democracy such as popular initiatives referendums and open primaries which pretend to give the power back to the people have led to manipulation by populists and moneyed interests Populist attacks on the judiciary central banks the media and other independent agencies instead of strengthening democracy have rather undermined liberal democracy The author formulates twenty original and bold proposals to bridge the gap between the people and the elites fight corruption improve political party funding and initiate societal educational and macro economic reforms to increase economic equality and alleviate the insecurity of the citizens Elegantly written and clearly argued this is an essential book for understanding the populist phenomenon **Vulnerable** Colleen M.

Flood, Vanessa MacDonnell, Jane Philpott, Sophie Thériault, Sridhar Venkatapuram, 2020-07-14 The novel coronavirus SARS CoV 2 which causes the disease known as COVID 19 has infected people in 212 countries so far and on every continent except Antarctica Vast changes to our home lives social interactions government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time That is why a collaborative effort such as this edited multidisciplinary collection is needed This book confronts the vulnerabilities and interconnectedness

made visible by the pandemic and its consequences along with the legal ethical and policy responses These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march vulnerabilities exposed in our institutions governance and legal structures and vulnerabilities in other countries and at the global level where persistent injustices harm us all Hopefully COVID 19 will force us to deeply reflect on how we govern and our policy priorities to focus preparedness precaution and recovery to include all not just some

Published in English with some chapters in French **Analyzing Collapse** Miroslav Bárta, 2019-08-27 This book explores the long term trends in the development of what was the first complex civilization in history the Old Kingdom of Egypt c 2650 2200 BC the period that saw the construction of eternal monuments such as Djoser's Step Pyramid complex in Saqqara the pyramids of the great Fourth Dynasty kings in Giza and spectacular tombs of high officials throughout Egypt The present study aims to show that the historical trajectory of the period was marked by specific processes that characterize most of the world's civilizations the role of the ruling elite the growth of bureaucracy the proliferation of interest groups and adaptation to climate change to name but a few and the way that these processes held the germ of ultimate collapse The case is made that the rise and fall of the Old Kingdom state is of relevance to the study of the anatomy of development of any complex civilization

Deep Change and Emergent Structures in Global Society Andrea M. Maccarini, 2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences

of these societal trends focusing on self and character as well as on human fulfillment and the good life **Structured for Mission** Alan J. Roxburgh, 2015-06-05 The old structures of the church are broken But what should we do about it Some try to keep the structures in place by making small adaptations while others try to dispense with them altogether Alan Roxburgh calls us to see the underlying narratives that make structures necessary and to experiment with new ways of being the local church in a changing world Dollars, Polity and Law George M. Hall, 2014-07-24 Revamping the Political Economy after the Impending Collapse No country can borrow indefinitely without fatal consequences But that is just what the United States is doing adding nearly a trillion dollars annually to its already massive debt as overseen by a Congress with an approval rating in the 10 to 14 percent range In the process the mind set that spawned the sub prime mortgage now renders the entire economy sub prime This book explains why and how resolution might obtain after the collapse The essence is termed polity economics given that the bifurcated concepts of capitalism and socialism have lost their utility yet persist as incompatible political touchstones This perspective includes some twenty explicit elements all addressed at length Yet by itself it too will also eventually fail For it is also essential to restate the Constitution so that it becomes efficaciously aligned with the evolved culture and ethic of the United States especially to instill stability within the fiscal operations that have come to dominate the country The ABC s of that admittedly profound document simply do not address the D through Z s that have devolved over more than two centuries Excerpts On fiscal carrying capacity Isn t the United States simply too big to fail History laughs Every empire and nation has been laid waste when it continuously reached for more than it could grasp which leads to the primary argument in this book Every economy has a substantive need for just so much money and fungible assets a carrying capacity so to speak When that capacity is exceeded money becomes a commodity in its own right Given propensities to accumulate money and inflate values over a bread and butter baseline the economy degenerates in three successive tiers The first tier harbors the inevitable dis tensions of economics such as periodic business cycles and recessions Yet money remains a tool not the essence But if recessions are avoided money begins to compete with the substantive aspects of an economy This is the second tier where leveraged val ues inherently devolve unstable followed eventually by a depression Yet even de pres sion can be staved off by massive bailouts and unsustainable debt This is the third tier Money takes pri or ity over substance until that is the economy collapses On political versus supposed economic rights There may be free speech there is no free lunch *British Islam and English Law* Patrick S. Nash, 2022-01-27 British Islam and English Law presents a novel argument about the nature and place of groups in society The encounter with Islam has led English law to tread a line between two theoretical models liberal individualism and multiculturalism competing for dominance over the law of organised religion This philosophical rivalry has generated a set of seemingly intractable conflicts between individual and community religion and state nation and culture This book resurrects the long buried theory of classical pluralism to address and resolve these tensions Applying this to five understudied institutions that give structure and form to British

