

DASHBOARD WARNING LIGHTS

UNDERSTANDING WHAT THEY MEAN AND HOW TO ACT.

Rear Fog Light - It is used when driving on roads with poor visibility. Once the driver turns on the fog lights.

Brake System Alert - This light indicates a low brake fluid level or a fault in the brake system. It is common for this light to come on when the vehicle has an ABS fault (see below).

Front Airbag - Similar light to the rear airbag, this light indicates that the front passenger air bag has been switched off manually.

Open Doors Indicator - This symbol is usually turned on when the driver opens the engine and informs them that the door is open. This light is commonly used to indicate that the driver has not correctly checked all doors are closed.

Oil Pressure Warning - This light will illuminate when the oil pressure sensor detects low oil pressure. The vehicle will usually stop running to avoid severe engine damage and the oil level should be checked to ensure correct levels. If the oil level is low, it should be topped up. In some vehicles to warn when the oil level is getting low and a top up is required.

ABS Warning Light - This light will show when you have a problem with your ABS. It could indicate a low fluid level or a fault in the system. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Warning Light - This light will illuminate with other lights to indicate a fault or warning. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Bulb Failure Indicator - This light will illuminate when one of the vehicle's bulbs, such as the headlights, is not working.

Child Safety Lock - If lit, this light indicates that the child safety lock has been activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Windshield Defrost - This light will illuminate when the windshield defrost system is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Traction Control Light - This light will illuminate when the traction control system is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

AWD - This light indicates that the All Wheel Drive system is activated.

Overdrive Indicator - It shows the driver that the overdrive system has been turned off.

Glow Plug Warning - Used on Diesel vehicles, no attempt to start the vehicle should be made until this light has turned off. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Turn Signals - Without a signal, the driver's turn indicators are activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Seat Belt Reminder - Active moving and the belt remains buckled. The driver will hear a tone and the light will switch off the light.

Temperature Warning Light - It warns the driver of the engine's temperature overheating and usually indicates the driver to stop the vehicle.

Battery Warning - See the manual for help to resolve the issue.

Hazard Warning Light - Activated by the driver to warn other motorists of their car to other motorists.

Engine Management Light - This light illuminates when the engine management system detects a fault. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Tire Pressure Monitor - This light will illuminate when the tire pressure is low. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Rear Window Defrost - This light will illuminate when the rear window defrost system is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Cruise Control - This light is used to indicate when the cruise control system is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Powertrain Malfunction - This light will illuminate when the engine management system detects a fault. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

Electronic Throttle Control Light - This light will illuminate when the electronic throttle control system is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

ESP/ABS Light - Similar to the ABS indicator, but especially when the driver has been switching off the engine and informs them that the system is not working.

Low Fuel Notification - This light will illuminate when the fuel level is low. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.

High Beam Light - It is used to indicate when the high beam is activated. It is common for this light to come on when the driver has been switching off the engine and informs them that the system is not working.
