**The Oxford Handbook of Science and Medicine in the Classical World** Paul Keyser, with John Scarborough, 2018-06-26 With a focus on science in the ancient societies of Greece and Rome including glimpses into Egypt Mesopotamia India and China The Oxford Handbook of Science and Medicine in the Classical World offers an in depth synthesis of science and medicine circa 650 BCE to 650 CE The Handbook comprises five sections each with a specific focus on ancient science and medicine The second section covers the early Greek era up through Plato and the mid fourth century bce The third section covers the long Hellenistic era from Aristotle through the end of the Roman Republic acknowledging that the political shift does not mark a sharp intellectual break The fourth section covers the Roman era from the late Republic through the transition to

Late Antiquity The final section covers the era of Late Antiquity including the early Byzantine centuries The Handbook provides through each of its approximately four dozen essays a synthesis and synopsis of the concepts and models of the various ancient natural sciences covering the early Greek era through the fall of the Roman Republic including essays that explore topics such as music theory ancient philosophers astrology and alchemy The Oxford Handbook of Science and Medicine in the Classical World guides the reader to further exploration of the concepts and models of the ancient sciences how they evolved and changed over time and how they relate to one another and to their antecedents There are a total of four dozen or so topical essays in the five sections each of which takes as its focus the primary texts explaining what is now known as well as indicating what future generations of scholars may come to know Contributors suggest the ranges of scholarly disagreements and have been free to advocate their own positions Readers are led into further literature both primary and secondary through the comprehensive and extensive bibliographies provided with each chapter

**The Language of Colour in the Bible** Lourdes García Ureña, Emanuela Valeriani, Anna Angelini, Carlos Santos Carretero, Marina Salvador Gimeno, 2022-04-19 The Bible is one of the books that has aroused the most interest throughout history to the present day However there is one topic that has mostly been neglected and which today constitutes one of the most emblematic elements of the visual culture in which we live immersed the language of colour Colour is present in the biblical text from its beginning to its end but it has hardly been studied and we appear to have forgotten that the detailed study of the colour terms in the Bible is essential to understanding the use and symbolism that the language of colour has acquired in the literature that has forged European culture and art The objective of the present study is to provide the modern reader with the meaning of colour terms of the lexical families related to the green tonality in order to determine whether they denote only color and if so what is the coloration expressed or whether together with the chromatic denotation another reality inseparable from colour underlies along with the chromatic denotation there is another underlying reality that is inseparable from colour We will study the symbolism that which underpins some of these colour terms and which European culture has inherited This lexicographical study requires a methodology that allows us to approach colour not in accordance with our modern and abstract concept of colour but with the concept of the ancient civilisations This is why the concept of colour that emerges from each of the versions of the Bible is studied and compared with that found in theoretical reflection in both Greek and Latin Colour thus emerges as a concrete reality visible on the surface of objects reflecting in many cases not an intrinsic quality but their state This concept has a reflection in the biblical languages since the terms of colour always describe an entity in this sense one can say that they are embodied and include within them a wide chromatic spectrum that is they are mostly polysemic Structuralism through the componential analysis although providing interesting contributions had at the same time serious shortcomings when it came to the study of colour These were addressed through the theoretical framework provided by cognitive linguistics and some of its tools such as cognitive domains metonymy and metaphor Our

study then is one of the first to apply some of the contributions of cognitive linguistics to lexicography in general and particularly with reference to the Hebrew Greek and Latin versions of the Bible A further novel contribution of this research is that the meaning is expressed through a definition and not through a list of possible colour terms as happens in dictionaries or in studies referring to colour in antiquity The definition allows us to delve deeper and discover new nuances that enrich the understanding of colour in the three great civilizations involved in our study Israel Greece and Rome

