- Upgrade a VHP® fleet engine through the core engine exchange program
- Purchase an upgraded VHP engine outright without core exchange

Product details

- Zero hour overhaul engine with new & reUp components
- Each upgraded VHP includes:
 - xCooled heads
 - ESM² control system
 - Air-fuel ratio control (AFR²)
 - Advanced crankcase breather system
 - emPact emission control upgrade (optional)
 - Gas compression specification options (flywheel, alternator, high pressure air/gas starter, front crank pulley, and water connections)
- Upgraded engines are dynamometer tested at full load and come with an updated bill of material

Customer benefits

- **Improved Package Economics:** VHP reUp Engines use the latest technology to increase engine horsepower and compressor flow at the lowest capital cost. Upgraded remanufactured engines also have increased service intervals (identical to new) and reduced oil consumption. Increased power and reduced operational expense combine to greatly improve package economics.

- **Latest Technology:** Each reUp VHP includes the latest parts and control systems to ensure equivalent to new engine performance and reliability. Newly designed power cylinder components allow increased horsepower. ESM² and AFR² improve engine fuel flexibility and the speed and load response required in gas compression applications. The emPact system attains low emissions with little to no operator adjustment.

- **Reliability:** VHP reUp Engine components are remanufactured in production environments with supporting quality systems. Engine assembly is completed by trained personnel with the same equipment, processes, and tools used to build new units.

- **Component fallout:** Core credit is determined based on visual inspection of the core engine. **No added fees** are applied if components fall out later in the remanufacturing process.

- **Warranty:** Waukesha Extended Limited Warranty applies – one year from date of service or two years from sale.
