Organizational Ethics and the Good Life Edwin Hartman,1996 In this book Edwin Hartman argues that the real world of experience rather than abstract theory is the source of principles for business ethics Hartman explains how ethical principles derive from what employees learn in good organizations and argues that an ethically good company is one that creates the good life for those who work in it An ethical organization has a good corporate culture which not only serves the interests of the participants but helps determine what those interests are and sees to it that they are compatible with both autonomy and good corporate citizenship In this way the individual develops a conception of the good life what is inappropriate to the moral person The influences on Hartmans thought include the Aristotelian tradition of refined common sense contemporary pragmatism recent work concerning collective action problems and social contract theory

Plato on Pleasure and the Good Life Daniel

Russell,2005-09-15 Daniel Russell examines Plato's subtle and insightful analysis of pleasure and explores its intimate connections with his discussions of value and human psychology. Russell offers a fresh perspective on how good things bear on happiness in Plato's ethics and shows that for Plato pleasure cannot determine happiness because pleasure lacks a direction of its own. Plato presents wisdom as a skill of living that determines happiness by directing one's life as a whole, bringing about goodness in all areas of one's life as a skill brings about order in its materials. The materials of the skill of living are in the first instance not things like money or health but one's attitudes, emotions, and desires, where things like money and health are concerned. Plato recognizes that these materials of the psyche are inchoate ethically speaking and in need of direction from wisdom. Among them is pleasure, which Plato treats not as a sensation but as an attitude with which one ascribes value to its object. However, Plato also views pleasure, once shaped and directed by wisdom, as a crucial part of a virtuous character as a whole. Consequently, Plato rejects all forms of hedonism, which allows happiness to be determined by a part of the psyche that does not direct one's life but is among the materials to be directed. At the same time, Plato is also able to hold both that virtue is sufficient for happiness and that pleasure is necessary for happiness, not as an addition to one's virtue but as a constituent of one's whole virtuous character itself. Plato therefore offers an illuminating role for pleasure in ethics and psychology, one to which we may be unaccustomed: pleasure emerges not as a sensation or even a mode of activity but as an attitude, one of the ways in which we construe our world and as such a central part of every character. **Modern**

European Borders in Fiction Andrew Hammond,2025-09-18 There are few features of the contemporary world more significant than national and regional borders. In modern Europe, the practices of human division have defined the continent from the early years of the Cold War to the present barriers of Fortress Europe, whose exposure of irregular migrants to trafficking, discrimination, and deportation is rarely absent from the daily news. *Modern European Borders in Fiction* offers a comprehensive study of literary responses to the topic. Through reference to over 600 novels and short stories, Andrew Hammond analyses the wide-ranging engagement of post-1945 novelists with the ideologies, processes, and effects of territorialisation, as well as the related issues of military conflict, migration, populism, nationalism, and regionalism. Among the topics under study are the ideological divisions of the Cold War, the closed societies of totalitarian communism, the labour migrations of the 1950s and 1960s, the tightening of border controls from the 1970s, the twenty-first century war on migration, the official restrictions on borderland communities, the conflicts in Bosnia, Georgia, and Ukraine, and the patterns of social segregation that have marked the continent from the Second World War to the present. Drawing on theoretical work in the social sciences and the humanities, this is a ground-breaking contribution to European literary studies, establishing the importance of continental border writing and opening up fresh avenues for decolonised teaching and research.
