Posthuman Gaming Poppy Wilde,2023-09-21 Posthuman Gaming Avatars Gamers and Entangled Subjectivities explores

the relationship between avatar and gamer in the massively multiplayer online roleplaying game World of Warcraft to examine notions of entangled subjectivity affects and embodiments what it means and how it feels to be posthuman With a focus on posthuman subjectivity Wilde considers how we can begin to articulate ourselves when the boundary between self and other is unclear Drawing on fieldnotes of her own gameplay experiences the author analyses how subjectivity is formed in ways that defy a single individual notion of self and explores how different practices feelings and societal understandings can disrupt strict binaries and emphasise our posthumanism She interrogates if one can speak of an I in the face of posthuman multiplicity before exploring different analytical themes beginning with how acting theories might be posthumanised and articulate the relationship between avatar and gamer She then defines posthuman empathy and explains how this is experienced in gaming before addressing the need to account for boredom the complexity of nostalgia and ways death and loss are experienced through gaming This volume will appeal to a broad audience and is particularly relevant to scholars and students of cultural studies media studies humanities and game studies

International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation

Writing and the Digital Generation Heather Urbanski, 2010-03-08 Is it true that in this era of digitization and mass media reading and writing are on the decline In a thought provoking collection of essays and profiles 30 contributors explore what may instead be a rise in rhetorical activity an upsurge due in part to the sudden blurring of the traditional roles of creator and audience in participatory media This collection explores topics too often overlooked by traditional academic scholarship though critical to an exploration of

rhetoric and popular culture including fan fiction reality television blogging online role playing games and Fantasy Football Both scholarly and engaging this text draws rhetorical studies into the digital age **Catalog of Copyright Entries, Third Series** Library of Congress.
