How Grammar Links Concepts Friedrich Ungerer, 2017-07-26 The proposed framework of concept linking combines insights of construction grammar with those of traditional functional descriptions to explain particularly

challenging but often neglected areas of English grammar such as negation modality adverbials and non finite constructions To reach this goal the idea of a unified network of constructions is replaced by the triad of verb mediated constructions attribution and scope based perspectivizing each of them understood as a syntactically effective concept linking mechanism in its own right but involved in interfaces with the other mechanisms In addition concept linking supplies a novel approach to early child language It casts fresh light on widely accepted descriptions of early two word utterances and verb islands in usage based models of language acquisition and encourages a new view of children s mistakes Intended readership Constructionist and cognitive linguists linguists and psychologists interested in language acquisition teachers and students of English grammar and grammar in general
