The Great Civilized Conversation Education For A World Community:

The Great Civilized Conversation Wm. Theodore de Bary, 2014-11-04 Having spent decades teaching and researching the humanities Wm Theodore de Bary is well positioned to speak on its merits and reform Believing a classical liberal education is more necessary than ever he outlines in these essays a plan to update existing core curricula by incorporating classics from both Eastern and Western traditions thereby bringing the philosophy and moral values of Asian civilizations to American students and vice versa The author establishes a concrete link between teaching the classics of world civilizations and furthering global humanism Selecting texts that share many of the same values and educational purposes he joins Islamic Indian Chinese Japanese and Western sources into a revised curriculum that privileges humanity and civility He also explores the tradition of education in China and its reflection of Confucian and Neo Confucian beliefs He reflects on history's great scholar teachers and what their methods can teach us today and he dedicates three essays to the power of The Analects of Confucius The Tale of Genji and The Pillow Book of Sei Shonagon in the classroom

Liberal Learning as a Quest for Purpose William M. Sullivan, 2016 What happens when higher education is introduced to the exploration of meaning and purpose Liberal Learning as a Quest for Purpose analyzes a remarkable experiment lasting over a decade and encompassing 88 independent campuses to reconfigure undergraduate education as a journey toward life purpose It ties together the liberal arts personal development and preparation for life all through the exploration of vocation

Religion and Education Malini Sivasubramaniam, Ruth Hayhoe, 2018-01-01 Despite the increased trend towards secularisation in state schooling issues of religion and spirituality have remained important Increased pluralism within societies through expanding migration patterns is changing the religious and cultural contours of many countries in Europe and North America and is creating a need for a deeper understanding of religious diversity However the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism More recently religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions in particular These are profound concerns and there is an urgency to examine how religion religious education and interfaith initiatives can address such misconceptions This book is thus timely focusing on an area that is often neglected particularly on the role of religion in education for sustainable development While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries their role in reaching development goals has not always been explicitly recognised as is evident even in the United Nations most recently conceptualised 2030 Agenda for Sustainable Development Undeniably the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and

comparative understanding of the role of religious education and institutions in advancing the post 2015 development agenda The contributors to this volume each demonstrate that while religion in education can contribute to understanding and respect it is also a space that can be contested and co opted Without addressing the salience of religion however it will not be possible to foster peace and combat discrimination and prejudice This book will be of interest to researchers scholars and students in the field of comparative education and development religious studies theology and teacher development and training This book may also be of interest to national and international policy makers There are also numerous faith based organisations as well as other non governmental organisations NGOs working on religion and education issues that may find these case studies a useful resource

Three Streams Philip J. Ivanhoe, 2016-09-20 Recent interest in Confucianism has a tendency to suffer from essentialism and idealism manifested in a variety of ways One example is to think of Confucianism in terms of the views attributed to one representative of the tradition such as Kongzi Confucius 551 479 BCE or Mengzi Mencius 372 289 BCE or one school or strand of the tradition most often the strand or tradition associated with Mengzi or in the later tradition that formed around the commentaries and interpretation of Zhu Xi 1130 1200 Another such tendency is to think of Confucianism in terms of its manifestations in only one country this is almost always China for the obvious reasons that China is one of the most powerful and influential states in the world today A third tendency is to present Confucianism in terms of only one period or moment in the tradition for example among ethical and political philosophers pre Qin Confucianism usually taken to be the writings attributed to Kongzi Mengzi and if we are lucky Xunzi 479 221 BCE often is taken as Confucianism These and other forms of essentialism and idealism have led to a widespread and deeply entrenched impression that Confucianism is thoroughly homogenous and monolithic these often are facts mustered to support the purportedly oppressive authoritarian and constricted nature of the tradition such impressions can be found throughout East Asia and dominate in the West This is quite deplorable for it gives us no genuine sense of the creatively rich philosophically powerful highly variegated and still very much open ended nature of the Confucian tradition This volume addresses this misconstrual and misrepresentation of Confucianism by presenting a philosophically critical account of different Confucian thinkers and schools across place China Korea and Japan and time the 10th to 19th centuries

