How to Live a Low-carbon Life Chris Goodall, 2010 First Published in 2010 Routledge is an imprint of Taylor Francis an informa company Fuel Economy Guide , 2009 *How to Live a Low-Carbon Life* Christopher Goodall, 2012-05-04 Climate change is the greatest challenge facing humanity drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world Governments and businesses have been slow to act and individuals now need to take the lead The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits Yet from cars and holiday flights to household appliances and the food on our plates Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year four times what the Earth can handle Individual action is essential if we want to avoid climate chaos How to Live a Low Carbon Life shows how easy it is to take responsibility providing the first comprehensive one stop reference guide to calculating your CO2 emissions and reducing them to a sustainable 3 tonnes a year European Business Handbook 2003 Adam Jolly, 2003 Markets across the EU are moving towards a free market model with e commerce global competition the euro and enlargement fundamentally changing the way in which European companies are structured and run This European Buisness Handbook reviews how best to structure and implement European business models The Carbon Buster's Home Energy Handbook Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology The Carbon

Buster's Home Energy Handbook describes how to achieve this goal in the residential field. The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them, it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook. It provides answers to questions such as: Which measure is more effective: putting solar panels on your roof or buying a hybrid car? Where do I need to invest first: in high efficiency shower heads or solar tubes? Is a 500 fridge that uses 800 kWh of power per year a good buy? The book allows individuals to quickly and accurately assess which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns, yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15,000 in energy costs over the next five years.
