yet manageable presentation of world history      Technology: A World History Daniel R. Headrick Professor of Social Sciences and History Roosevelt University, 2009-02-25 Today technology has created a world of dazzling progress growing disparities of wealth and poverty and looming threats to the environment Technology A World History offers an illuminating backdrop to our present moment a brilliant history of invention around the globe Historian Daniel R Headrick ranges from the Stone Age and the beginnings of agriculture to the Industrial Revolution and the electronic revolution of the recent past In tracing the growing power of humans over nature through increasingly powerful innovations he compares the evolution of technology in different parts of the world providing a much broader account than is found in other histories of technology We also discover how small changes sometimes have dramatic results how for instance the stirrup revolutionized war and gave the Mongols a deadly advantage over the Chinese And how the nailed horseshoe was a pivotal breakthrough for western farmers Enlivened with many illustrations Technology offers a fascinating look at the spread of inventions around the world both as boons for humanity and as weapons of destruction      *WORLD HISTORY, JOURNEYS* Candice Goucher, Linda Walton, 2013-09-13 Using a thematic approach this innovative textbook explores the history of the world from its earliest prehistory to the present age of globalization      *The Cambridge World History: Volume 2, A World with Agriculture, 12,000 BCE-500 CE* Graeme Barker, Candice Goucher, 2015-04-16 The development of agriculture has often been described as the most important change in all of human history Volume 2 of the Cambridge World History series explores the origins and impact of agriculture and agricultural communities and also discusses issues associated with pastoralism and hunter gatherer economies To capture the patterns of this key change across the globe the volume uses an expanded timeframe from 12 000 BCE 500 CE beginning with the Neolithic and continuing into later periods Scholars from a range of disciplines including archaeology historical linguistics biology anthropology and history trace common developments in the more complex social structures and cultural forms that agriculture enabled such as sedentary villages and more elaborate foodways and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world including Southwest Asia South Asia China Japan Southeast Asia and the Pacific sub Saharan Africa the Americas and Europe      **Converging on Cannibals** Jared Staller, 2019-07-02 In *Converging on Cannibals* Jared Staller demonstrates that one of the most terrifying discourses used during the era of transatlantic slaving cannibalism was coproduced by Europeans and Africans When these people from vastly different cultures first came into contact they shared a fear of potential cannibals Some Africans and European slavers allowed these rumors of themselves as man eaters to stand unchallenged Using the visual and verbal idioms of cannibalism people like the Imbangala of Angola rose to power in a brutal world by embodying terror itself Beginning in the Kongo in the 1500s Staller weaves a nuanced narrative of people who chose to live and behave as jaga alleged cannibals and terrorists who lived by raiding and enslaving others culminating in the violent political machinations of Queen Njinga as she took on the mantle of Jaga to establish her power Ultimately Staller

tells the story of Africans who confronted worlds unknown as cannibals how they used the concept to order the world around them and how they were themselves brought to order by a world of commercial slaving that was equally cannibalistic in the human lives it consumed      **Subject Guide to Books in Print** ,1993      **Library of World History** ,1914      **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1881      *Historian in Chief* Seth Cotlar,Richard J. Ellis,2019-04-23 Presidents shape not only the course of history but also how Americans remember and retell that history From the Oval Office they instruct us what to respect and what to reject in our past They regale us with stories about who we are as a people and tell us whom in the pantheon of greats we should revere and whom we should revile The president of the United States in short is not just the nation s chief legislator the head of a political party or the commander in chief of the armed forces but also crucially the nation s historian in chief In this engaging and insightful volume Seth Cotlar and Richard Ellis bring together top historians and political scientists to explore how eleven American presidents deployed their power to shape the nation s collective memory and its political future Contending that the nation s historians in chief should be evaluated not only on the basis of how effective they are in persuading others *Historian in Chief* argues they should also be judged on the veracity of the history they tell      **People of the Earth** Brian M. Fagan,Nadia Durrani,2015-08-26 Understand major developments of human prehistory *People of the Earth* An Introduction to World Prehistory 14 e provides an exciting journey though the 7 million year old panorama of humankind s past This internationally renowned text provides the only truly global account of human prehistory from the earliest times through the earliest civilizations Written in an accessible way for beginning students *People of the Earth* shows how today s diverse humanity developed biologically and culturally over millions of years against a background of constant climatic change      [History of the Native People of Canada](#) James Vallière Wright,1996-01-01 Covering the history of First Peoples in Canada from 10 000 to 1000 BC this volume explores a period which includes the original settlement of the Americas cultural diversification technological advances expanding trade networks and the development of complex belief systems A useful reference work for scholars and laypersons alike Published in English      **An Age of Voyages, 1350-1600** Merry E. Wiesner-Hanks,2005-06-23 Cultural life flowered from the mid fifteenth century in the Italian city states many of which profited from the new trading opportunities that growing world networks permitted Contact among regions of the world expanded bringing new ideas and prompting an appreciation of arts and letters not only of the present but of the past In Italy this cultural flowering was known at first as the renaissance of arts and letters soon shortened to just Renaissance to accommodate cultural ingredients that came from beyond Europe Italian and northern European cultural expansion benefited from similar retrieval of ancient knowledge in the Islamic world and East Asia Like the Italians the Chinese had grown even wealthier from the extensive links to global commerce provided by the Mongol Empire but once thrown off their cultural life flourished under the Ming Cultural knowledge and the arts spread across Asia and into Europe As part of state building the Ming nourished commerce but also

rejected the cosmopolitan Buddhist legacy that arrived from central and south Asia To strengthen dynastic Chinese rule the Ming challenged Buddhism with a revival of age old concern for the Confucian values that had languished under the Mongols Foremost among these new Confucians was Wu Yube so expert in his teachings that he attracted a wide coterie of disciples In India Nanak an educated employee of an Afghan prince sparked the founding of Sikhism A similar search for reviving fundamental religious values occurred in Europe where Martin Luther challenged the practices of the Catholic church ushering in Protestantism Religious reform and resistance to it were closely connected to the state building efforts of enterprising monarchs such as Henry VIII of England India likewise experienced a fervent movement to revive pure ancient religious practices Fourteenth and fifteenth century global trade and long distance ventures such as those made by the Ming and then by the Portuguese further inspired and advanced these worldwide cultural and political developments A brisk Indian Ocean trade flourished Economic change ensued with the arrival of New World silver on the global market The advance of printing not only furthered the cause of religious reform and state building globally it also helped globalize knowledge and intellectual experimentation People of great power and those of more limited means came to live their lives differently because of this expanding web of shared knowledge and trade Cities flourished the enslavement of native Americans came to replace their use as human sacrifices and diseases migrated at a more rapid pace and greater devastation than perhaps ever before Book Review Digest ,1926 **The Global History of Paleopathology** Jane E.
