Polymerase Chain Reaction

Synopsis

In the Polymerase Chain Reaction (PCR) simulation, you will see through eight steps another reaction, similar to the one that takes place, to investigate the crime, understand how to use the product of the experiment in the future and the importance of PCR to forensic science.

Objectives

After completing, you will go to the next module in the laboratory. The objective of this page is to help you understand a technique in forensic science, and this is to help you from the crime scene. It is up to you to make the correct decisions accordingly to the PCR experiment.

How the structure of DNA works in replication of PCR

In the simulation, you will see the PCR experiment on the computer, which illustrates the structure of DNA and the replication of the double helix. You will understand the experimental process, as well as all specifications of the PCR itself.

Identify the materials

In the PCR simulation, you will collect your samples and other needed samples from the laboratory, and you will make necessary the preparation for analysis.

Learning Objectives

In the end of this simulation, you will be able to:

1. Identify the function of each particular PCR process experiment and synthesis.
2. Explain to this process using the results of the PCR experiment in the laboratory.
