Armstrong,2019 Board Certification in Clinical Neuropsychology is a how to book written in supportive language Its goal is to motivate encourage and provide concrete tools to get through a tough multi step examination process The audience is primarily individuals seeking board certification in clinical neuropsychology but includes practicing neuropsychologists students and those who are training students *The Process of Neurologic Care in Medical Practice* Thomas H. Glick,1984 Most neurology is done by general physicians rather than by neurologists Still neurology is perceived by doctors to be one of the most troublesome and difficult medical specialties Neurologic symptoms are often vague and uncertain and seemingly insignificant symptoms can reflect frightening disorders Thomas Glick a superb teacher as well as an experienced clinician has written this book in the belief that errors in handling neurologic cases stem not so much from a failure to command a daunting body of knowledge as from inadequate clinical reasoning Dr Glick shows how the skills of the primary care physician can be applied to the special problems of neurologic history taking and physical examination He emphasizes time saving ways to focus the exam and avoid

diagnostic error The book describes clear procedures for cases that the generalist can handle comfortably and offers guidelines on when and how to seek the advice of the consultant neurologist Case histories scattered liberally throughout the text highlight the discussions and give the reader a rich sampling of specific methods of problem solving Clinicians who feel skeptical about the effectiveness of neurologic therapy or frustrated by its application will find here a commonsense approach to therapeutic planning Chapters on ambulatory and chronic neurologic care also convey a positive sense of the broader therapeutic possibilities that exist in neurologic practice Neurologic residents senior medical students psychiatrists and allied health professionals as well as primary caregivers will benefit from the insights contained in this sensitive and articulate book *Emergency Neurology* Sid M. Shah, Kevin M. Neuropsychology Gerald Goldstein, Paul David Nussbaum, Sue R. Beers, 2013-06-29 In this volume of the series Human Brain Function Assessment and Rehabilitation we cover the area of how brain function is assessed with behavioral or neuropsychological instruments These assessments are typically conducted by clinical neuropsychologists or behavioral neurologists and so we made an effort to present the somewhat differing approaches to these two related disciplines Clinical neuropsychologists are psychologists who typically utilize standardized tests while behavioral neurologists are physicians who generally assess brain function as part of the clinical neurological evaluation Both approaches have much to offer The basic assumption of neuropsychological assessment is that the brain is the organ of behavior and therefore the condition of the brain may be evaluated with behavioral measures Neuropsychological tests are those measures found by research to be particularly sensitive to alterations in brain function An adequate neuropsychological test is a procedure that can be related to some objective measure of alteration in brain function Over the years these objective measures have changed but generally involve documentation through direct observation of brain tissue or through histological pathological neuroimaging or other laboratory procedures The methods described in the first two volumes of this series describe the neuroimaging procedures that are often used in the validation of neuropsychological tests
