

Finding Angles in Regular Polygons

Section A

- Find the size of each interior angle in a regular hexagon.
- Find the size of each interior angle in a regular nonagon.
- Find the size of each exterior angle in a regular dodecagon.
- Write an expression for the sum of the interior angles in a polygon with n sides.
- Write an expression for the size of each interior angle in a polygon with n sides.
- Write an expression for the size of each exterior angle in a polygon with n sides.

Section B

Find the angles indicated. Each question contains one or more regular polygon.

Teacher's Activities Kit Judith A. Muschla, Gary Robert Muschla, 2000-04-12 For all math teachers in grades 6 12 this practical resource provides 130 detailed lessons with reproducible worksheets to help students understand geometry concepts and recognize and interpret geometry's relationship to the real world The lessons and worksheets are organized into seven sections each covering one major area of geometry and presented in an easy to follow format including title focusing on a specific topic skill learning objective special materials if any teaching notes with step by step directions answer key and reproducible student activity sheets Activities in sections 1 6 are presented in order of difficulty within each section while those in Part 7 A Potpourri of Geometry are open ended and may be used with most middle and high school classes Many activities throughout the book may be used with calculators and computers in line with the NCTM's recommendations

Introducing Nonroutine Math Problems to Secondary Learners Robert London, 2023-08-22 Offering secondary math educators an innovative holistic and process orientated approach for implementing nonroutine problems into their curriculum this book defines and establishes practical strategies to develop students problem solving skills The text focuses on the process skills necessary to solve nonroutine problems in mathematics and other subjects with the goal of making students better problem solvers both in and outside of the classroom Chapters present and define a curriculum of over 60 nonroutine problems in mathematics and other content areas and explore the pedagogy to implement this type of curriculum consistent with the NCTM Standards and Principles to Action Four different models of implementation are discussed alongside a structured approach through seven difficulty levels with examples to ensure that every student independent of their mastery of mathematics content can improve their ability to solve nonroutine problems It emphasizes to students how to transfer their problem solving skills to other real world areas including increasing ecological awareness appreciating diversity and addressing significant and meaningful problems in their life school and community The curriculum introduced

in this book can be included as a component of a traditional four year academic high school curriculum aligned with the Common Core Mathematical Practices or as part of a one year isolated required or elective mathematics course Based on extensive field testing this approach has been effective in both traditional mathematics courses and math electives such as a course in Problem Solving This book provides the necessary guidance to allow each mathematics teacher to effectively integrate the approach in their classrooms This book is ideal for secondary mathematics teachers of all levels as well as teachers of mathematics electives College Geometry with GeoGebra Barbara E. Reynolds,William E. Fenton,2021-01-20 From two authors who embrace technology in the classroom and value the role of collaborative learning comes College Geometry Using GeoGebra a book that is ideal for geometry courses for both mathematics and math education majors The book s discovery based approach guides students to explore geometric worlds through computer based activities enabling students to make observations develop conjectures and write mathematical proofs This unique textbook helps students understand the underlying concepts of geometry while learning to use GeoGebra software constructing various geometric figures and investigating their properties relationships and interactions The text allows students to gradually build upon their knowledge as they move from fundamental concepts of circle and triangle geometry to more advanced topics such as isometries and matrices symmetry in the plane and hyperbolic and projective geometry Emphasizing active collaborative learning the text contains numerous fully integrated computer lab activities that visualize difficult geometric concepts and facilitate both small group and whole class discussions Each chapter begins with engaging activities that draw students into the subject matter followed by detailed discussions that solidify the student conjectures made in the activities and exercises that test comprehension of the material Written to support students and instructors in active learning classrooms that incorporate computer technology College Geometry with GeoGebra is an ideal resource for geometry courses for both mathematics and math education majors Radical Constructivism in Action Leslie P. Steffe,Patrick W. Thompson,2002-11 Over the last twenty five years Ernst von Glasersfeld has had a tremendous impact on mathematics and science education through his fundamental insights into the nature of knowledge and knowing Radical Constructivism in Action is a new volume of papers honouring his work by building on his model of knowing The contributions by leading researchers present constructivism in action tying the authors actions regarding practical problems of mathematics and science education philosophy and sociology to their philosophical constraints giving meaning to constructivism operationally The book begins with a retrospective analogy between radical constructivism s emergence and changes in what is thought of as certain scientific knowledge It aims to increase understanding of constructivism and Glasersfeld s achievement and is vibrant evidence of the continued vitality of research in the constructivism tradition Catalog of Copyright Entries.
