Solutions for Practice Problems

Section 9.1 Making Predictions About Solubility

Student Textbook page 335

1. Problem

Decide whether each of the following salts is soluble or insoluble in distilled water. Give reasons for your answer.

- (a) lead(II) chloride, PbCl_2 (a white crystalline powder used in paints)
 (b) zinc oxide, ZnO (a white pigment used in paints, cosmetics, and calamine lotion)
 (c) silver acetate, AgCH_3COO (a whitish powder that is used to help people quit smoking because of the bitter taste it produces)

What Is Required?

Determine if the salts listed will dissolve in water.

What Is Given?

You have the names of the three salts and access to the solubility guidelines.

Plan Your Strategy

Identify the cations and anions in each salt. Refer to the solubility chart on page 334 of the text and determine the guideline solubility of these ions. The solubility of the salt will correspond with the solubility of the ion having the higher guideline (lower number).

Act on Your Strategy

Name	Formula	Ions	Guideline	Ion Solubility	Salt Solubility
lead(II) chloride	PbCl_2	Pb^{2+}	2	insoluble	INSOLUBLE
		Cl^-	3	soluble	
zinc oxide	ZnO	Zn^{2+}	5	soluble	INSOLUBLE
		O^{2-}	2	insoluble	
silver acetate	AgCH_3COO	Ag^+	2	insoluble	SOLUBLE
		CH_3COO^-	1	soluble	

Check Your Solution

Check your results against another reference. These conclusions are correct.

2. Problem

Which of the following compounds are soluble in water? Explain your reasoning for each compound.

- (a) potassium nitrate, KNO_3 (used to manufacture gunpowder)
 (b) lithium carbonate, Li_2CO_3 (used to treat people who suffer from depression)
 (c) lead(II) oxide, PbO (used to make crystal glass)

What Is Required?

Determine if the salts listed will dissolve in water.

The Geomagnetic Field and Life A. Dubrov, 2013-11-11 I am very pleased that my book The Geomagnetic Field and Life is being published in English in the United States Thanks to the initiative of Plenum Press a publishing house that is widely known in all countries I have a great new opportunity to make direct contact with friends throughout the world My book on the geomagnetic field can be regarded as an abstraction whose purpose is to provide a better picture and understanding of the world around us its main driving forces and factors to help us to know ourselves and to proceed further The essence of the abstraction is that in treating the problem I have deliberately ignored the diverse effects of various external factors on living organisms and have confined myself to an analysis of the effect of the GMF This approach allows me to go one step further to draw various conclusions and propose theories that

might bring us closer to a proper understanding of the true nature of the phenomena Philosophers have long been aware that by such abstract thinking we can determine the nature of phenomena more reliably completely and comprehensively penetrate to the very core of the observed effects and perceive the depth of their interrelations
