**The Low-Carbon Good Life** Jules Pretty, 2022-12-30 The Low Carbon Good Life is about how to reverse and repair four interlocking crises arising from modern material consumption: the climate crisis, growing inequality, biodiversity loss, and food-related ill health. Across the world today and throughout history, good lives are characterised by healthy food connections to nature, being active, togetherness, personal growth, a spiritual framework, and sustainable consumption. A low carbon good life offers opportunities to live in ways that will bring greater happiness and contentment. Slower ways of living await. A global target of no more than one tonne of carbon per person would allow the poorest to consume more and everyone to find our models of low carbon good lives. But dropping old habits is hard and large scale impacts will need fresh forms of public engagement and citizen action. Local to national governments need to act equally; they need pushing by the power and collective action of citizens. Innovative and engaging and written in a style that combines storytelling with scientific evidence, this book will be of great interest to students and scholars of climate change, sustainability, environmental economics, and sustainable consumption, as well as non-specialist readers concerned about the climate crisis.

**Leaves Falling Gently** Susan Bauer-Wu, 2025-05-27 Accessible meditations, reflections, and practical advice to help patients and their loved ones navigate the emotional landscape of serious illness. Dealing with chronic illness can be an isolating and challenging experience. Whether it's you or someone you love, it's common to struggle with feelings of fear, sadness, or anger as you navigate the uncertainty of a diagnosis. This revised expanded edition of *Leaves Falling Gently* empowers readers to embrace the present moment, find peace within themselves, and deepen interpersonal connections.