The Routledge Companion to Reinventing Management Education Chris Steyaert, Timon Beyes, Martin Parker, 2016-06-17 The position and role of the business school and its

educational programmes have become increasingly prominent yet also questioned and contested What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world Drawing upon the humanities and social sciences The Routledge Companion to Reinventing Management Education imagines a different and better education offered to students of management entrepreneurship and organization studies It is an intervention into the debates on what is taught and how learning takes place demonstrating both the potential and the limits of what the humanities and social sciences can do for management education Divided into six sections the book traces the history and theory of management education reimagining central educational principles and outlining an emerging practice based approach With an international cast of authors The Routledge Companion to Reinventing Management Education has been written for contemporary and future educators and for students and scholars who seek to make a difference through their practice

Re-envisioning Chinese Education Guoping Zhao,Zongyi Deng,2015-10-30 Maintaining education as a pedagogical space for human formation this book is distinctive in looking at the crisis rather than the success of Chinese education The editors and contributors mostly overseas and mainland Chinese scholars argue that modern Chinese education has been built upon a superficial and instrumental embrace of Western modernity and a fragmented appropriation of Chinese cultural heritage They call for a rethinking and re envisioning of Chinese education grounded in and enriched by various cultural traditions and cross cultural dialogues Drawing on Chinese history and culture Western and Chinese philosophies curriculum and pedagogical theories the collected volume analyzes 1 why education as person making has failed to take root in contemporary China 2 how the purpose of education has changed during the process of China s modernization and 3 what a rediscovery of the meaning of person making implies for rethinking and re envisioning Chinese education in the current age of globalization and social change Re envisioning Chinese Education The meaning of person making in a new age discusses among other issues China s Historical Encounter with the West and Modern Chinese Education Rediscover Lasting Values Confucian Cultural Learning Models in the Twenty first Century Rethinking and Re envisioning Chinese Didactics Implications from the German Didaktik Tradition The New Basic Education and the Development of Human Subjectivity A Chinese Experience This book will be relevant for scholars researchers and policy makers everywhere who seek a more balanced more sophisticated and philosophically better grounded understanding of Chinese education

Dantologies William Franke,2023-09-26 This book comprises a searching philosophical meditation on the evolution of the humanities in recent decades taking Dante studies as an exemplary specimen The contemporary currents of theory have decisively impacted this field but Dante also has a strong relationship with theology The idea that theology teleology and logocentric rationalities are simply overcome and swept away by new theoretical approaches proves much more complex as the theory revolution is exposed in its crypto theological motives and origins The revolutionary agendas and methodologies of theoretical currents have ushered in all manner of

minorities and postcolonial and gender studies But the exciting adventure they inaugurate shows up in quite a surprising light when brought to focus through the scholarly discipline of Dante studies as a terrain of dispute between traditional philology and postmodern theory On this terrain negative theology can play a peculiarly destabilizing but also a conciliatory role it is equally critical of all languages for a theological transcendence to which it nevertheless remains infinitely open

Dao Companion to ZHU Xi's Philosophy Kai-chiu Ng, Yong Huang, 2020-03-04 Zhu Xi 1130 1200 has been commonly and justifiably recognized as the most influential philosopher of Neo Confucianism a revival of classical Confucianism in face of the challenges coming from Daoism and more importantly Buddhism His place in the Confucian tradition is often and also very plausibly compared to that of Thomas Aquinas slightly later in the Christian tradition This book presents the most comprehensive and updated study of this great philosopher It situates Zhu Xi's philosophy in the historical context of not only

