The Harvester English Edition:

The Gardens of Adonis Marcel Detienne, 2021-10-12 Rich with implications for the history of sexuality gender issues and patterns of Hellenic literary imagining Marcel Detienne's landmark book recasts long standing ideas about the fertility myth of Adonis The author challenges Sir James Frazer's thesis that the vegetation god Adonis whose premature death was mourned by women and whose resurrection marked a joyous occasion represented the annual cycle of growth and decay in agriculture Using the analytic tools of structuralism Detienne shows instead that the festivals of Adonis depict a seductive but impotent and fruitless deity whose physical ineptitude led to his death in a boar hunt after which his body was found in a lettuce patch Contrasting the festivals of Adonis with the solemn ones dedicated to Demeter the goddess of grain he reveals the former as a parody and negation of the institution of marriage Detienne considers the short lived gardens that Athenian women planted in mockery for Adonis's festival and explores the function of such vegetal matter as spices mint myrrh cereal and wet plants in religious practice and in a wide selection of myths His inquiry exposes among many things attitudes toward sexual activities ranging from perverse acts to marital relations

The Structural Allegory John Fekete, 1984 The Structural Allegory was first published in 1984 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions The radical questions raised by Saussure Barthes Foucault Levi Strauss and others have had an enormous impact on Anglo American literary and cultural studies over the past twenty years John Fekete argues that we can see this strategic development of French thought in terms of what he calls the structural allegory Structuralism proper has given way to the currently dominant model of post structuralism yet we remain uncertain of the practical orientations favored by thinkers associated with both phases of the movement With the aim of uncovering the legacy of the structural tradition the essays in this volume survey key French thinkers including some not well known in the Anglo American context Baudrillard and Castoriadis The essays are reconstructive not deconstructive in character scholarly in method and ecumenical in spirit While the structural allegory emerges from this critical analysis as an inescapable intellectual paradigm analogous to the transformations in quantum physics and modern biology the authors argue that it merits admiration and reservation in equal measure

Children with a Star Deborah Dwork, 1991-01-01 The book is based on hundreds of oral histories conducted in Europe and North America with survivors who were children in the Holocaust primary documentation uncovered by the author including diaries letters photographs and family albums and archival records Drawing on these sources Dwork reveals the feeling daily activities and perceptions of Jewish children who lived and died in the shadow of Holocaust She reconstructs and analyzes the many different experiences the children faced In the early years of Nazi domination they lived at home increasingly oppressed by rising anti-Semitism Later some went into hiding while others attempted to live openly on gentile papers As time passed more and more were forced into transit camps ghettos and death and slave labour camps Although

nearly 90 percent of the Jewish children in Nazi Europe were murdered we learn in this history not of their deaths but of the circumstances of their lives *Explanation in the Sciences* Émile Meyerson, 2012-12-06 Emile Meyerson's writings on the philosophy of science are a rich source of ideas and information concerning many philosophical and historical aspects of the development of modern science. Meyerson's works are not widely read or cited today by philosophers or even philosophers of science in part because they have long been out of print and are often not available even in research libraries. There are additional *chevaux de frise* for all but the hardiest scholars. Meyerson's books are written in French and do not all exist in English versions and deal with the subject matter of science: ideas or concepts, laws or principles, theories and epistemological questions rather than today's more fashionable topics of the social matrix and external influences on science with the concomitant neglect of the intellectual content of science. Born in Lublin, Poland, in 1859, Meyerson received most of his education in Germany where he studied from the age of 12 to 23, preparing himself for a career in chemistry. He moved to Paris in 1882 where he began a career as an industrial chemist. Changing his profession, he then worked for a time as the foreign news editor of the HAVAS News Agency in Paris. In 1898 he joined the agency established by Edmond Rothschild that had as its purpose the settling of Jews in Palestine and became the Director of the Jewish Colonization Association for Europe and Asia Minor. These activities represent Meyerson's formal career. *Garden Magazine and Home Builder*, 1915

Linguistics and Psychoanalysis Thomas Paul Bonfiglio, 2023-02-20 This groundbreaking provocative book presents an overview of research at the disciplinary intersection of psychoanalysis and linguistics. Understanding that linguistic activity to a great extent takes place in unconscious cognition, Thomas Paul Bonfiglio systematically demonstrates how fundamental psychoanalytic mechanisms such as displacement, condensation, overdetermination, and repetition have been absent in the history of linguistic inquiry and explains how these mechanisms can illuminate the understanding of the grammatical structure, evolution, acquisition, and processing of language. Reexamining popular misunderstandings of psychoanalysis along the way, Bonfiglio further proposes a new theoretical configuration of language and expertly sets the future agenda on this subject with new conceptual paradigms for research and teaching. This will be an invaluable, fascinating resource for advanced students and scholars of theoretical and applied linguistics, the cognitive behavioral sciences, metaphor studies, humor studies, and play theory, anthropology, and beyond. *The Development of Social Knowledge* José Antonio Castorina, Alicia Barreiro, 2023-08-01 The result of a deep research work sustained for more than two decades, this book studies the construction of social knowledge from a constructivist perspective inherited from Piagetian thought. It thus advances in a process of revision and discussion while maintaining crucial aspects of this current for the approach to the construction of the subject and the object of knowledge in the search for the elaboration of an explanatory theory for the formation of new knowledge. A collaborative proposal between different disciplines of potential interest for the different actors who study and intervene in this field. **A Performer's Guide to Renaissance Music, Second Edition** Jeffery