**Thinking in Cases** Markus Asper, 2020-01-20 Who is afraid of case literature In an influential article Thinking in Cases 1996 John Forrester made a case for studying case literature more seriously exemplifying his points mostly with casuistic traditions of law Unlike in modern literatures case collections make up a significant portion of ancient literary traditions such as Mesopotamian Greek and Chinese mostly in medical and forensic contexts The genre of cases however has usually not been studied in its own right by modern scholars Due to its pervasiveness case literature lends itself to comparative studies to which this volume intends to make a contribution While cases often present truly fascinating epistemic puzzles in addition they offer aesthetically pleasing reading experiences due to their narrative character Therefore the case understood as a knowledge transmitting narrative about particulars allows for both epistemic and aesthetic approaches This volume presents seven substantial studies of cases and case literature Topics touched upon are ancient Greek medical forensic philosophical and mathematical cases medical cases from imperial China and 20th century American medical case writing The collection hopes to offer a pilot of what to do with and how to think about cases *The Hidden Affliction* Simon Szreter, 2019 Multidisciplinary collection of essays on the relationship of infertility and the historic STIs gonorrhea chlamydia and syphilis producing surprising new insights in studies from across the globe and spanning millennia *Aristotle on the Matter of Form* Trott Adriel M. Trott, 2019-10-08 Adriel M Trott challenges the wholesale acceptance of the view that nature operates in Aristotle's work on a craft model which implies that matter has no power of its own Instead she argues for a robust sense of matter in Aristotle in response to feminist critiques She finds resources for thinking the female's contribution and the female on its own terms and not as the contrary to form or the male *Bodily Fluids in Antiquity* Mark Bradley, Victoria Leonard, Laurence Totelin, 2021-04-26 From ancient Egypt to Imperial Rome from Greek medicine to early Christianity this volume examines how human bodily fluids influenced ideas about gender sexuality politics emotions and morality and how those ideas shaped later European thought Comprising 24 chapters across seven key themes language gender eroticism nutrition dissolution death and afterlife this volume investigates bodily fluids in the context of the current sensory turn It asks fundamental questions about physicality and fluidity how were bodily fluids categorised and differentiated How were fluids trapped inside the body perceived and how did this perception alter when those fluids were externalised Do ancient approaches complement or challenge our modern sensibilities about bodily fluids How were religious practices influenced by attitudes towards bodily fluids and how did religious authorities attempt to regulate or restrict their appearance Why were

some fluids taboo and others cherished In what ways were bodily fluids gendered Offering a range of scholarly approaches and voices this volume explores how ideas about the body and the fluids it contained and externalised are culturally conditioned and ideologically determined The analysis encompasses the key geographic centres of the ancient Mediterranean basin including Greece Rome Byzantium and Egypt By taking a longue dur e perspective across a richly intertwined set of territories this collection is the first to provide a comprehensive wide ranging study of bodily fluids in the ancient world Bodily Fluids in Antiquity will be of particular interest to academic readers working in the fields of classics and its reception archaeology anthropology and ancient to Early Modern history It will also appeal to more general readers with an interest in the history of the body and history of medicine Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**Passion, Persecution, and Epiphany in Early Jewish Literature** Nicholas Peter Legh Allen, Pierre J.

Jordaan, József Zsengellér, 2020-04-08 This volume examines Jewish literature produced from c. 700 B.C.E. to c. 200 C.E. from a socio-theological perspective In this context it offers a scholarly attempt to understand how the ancient Jewish psyche dealt with times of extreme turmoil and how Jewish theology altered to meet the challenges experienced The volume explores various early Jewish literature including both the canonical and apocryphal scripture Here reference is often made to a divine epiphany a moment of unexpected and prodigious revelation or insight as a response to abuse suffering and passion Many of the chapters deal with these issues in relation to the Antiochan crisis of 169 to 164 B.C.E. in Judea one of the more notable periods of oppression This watershed event appears to have served as a catalyst for the new apocalyptic texts which were produced up until c. 200 C.E. and which reflect a new theological dynamic in Judaism one that informed subsequent Christianity and Rabbinic Judaism *Passion Persecution and Epiphany in Early Jewish Literature* will be of interest to anyone working on the Bible both Masoretic and LXX and early Jewish literature as well as students of Jewish history and the Levant in the classical period

*Matter and Life in Coleridge, Schelling, and Other Dynamical Idealists* Peter Cheyne, 2025-05-12 This book written by renowned historians of philosophy literature and science provides a distinctively interdisciplinary work on matter and life in early modern Germany and Britain 1600-1850 It interrelates key theories of matter and the life sciences from Jakob Böhme Ralph Cudworth G.W. Leibniz Anthony Cooper Shaftesbury Immanuel Kant J.W. Goethe Novalis Friedrich Schelling G.W.F. Hegel S.T. Coleridge and Arthur Schopenhauer Schelling's centrality in the philosophy of nature is highlighted but also Coleridge's role in importing and adapting German philosophical and scientific insights into the domain of British science runs through the book At the core of this original project is an interrelated and interdependent analysis of Cambridge Platonism German idealism and British romanticism Under the umbrella term of dynamical idealists the editor of the volume refers to investigators of the vital energy of nature who characteristically combined the tradition of early modern speculative idealism with enquiries into an experiential study of nature involving mysticism chemistry and empirical accounts

of physical matter. Significantly, several chapters concentrate on the relationships between human will, agency, freedom, and God, shedding light on modern conceptions of subjectivity and selfhood. All of the above makes this book of great value to historians of philosophy, literature, and science.

