Assessing the Landscape of Taiwan and Korean Studies in Comparison ,2021-04-19 In Assessing the Landscape of Taiwan and Korean Studies in Comparison the chapters offer a reflection on the state of the field of Taiwan and Korea Studies For the editors the volume s purpose was to identify not just their similarities but also a reflection on their differences Both have national identities formed in a colonial period The surrender of Japan in 1945 ignited the light of independence for Korea but this would be ideologically split within five years For Taiwan that end forced it into a born again form of nationalism with the arrival of the Chinese Nationalists Taiwan and

South Korea's economic development illustrates a progressive transition and key to understanding this is the relationship between modernization and democracy. By looking at Korea and Taiwan the chapters in the volume broaden an understanding of the interconnectivity of the region. *The Return of Bipolarity in World Politics* Øystein Tunsjø, 2018-02-27

Since the collapse of the Soviet Union the international system has been unipolar centered on the United States. But the rise of China foreshadows a change in the distribution of power. Tunsjø shows that the international system is moving toward a U.S.-China standoff bringing us back to bipolarity a system in which no third power can challenge the top two. *The Return of Bipolarity in World Politics* surveys the new era of superpowers to argue that the combined effects of the narrowing power gap between China and the United States and the widening power gap between China and any third ranking power portend a new bipolar system that will differ in crucial ways from that of the last century. Tunsjø expands Kenneth N. Waltz's structural realist theory to examine the new bipolarity within the context of geopolitics which he calls geostructural realism. He considers how a new bipolar system will affect balancing and stability in U.S.-China relations predicting that the new bipolarity will not be as prone to arms races as the previous era's that the risk of limited war between the two superpowers is likely to be higher in the coming bipolarity especially since the two powers are primarily rivals at sea rather than on land and that the superpowers are likely to be preoccupied with rivalry and conflict in East Asia instead of globally. Tunsjø presents a major challenge to how international relations understands superpowers in the twenty-first century.

*Market Economics and Political Change* Juan D. Lindau, 2000-01-01 Does market liberalization promote democracy? The accepted answer from scholars, pundits and politicians alike has been yes. Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society.

**The Political Economy of Change and Continuity in Korea** Seungjoo Lee, Sang-young Rhyu, 2018-08-25 This book analyzes the transformation of Korean political economy since the 1990s. In the wake of the Asian financial crisis of 1997 the political economy of South Korea has evolved around two diametrically opposed features: convergence into the Anglo-American model and the state-led strategic restructuring of industries. To unravel the peculiar nature of the political economy in Korea the authors first identify major factors that contributed to the dual dynamics of change and continuity in Korea: external pressures, ideological shift in political leadership and the pivotal role of

the Korean government Next they examine the way in which these factors interacted with each other to reshape the evolutionary path of the Korean political economy Using several case studies the authors take us through the stages of this transformation from the reform of the chaebols to the industrial restructuring of the auto IT and aerospace industries to the rise of South Korea's Free Trade Agreements FTA initiative In explaining the role that the dual dynamics of change and continuity play in modern Korean political economy this book makes an important contribution to the existing literature and will be of interest to scholars and policy makers concerned with development in Korea and the Asia Pacific
