BOOK FOR EVERYONE Sacha Collins, 2022-08-02 Baking is the process of cooking by dry heat especially in some kind of  
oven It is probably the oldest cooking method Bakery products which include bread rolls cookies pies pastries and muffins  
are usually prepared from flour or meal derived from some form of grain Flour is the basic ingredient in cakes pastries  
breads and scores of other baked products It provides the structure or framework of the food Different types of flour are used  
for baking although the most commonly used is the all purpose flour since it can be used for all kinds of baked goods For  
cakes it is best to use cake flour because of its lightness and low protein content while bread flour is the most suitable for  
breads due to its high protein content Other flours used in baking include whole wheat flour pastry flour etc Sugar functions  
not only as sweetener It is also responsible for making the cake tender because it hinders in the hydration of flour which is  
necessary in the development of gluten Sugar also provides the golden brown color of cakes or breads Most used is the  
refined white sugar or granulated sugar although some recipes call for brown sugar and even confectioners sugar Fat is also  
needed for baking because it makes the baked products tender moist and rich Butter or margarine is usually preferred  
because of their flavor and for additional color Shortening is also often used while others specify oil Butter can either be  
creamed or melted depending on its use To make cakes rise leavening agents are added This produce carbon dioxide largely  
responsible for the rising of the cake or its volume They also make the cake light and porous Baking powder baking soda and  
yeast are examples of leaveners used in baking The first 2 are used for cakes and pastries while yeast is used for breads To  
hold the batter of dough together and to blend all the ingredients liquid is added Liquid can be in the form of water milk or  
juices Milk refers to whole cow s milk To substitute with canned evaporated milk dilute it in a 1 1 proportion Powdered full  
cream milk can also be used as substitute simply dissolve it in water before using For additional structure richness and  
nutrition eggs are added either whole just egg yolks or just egg whites The important thing is to use eggs of the same size  
Lastly to make cakes flavourful and more interesting add nuts dried fruits flavouring spices and even fresh fruits      *Cake*
