Addressed to both literary scholars and the general reader *Understanding Anne Enright* is an introduction to the novels and stories of one of the most original and engaging contemporary Irish writers It analyses developments in Enright's writing comparing the evolution of themes and forms from one book to another contextualising her fiction and interrogating the impact of concepts such as postmodernism post feminism and post nationalism on the writing and reading of her work It particularly follows the evolution of Enright's treatment of the corporeality of women's experiences and its correlation with the embodied language of her fiction Thus this book shows how Enright's writing participates in the latest thematic and formal trends not only of Irish or British but also of Western literature *Landscape Bionomics Biological-Integrated Landscape Ecology* Vittorio Ingegnoli,2015-03-03 *Landscape Bionomics* or *Bio integrated Landscape Ecology* radically transforms the main principles of traditional *Landscape Ecology* by recognizing the landscape as a living entity rather than merely the spatial distribution of species and communities on the territory often analysed in separate themes water species pollution etc To be more exact the landscape is identified as the life organization integrating a set of plants animals and human communities and its system of natural semi natural and human cultural ecosystems in a certain spatial configuration This new perspective inevitably leads to significant changes in how to assess and manage the environment This book represents the culmination of an endeavor begun by the author with the support of Richard Forman and Zev Naveh more than a dozen years ago It builds on the author's previous successful publication *Landscape Ecology A Widening Foundation* by addressing a range of additional topics and discussing the new theoretical and methodological concepts that have emerged during the past decade of research Particular attention is paid to the fact that interventions in the landscape can be made with the best intentions yet cause serious damage Against this background the author explains the need to study landscape units by applying methods comparable to those used in clinical diagnosis hence ecologists can be viewed as the physicians of ecological systems
