Tomlinson,2018-02-22 Film cameras the bodies themselves have little to do with image quality Lenses are far more important to image quality than camera bodies So as long as your camera has accurate shutter speeds aperture settings and metering the brand you pick doesn t really have much of an effect upon the final image So then it appears the model camera you choose is irrelevant Well no The type of film SLR camera you choose is most important to you as the photographer in features and convenience Comfort has a lot to do with how good you are as a photographer What I mean by that is that you choose a camera that feels comfortable in your hands

and becomes an extension of your brain as a photographer This makes it easier to capture the types of images you want

Shawn M. Tomlinson, 2018-12-14 I discovered very quickly that the Pentax 645 was much easier to use than the Hasselblad 500c I got more photos per roll too even though they were smaller than the 6 by 6cm of the 500c The were are 6 by 4 5cm which is where the 645 comes from in the name One thing I did notice was the clarity and sharpness of that prime lens To my eyes it was just as good if not a tiny bit better than the renowned Carl Zeiss Planar 80mm f 2 8 prime lens I started shooting with the Pentax 645 a lot because unlike the 500c and the two Mamiyas it isn t a pain to use It acts a lot like a 35mm SLR or even a DSLR much more so than my three other medium format cameras This book can help to get you started using the Pentax 645 **Vol. 26: Medium-Format**

Photography: Getting Started Shawn M. Tomlinson, 2018-10-17 Simply put medium format photography is quite a bit more complex than shooting with 35mm film SLRs or 35mm style DSLRs It takes a bit more skill and experience to handle medium format cameras Not only do you need to learn to think differently about how you shoot but you also have a whole new type of equipment to learn Medium format cameras produce bigger images which allows for more detail and greater enlargement And because they in general were designed for professional photographers the lenses tend to be of better quality than most 35mm lenses which also adds to the detail in the images In this book we ll take a look at medium format SLRs and TLRs and

we'll even touch upon some other types. We'll also consider a few lenses although these largely are a matter of choice. And there are far fewer choices for medium format cameras than for other types. Time to do some weight training and heft those medium format cameras and lenses into position. Let's go.

Forensic Photography Nick Marsh, 2014-09-24 Forensic photography plays a vitally important part in the investigation of crime and the subsequent administration of justice. Written by a practitioner with many years professional experience, this book provides an overview of the most common forensic photography techniques in use today for those readers who may not have a detailed understanding of camera techniques and who need to get to grips with the use of light and other key scientific aspects of the job. It covers image capture issues, file handling and relevant equipment such as lasers and UV lights and explores how they work. The predominance of the digital camera has resulted in an increasing trend for police forces across the world to use untrained camera users rather than expert photographers. Therefore, this book will prove invaluable for those practitioners who need to produce accurate and clear photographic evidence above and beyond the point and shoot mode on their cameras.

Vol. 31: Going Film Pro II: The Canon EOS 1N: Standard Edition Shawn M. Tomlinson, 2018-12-31 In some ways the Nikon F5 is easier to use than the Canon EOS 1N, but it is not nearly as elegant. There's just something about the way the Canon EOS 1N feels in my hands when I'm shooting with it that makes me never want to put it down. In that way it reminds me much more of the Nikon F4S than the Nikon F5. Practically, since I placed the order for the camera, it was inevitable that I would need to write about it. If you are seeking the perfect late model film SLR camera, you need look no further than the second to last pro level Canon EOS 1N. Just load a roll of film, take the camera in your hands and start shooting. You too will never want to let it go.