**A Literary History of Medicine** Emilie Savage-Smith, Simon Swain, Geert Jan van Gelder, 2024-03-25. An online Open Access version of this work is also available from Brill. *A Literary History of Medicine* by the Syrian physician Ibn Abi Uaybi (d. 1270) is the earliest comprehensive history of medicine. It contains biographies of over 432 physicians ranging from the ancient Greeks to the author's contemporaries, describing their training and practice, often as court physicians, and listing their medical works, all interlaced with poems and anecdotes. These volumes present the first complete and annotated translation along with a new edition of the Arabic text, showing the stages in which the author composed the work. Introductory essays provide important background. The reader will find on these pages an Islamic society that worked closely with Christians and Jews, deeply committed to advancing knowledge and applying it to health and wellbeing.

**Innovation in Byzantine Medicine** Petros Bouras-Vallianatos, 2020-02-06. Byzantine medicine remains a little-known and misrepresented field, not only in the context of debates on medieval medicine but also among Byzantinists themselves. It is often viewed as stagnant and mainly preserving ancient ideas, and our knowledge of it continues to be based to a great extent on the comments of earlier authorities, which are often repeated uncritically. This volume presents the first comprehensive examination of the medical corpus of arguably the most important Late Byzantine physician, John Zacharias Aetouarios (c. 1275–c. 1330). Its main thesis is that John's medical works show an astonishing degree of openness to knowledge from outside Byzantium, combined with a significant degree of originality, in particular in the fields of uroscopy and human physiology. The analysis of John's edited *On Urines* and *On Psychic Pneuma*, and unedited *Medical Epitome* treatises, is supported for the first time by the consultation of a large number of manuscripts and is also informed by evidence from a wide range of medical sources, including those previously unpublished and texts from other genres such as epistolography and merchants' accounts. The contextualization of John's corpus sheds new light on the development of Byzantine medical thought and practice and enhances our understanding of the Late Byzantine social and intellectual landscape. Through examination of his medical observations in the light of examples from the medieval Latin and Islamic worlds, his theories are also placed within the wider Mediterranean milieu, highlighting the cultural exchange between Byzantium and its neighbours.

**Aristotle reads Hippocrates**, 2024-08-05. Despite Aristotle's family background and his undeniable impact on ancient Greek medicine, the influence of medicine on Aristotle's philosophy is controversial and far from universally acknowledged. The aim of this volume is to re-examine the influence of medical knowledge and literature on Aristotle's work, in particular to explore the connections with the Hippocratic writings. The volume encourages further exploration of this interdisciplinary area and offers new insights by presenting a series of case studies that examine in detail specific debates within the Aristotelian corpus in relation to the medical literature.

**Holism in Ancient Medicine and Its**

Reception Chiara Thumiger, 2020-11-30 This volume aims at exploring the ancient roots of holistic approaches in the specific field of medicine and the life sciences without however overlooking the larger theoretical implications of these discussions Therefore the project plans to broaden the perspective to include larger cultural discussions and in a comparative spirit reach out to some examples from non Graeco Roman medical cultures As such it constitutes a fundamental contribution to history of medicine philosophy of medicine cultural studies and ancient studies more broadly The wide ranging selection of chapters offers a comprehensive view of an exciting new field the interrogation of ancient sources in the light of modern concepts in philosophy of medicine as justification of the claim for their enduring relevance as object of study and at the same time as means to a more adequate contextualisation of modern debates within a long historical process Contributors are Hynek Barto Sean Coughlin Elizabeth Craik Brooke Holmes Helen King Giouli Korobili David Leith Vivian Nutton Julius Rocca William Michael Short P N Singer Konstantinos Stefou Chiara Thumiger Laurence Totelin Claire Trenery John Wee Francis Zimmermann      *The Cambridge Companion to Aristotle's Biology* Sophia M. Connell, 2021-05-27 Aristotle's voluminous writings on animals have often been marginalised in the history of philosophy Providing the first full length comprehensive account of Aristotle's biology its background content and influence this Companion situates his study of living nature within his broader philosophy and theology and differentiates it from other medical and philosophical theories An overview of empiricism in Aristotle's *Historia Animalium* is followed by an account of the general methodology recommended in the *Parts of Animals* An account of the importance of Aristotle's teleological perspective and the fundamental metaphysics of biological entities provides a basis for understanding living capacities such as nutrition reproduction perception and self motion in his philosophy The importance of Aristotle's zoology to both his ethics and political philosophy is highlighted The volume explores in detail the changing interpretations and influences of Aristotle's biological works from antiquity to modern philosophy of science It is essential for both students and scholars      **Aristotle. On Youth and Old Age, Life and Death, and Respiration 1-6** Giouli Korobili, 2022-06-21 This book is devoted to the last part of Aristotle's collection of short treatises known today as the *Parva Naturalia* i.e the treatise *On Youth and Old Age on Life and Death on Respiration* In the three main sections of the book the author offers a translation a commentary and a thorough analysis of this work The author argues in favour of the unity of the work and contextualises its ideas within Aristotle's corpus and the medical tradition of his time After an Introduction to the nature of the work and its significance for the history of natural philosophy and science a new English translation follows along with a detailed commentary of Chapters 1-6 which combines philosophical discussion with philological observations The book includes four interpretive essays which tackle problems related to the whole treatise on a more philosophical basis including questions about the structure and unity of the work the organisation of the material Aristotle's methodological principles his aims and target audience as well as the relevance of his selected themes to the thematic agenda of some Hippocratic writings This book is of interest to students and researchers in Aristotle's

