Individuals, Essence and Identity A. Bottani, Massimiliano Carrara, P. Giaretta, 2013-04-17 Andrea Bottani Massimiliano Carrara Pierdaniele Giaretta What do we do when we do metaphysics The aim of this introduction is to give a provisional answer to this question and then to explain the subtitle of the volume It is easy to observe that when we do meta physics we engage in a linguistic activity mainly consisting of uttering declarative sentences that are not very clear to most people That

is true but of course it is not very informative What do we speak of when we do metaphysics A traditional answer could be we speak of what things really are so suggesting that things can appear in a way that is different from the way they really are So understood meta physics is about the sense or the senses of real being A question that immediately arises is whether the sense of being is unique or is different for different types of things Another question is whether it is possible that something could appear to be but really not be Modern analytic metaphysicians usually answer that the sense of being is unique while acknowledging that there are different kinds of things and that to say that something could appear to be but really not be is a plain contradiction unless what is understood is that it could appear to us that there is something having such and such features but ^{viii} Individuals Essence and Identity really there is no such a thing

The Identity of

Christian Morality Ann Marie Mealey, 2016-03-03 This book argues that moral theology has yet to embrace the recommendations of the Second Vatican Council concerning the ways in which it is to be renewed One of the reasons for this is the lack of consensus between theologians regarding the nature content and uniqueness of Christian morality After highlighting the strengths and weaknesses of the so called autonomy and faith ethic schools of thought Mealey argues that there is little dividing them and that in some instances both schools are simply defending one aspect of a hermeneutical dialectic In an attempt to move away from the divisions between proponents of the faith ethic and autonomy positions Mealey enlists the help of the hermeneutical theory of Paul Ricoeur She argues that many of the disagreements arising from the Christian proprium debate can be overcome if scholars look to the possibilities opened up by Ricoeur's hermeneutics of interpretation Mealey also argues that the uniqueness of Christian morality is more adequately explained in terms of a specific identity self that is constantly subject to change and revision in light of many often conflicting moral sources She advocates a move away from attempts to explain the uniqueness of Christian morality in terms of one specific unchanging context motivation norm divine command or value By embracing the possibilities opened up by Ricoeurian hermeneutics Mealey explains how concepts such as revelation tradition orthodoxy and moral conscience may be understood in a hermeneutical way without being deemed sectarian or unorthodox

Muslims, Identity, and American Politics Brian Calfano, 2018-04-27 Calfano provides an examination of the pressures faced by Muslims often considered political and social outsiders in western nations especially in the United States Identity is a complex concept especially when considering the role that group attachments play in affecting how one sees her his role in the political environment of their country of residence Perhaps the greatest tension in this regard is felt by those who are often considered outsiders in their home country despite significant ties to their nation Though citizens and second generation residents in many cases American Muslims face a combination of suspicion government scrutiny and social segregation in the United States despite significant education and economic assimilation in America The crux of the investigation advanced here centres on how group influence emotions and religious interpretation contribute to the political orientation and behaviour of a national sample of Muslims living in the American context A compelling explanation as to how members of an ostracized political group marshal the motivation to push through suspicion to become fully engaged political actors this book has wide relevance and will be of interest to scholars researching Muslims and political participation across the fields of political science history sociology and religion