Confucian philosophy but also Chinese philosophy as a whole Topics covered within Zhu Xi's thought are metaphysics epistemology ethics political philosophy hermeneutics philosophy of religion moral psychology and moral education This text shows both how Zhu Xi responded to earlier thinkers and how his thoughts resonate in contemporary philosophy particularly in the analytic tradition This companion will appeal to students researchers and educators in the field **Japanese Confucianism** Kiri Paramore, 2016-04-18 For more than 1500 years Confucianism has played a major role in shaping Japan's history from the formation of the first Japanese states during the first millennium AD to Japan's modernization in the nineteenth century to World War II and its still unresolved legacies across East Asia today In an illuminating and provocative new study Kiri Paramore analyses the dynamic history of Japanese Confucianism revealing its many cultural manifestations as religion and as a political tool as social capital and public discourse as well as its role in international relations and statecraft The book demonstrates the processes through which Confucianism was historically linked to other phenomenon such as the rise of modern science and East Asian liberalism In doing so it offers new perspectives on the sociology of Confucianism and its impact on society culture and politics across East Asia past and present Annual Review of Comparative and International Education 2020 Alexander W. Wiseman, 2021-08-02 The Annual Review of Comparative and International Education covers significant developments in the field of comparative and international education This 2020 edition begins with a collection of discussion essays about comparative education trends and directions written by both professional and scholarly leaders Cosmopolitan Sexualities Ken Plummer, 2016-09-26 How are we to live with the wide varieties of sexuality and gender found across the rapidly changing global order Whilst some countries have legislated in favour of same sex marriage and the United Nations makes declarations about gender and sexual equality many countries across the world employ punitive responses to such differences In this compelling and original study Ken Plummer argues the need for a practical utopian project of hope that he calls cosmopolitan sexualities He asks how can we connect our differences with collective values our uniqueness with multiple group belonging our sexual and gendered individualities with a broader common humanity Showing how a foundation for this new ethics politics and imagination are evolving across the world he discusses the many possible pitfalls being encountered He highlights the complexity of sexual and gender cultures the ubiquity of human conflict the difficulties of dialogue and the problems with finding any common ground for our humanity Cosmopolitan Sexualities takes a bold critical humanist view and argues the need for positive norms to guide us into the future Highlighting the vulnerability of the human being Plummer goes in search of historically grounded and potentially global human values like empathy and sympathy care and kindness dignity and rights human flourishing and social justice These harbour visions of what is acceptable and unacceptable in the sexual and intimate life Clearly written the book speaks to important issues of our time and will interest all those who are struggling to finding ways to live together well in spite of our different genders and sexualities **The Humanities in Contemporary Chinese Contexts** Evelyn T. Y.

Chan, Michael O'Sullivan, 2016-10-22 This book brings together the perspectives of eminent and emerging scholars on contemporary issues relevant to the practice pedagogy and institutionalization of the humanities in the three Chinese contexts of Hong Kong Taiwan and mainland China It addresses the need to investigate how humanities discussions often exclusively drawn from and grounded in western contexts are today being played out in these three places The humanities in contemporary Chinese contexts may have different social and pedagogical roles and a consideration of them will enable people to moderate and perhaps even refute claims made in the recent re readings of the humanities As Asian universities rise in the global rankings and as east west university collaborations and partnerships become more common it is important that the nature practice and institutionalization of the humanities in Hong Kong Taiwan and mainland China are explored and described for English readers Exploring new perspectives arising from an examination of the humanities in these places this volume aims neither to establish a position of polarity which would pit western sites against Chinese ones nor to argue for universal sameness Rather the goal is to find nuanced correspondences and differences between these various backgrounds so that there is a greater understanding of the specificities of Chinese contexts This will help shed light not only on the contexts in question but also potentially on how to rearticulate the importance of the humanities in general creating an intercultural dialogue focused on the humanities As the global university strives to move the different traditions of learning closer together through international rankings rubrics and shared research agendas it is important that we explore these locations of potential cultural exchange