psychophysiology and his views about the embodied mind as well as to anyone concerned with the history of natural philosophy and science more generally

**Time for the Ancients** P. N. Singer, 2022-01-19 The book presents the author's latest research on ancient perceptions of time it centres on medical discussions especially of the doctor philosopher Galen while also contextualizing his work within Graeco Roman evidence and discussions archaeological medical technological philosophical literary more broadly The focus is on questions of medical or experiential significance life cycles disease cycles daily regimes for mind and body clinical assessment including the vital area of diagnosis through the pulse technologies of time measurement But the philosophical background is also examined questions of the nature and definition of time and its relationship to space and motion Galen offers original contributions in all these areas at the same time as shedding important light on both contemporary attitudes and previous discussions The book thus offers an accessible and vivid overview of key issues in ancient time perception and awareness while also offering the first in depth exploration of the insights that the Galenic texts add to this picture Five thematic chapters Time Measurement Year and Life Cycles Biography Medical Cycles consider a wide range of evidence and of recent scholarship while highlighting the contribution of medical texts

**Dissection in Classical Antiquity** Claire Bubb, 2022-12-08 Dissection is a practice with a long history stretching back to antiquity and has played a crucial role in the development of anatomical knowledge This absorbing book takes the story back to classical antiquity employing a wide range of textual and material evidence Claire Bubb reveals how dissection was practised from the Hippocratic authors of the fifth century BC through Aristotle and the Hellenistic doctors Herophilus and Erasistratus to Galen in the second century AD She focuses on its material concerns and social contexts from the anatomical subjects animal or human and how they were acquired to the motivations and audiences of dissection to its place in the web of social contexts that informed its reception including butchery sacrifice and spectacle The book concludes with a thorough examination of the relationship of dissection to the development of anatomical literature into Late Antiquity

**Women, Pilgrimage, and Rituals of Healing in Modern and Ancient Greece** Evy Johanne Håland, 2023-07-21 This book investigates religious rituals and gender in modern and ancient Greece with a specific focus on women's role in connection with healing How can we come to understand such mainstays of ancient culture as its healing rituals when the male recorders did not and could not know or say much about what occurred since the rituals were carried out by women The book proposes that one way of tackling this dilemma is to attend similar healing rituals in modern Greece carried out by women and compare the information with ancient sources thus providing new ways of interpreting the ancient material we possess Carrying out fieldwork being present during often enduring rituals within cultures despite other changes teaches one whole new ways of looking at written and pictorial records of such events By bringing ancient and modern worlds into mutual illumination this text also has relevance beyond the Greek context both in time and space

**Ancient Botany** Gavin Hardy, Laurence Totelin, 2015-10-05 Gavin Hardy and Laurence Totelin have brought together their botanical and historical

knowledge to produce this unique overview of ancient botany. It examines all the founding texts of botanical science such as Theophrastus *Enquiry into Plants*, Dioscorides *Materia Medica*, Pliny the Elder's *Natural History*, Nicolaus of Damascus *On Plants*, and Galen *On Simple Remedies*, but also includes lesser known texts ranging from the sixth century BCE to the seventh century CE as well as some material evidence. The authors adopt a thematic approach rather than a chronological one, considering important issues such as the definition of a plant, nomenclature, classifications, physiology, the link between plants and their environment, and the numerous usages of plants in the ancient world. The book also takes care to place ancient botany in its historical, social, and economic context. The authors have explained all technical botanical terms and ancient history notions, and as a result, this work will appeal to historians of ancient science, medicine, and technology, classicists, and botanists interested in the history of their discipline.
