*[Note: The purpose of these questions is to activate prior knowledge and get students thinking. Students are not expected to know the answers to the Prior Knowledge Questions.]*

1. A buoy is anchored to the ocean floor. A large wave approaches the buoy. How will the buoy move as the wave goes by?

*Answers will vary. [The buoy will move up and down and back and forth, tracing a circular motion, as the wave passes.]*

2. The two images show side views of ocean waves. How are the two sets of waves different?

prior to and during activities where students have opportunities to exercise their autonomy. Such autonomy support includes the influence of teacher feedback upon students' perceived competence and their subsequent motivation to autonomously engage with learning activities. This research begins to unravel such motivational interplay through an SDT-informed model which is used as the basis for discussing the specific influence of teacher feedback and autonomy support upon students' engagement with learning activities in formal learning settings. The findings and model are worthy of further testing and development as part of the wider agenda of student engagement, wellbeing, and positive psychology prevalent in educational research, education psychology, and the philosophy of social motivation.

When Crime Waves Vincent Sacco, 2005-05-11

Despite its wide usage, the concept of the crime wave has rarely been given explicit and detailed attention by criminologists. It is important that we understand where they come from, how they develop, and what their consequences are. *When Crime Waves* offers an in-depth exploration of a large number of social issues involved in the study of crime waves. Issues such as how and why crime rates change over time, why some types of crime and not others come in waves, and the role played by the mass media, politicians, and interest group leaders in the promotion of crime waves are discussed to help students develop analytical skills and apply them to real-world situations. **Key Features:** Critically examines the phenomenon of crime waves in an engaging fashion. Provides multiple perspectives via historical and contemporary examples throughout the book. Delves into the role played by politicians and the media in creating the perception that a crime wave has occurred. Presents themes of myth-making, cultural imagery, and social constructionism. *When Crime Waves* is intended to be a supplementary text for undergraduate criminology and sociology courses including *Introduction to Criminology* and *Criminal Justice*. Crime, when and where crimes occur, and what contributes to the views on crime held by the police, lawmakers, and members of the general public.

**Identity Interconnections** Aerial A. Ashlee, Lisa Delacruz Combs, 2023-07-03

Co-published with This book advocates an approach the authors call Identity Interconnections as a way of moving considerations of identity differences and commonalities from theory to socially just action in student affairs practice. Through pursuing complex commonalities expansive enough to hold both similarities and differences, student affairs educators can ethically consider identity interconnections in such a way that does not diminish difference but instead recognizes points of difference as opportunities for social justice action. By pursuing radical interconnectivity, student affairs educators can advance an interdependent understanding of inherited systems of power, recognizing the ways in which all systems and thus all oppression and all liberation are interconnected. This interconnected insight can enable student affairs educators to extend beyond binary and oppositional thinking and in turn give rise to the formation of new coalitions. Finally, by listening with raw openness, allowing themselves, and encouraging their students to be changed by others' experiences, student affairs educators can facilitate identity development and social justice action as interrelated endeavors. The editors have heard comments like "This is all great in theory, but how can student affairs practitioners actually apply this?" This book answers that question by

providing a theoretical framework and multiple practical examples for employing identity interconnections as expansive approaches to identity development and social justice action in student affairs      Case Studies for Student Development Theory Jason C. Garvey, Jessica C. Harris, Darris R. Means, Rosemary J. Perez, Christa J. Porter, 2019-06-17 This much needed case study book provides higher education and student affairs graduate students practitioners and faculty with the tools to enhance their learning of student development theory and to apply this learning to practice Each chapter offers a summary of theory covering traditional and newer student development models in addition to multiple case studies that help readers focus on practice that fosters social justice and inclusion The case studies for each chapter represent a range of institutional types and diverse student populations offering an opportunity to explore the intersections of various developmental processes and to foster social justice and inclusion in higher education contexts Guiding questions at the end of each case study offer opportunities for further discussion and critical reflection An essential text for every student development course