Islam banks charities schools elections clans it outlines and justifies the reforms that would optimise the relationship between law and religion Unflinching and unorthodox this book places law and theory in context employs innovative methods such as nudge theory and applied history and provides detailed answers to hard questions about British Islam *Knowledge Creation in Public Administrations* Ayano Hirose Nishihara, Masaei Matsunaga, Ikujiro Nonaka, Kiyotaka Yokomichi, 2017-09-28 This book presents a new paradigm of innovative governments in Asia at the municipal regional and national levels based on the knowledge creation theory in management and leading to organizational transformation and policy reform in public administration Focusing on Indonesia the Philippines Thailand Vietnam and Japan the book is based on the findings of a joint research project established to identify the factors that impact the effectiveness or performance of public administration by applying the knowledge based management theory that originates in private sectors to public sector management **Universities, Entrepreneurial Ecosystems, and Sustainability** Cristina Fernandes, Marcela Ramírez-Pasillas, João J. Ferreira, 2021-12-06 This volume presents theoretical and empirical research on universities and their entrepreneurial ecosystems to better grasp the connections between universities and their surrounding environments and their engagement with sustainability The book provides a better understanding of the entrepreneurial characteristics of universities It examines the ways in which universities collaboration and participation in an ecosystem support business and industry transformation It also investigates how universities function within the university industry government third sector relationship nexus The book enables the systematisation of the literature while simultaneously builds theory empirically testing existing theories and contributes towards a future research agenda geared towards sustainability The book gathers contributions from varied geographical contexts providing an international perspective **An Economic History of the United States** Mark V. Siegler, 2017-09-02 This pioneering textbook takes a thematic approach to the subject resulting in a comprehensive understanding of historic economic issues in the United States Siegler takes a thematic approach and provides both the theoretical foundations and historical background needed to gain an in depth understanding of the subject Every chapter examines a specific topic and the chapters are linked to each other to provide an overall view The chronological approach is represented with a useful timeline as an appendix to show where the specific topics fit in the chronology Chapter topics include long run causes of economic growth economic history of income and wealth inequality slavery segregation and discrimination immigration and immigration policies and an economic history of recessions and depressions This book is ideally suited as a primary text for undergraduate courses in US economic history as well as suitable courses on history degree programmes *Global Modernization Review: New Discoveries And Theories Revisited* Chuanqi He, Alberto Martinelli, 2015-02-11 Modernization has effected a profound change in human civilizations and is a global trend since the 18th century It includes not only the great change and transformation from traditional to modern politics economies societies and cultures but also all human development and protection of the natural environment Almost all

nations in the world are undergoing some kind of modernization consciously or unconsciously and the modernization drive can also be set as a national goal if they will The first International Modernization Forum Modernization and Global Change was held in Beijing in 2013 This volume emanating from invaluable discussions at the forum covers research on global modernization multiple modernities modernization theory modernization science modernization policy and world modernization indexes Global Modernization Review offers a collective understanding of the modernization phenomenon and provides invaluable guidance for further study and significant international and interdisciplinary cooperation for researches on modernization

The Triple Package Jed Rubenfeld, Amy Chua, 2014-02-05 Why do Jews win so many Nobel Prizes and Pulitzer Prizes Why are Mormons running the business and finance sectors Why do the children of even impoverished and poorly educated Chinese immigrants excel so remarkably at school It may be taboo to say it but some cultural groups starkly outperform others The bestselling husband and wife team Amy Chua author of *Battle Hymn of the Tiger Mother* and Jed Rubenfeld author of *The Interpretation of Murder* reveal the three essential components of success its hidden spurs inner dynamics and its potentially damaging costs showing how ultimately when properly understood and harnessed the Triple Package can put anyone on their chosen path to success

Morphogenesis and Human Flourishing Margaret S. Archer, 2017-03-29 This book the last volume in the Social Morphogenesis series examines whether or not a Morphogenic society can foster new modes of human relations that could exercise a form of relational steering protecting and promoting a nuanced version of the good life for all It analyses the way in which the intensification of morphogenesis and the diminishing of morphostasis impact upon human flourishing The book links intensified morphogenesis to promoting human flourishing based on the assumption that new opportunities open up novel experiences skills and modes of communication that appeal to talents previously lacking any outlet or recognition It proposes that equality of opportunity would increase as ascribed characteristics diminished in importance and it could be maintained as the notion of achievement continued to diversify Digitalization has opened the cultural archive for more to explore and as it expands exponentially so do new complementary compatibilities whose development foster yet further opportunities If more people can do more of what they do best these represent stepping stones towards the good life for more of them
