that allows men to violate women's human rights with impunity Provocative and brilliantly argued Coercive Control reframes abuse as a liberty crime rather than a crime of assault and points the way to bringing real equality for women in line with their formal rights to personhood and citizenship freedom and safety

Dudevant, George Sand, 1886 **Letters of George Sand** George Sand, 1886 **Hospital Politics in Seventeenth-Century France** Tim McHugh, 2016-07-22 The seventeenth century witnessed profound reforms in the way French cities administered poor relief and charitable health care New hospitals were built to confine the able bodied and existing hospitals sheltering the sick poor contracted new medical staff and shifted their focus towards offering more medical services Whilst these moves have often been regarded as a coherent state led policy recent scholarship has begun to question this assumption and pick up on more localised concerns and resistance to centrally imposed policies This book engages with these concerns to investigate the links between charitable health care poor relief religion national politics and urban social order in seventeenth century France In so doing it revises our understanding of the roles played in these issues by the crown and social elites arguing that central government s social policy was conservative and largely reactive to pressure from local elites It suggests that Louis XIV s policy regarding the reform of poor relief and the creation of General Hospitals in each town and city as enshrined in the edict of 1662 was largely driven by the religious concerns of the kingdom s devout and the financial fears of the Parisian elites that their city hospitals were overburdened Only after the Sun King s reign did central government begin to take a proactive role in administering poor relief and health care utilizing urban charitable institutions to further its own political goals By reintegrating the social aspirations of urban elites into the history of French poor relief this book shows how the key role they played in the reform of hospitals inspired by a mix of religious economic and social motivations It concludes that the state could be a reluctant participant in reform until pressured into action by assisting elite groups pursuing their own goals
